Standard Features on Jura Automatic Coffee Centers

- Internal 16 grams coffee brewing chamber to brew up to 16 oz. of coffee at a time except for ENA Micro with 10 grams / 8 oz (max)
- Two-step Intelligent Pre Brew Aroma System for maximum flavor and crema
- Commercial grade conical steel burr grinder with 6 fineness settings, ENA with 5 fineness settings, ENA Micro with 4 fineness settings and GIGA features 2 professional ceramic disc grinders with 5 fineness settings
- Stainless steel / SteelThermoBlock heating system. Unlike boiler systems, there is never any water remaining in the heating system after brewing
- Easy-to-read, LED alphanumeric or TFT display except ENA with LCD display green, red, yellow and ENA Micro with illuminated symbols
- Bypass funnel for use with pre-ground coffee
- Height adjustable dual coffee and milk spouts except ENA Micro with single coffee spout
- Automatic monitoring systems for: hot water rinse, refill water tank, refill beans (except ENA Micro 1), empty internal tray, cleaning cycle, water filter exchange, decalcifying
- High-quality fine foamed milk, unlimited steam and hot water output, except ENA Micro 1
- Removable water container
- Fits underneath standard kitchen cabinets (16" clearing)
- Automatic monitoring systems for: hot water rinse, refill water tank, refill beans (except ENA Micro 1), empty internal tray, cleaning cycle, water filter exchange, decalcifying
- High-quality fine foamed milk, unlimited steam and hot water output, except ENA Micro 1
- Removable water container
- Fits underneath standard kitchen cabinets (16" clearing)
- Cleaning tablets and water filter included
- Illustrated operating instructions
- Two year warranty includes free 2-way transport within the United States
- Swiss innovation, UL listed
- In-house Customer Service support, Monday – Saturday: 1-800-767-3554

About Jura

Jura machines are 100% Swiss engineered, with unsurpassed quality and precision. Jura is the innovation leader in automatic coffee centers, bringing new sophistication, quality, versatility and ease of use to brewing espresso-based beverages at home. Jura is sold in over 50 countries and is the global market leader in premium automatic coffee centers.

The Bean-To-Cup Experience

Jura automatic coffee centers produce the finest high-pressure, individually brewed coffee, espresso, cappuccino, latte and latte macchiato with a single touch of a button. Fast and easy to operate, they can grind, tamp, brew and self-clean in less than 60 seconds. Frothing options make it easy to froth or steam milk to perfection.

Jura automatic coffee centers provide more choices in coffee volume and coffee strength than any models. Grinding just before brewing assures the highest yield of flavor and aroma.

Milk Container

Cool Control Basic

The best way to serve light-as-air milk foam and hot milk for trendy specialty coffees is to keep the milk fresh at 39 °F prior to heating and frothing. The elegant Cool Control cools the milk to as much as 25 °F below the ambient temperature. Once the temperature reaches 39 °F, it is maintained constantly within the optimum range. This prevents freezing and saves energy. The high-quality stainless steel container comes in a 20 or 34 oz. size and is easy to remove. With its bayonet lock, the Cool Control Basic is easy to open, fill, store in the refrigerator as needed, and clean in the dishwasher.

Cup Warmer

The perfect cup temperature

Coffee tastes its best when served hot. That’s why all professionals work with pre-warmed cups as a matter of principle. If hot coffee is poured into cold porcelain cups, heat is lost. The Cup Warmer is the ideal accessory for any automatic specialty coffee machine. Two heating elements constantly keep the cups at the ideal temperature of approximately 130 °F.
**GIGA 5**

- **Highlights**
  - Make 1 or 2 Cappuccino or latte macchiatos at the touch of a button.
  - electronically adjustable cappuccino frother with fine foam technology
  - TFT Color Display
