PERFORMANCE

Spicer® Performance Blue-Coated Performance U-Joints

When it Comes to U-Joint Performance, Spicer “Blue” Away the Competition!

How did we make Spicer® u-joints for Dana axles even tougher? We gave them the blues. We covered our axle shaft u-joints with a high-performance, high-durability blue coating. Then we subjected them to the corrosive effects of 45 hours in a mud bath. Tests results prove that the beauty of the Spicer® Blue-Coated Performance U-joint is more than skin deep—its beauty stands up to the elements!

Spicer® Blue-Coated Performance U-Joints

The Product

Spicer® Blue-Coated Performance U-Joints (SPL®55-3X equivalent - Fig. 1) feature our signature high-performance, high-durability blue coating, which is proven to help these u-joints stand up to the corrosive effects of the elements better than the competitor's uncoated product.

The Test

We subjected the Spicer® Blue-Coated Performance U-joint —and a competitor's product (Fig. 2) — to durability testing, consisting of a 45-hour mud bath to simulate harsh road conditions (Fig. 3).

The Results

(Fig. 4) shows the clear, visible difference between the Spicer® Blue-Coated Performance U-joint and the competitor's product after 45 hours of mud bath testing.
