STRONG
IS NOT
ENOUGH

www.pewag.com

The star stud difference is the unique 8 sided design, which lasts up to **56% longer** than traditional round stud chain.

Additionally, the contact surface area is increased **23%**, resulting in improved traction.

The starstud™ advantage

- Lasts **40% longer** than other competitive studded chains
- **Shorter pitch link** allows for additional studs across the tire for an increased traction
- Design allows for **deeper hardening of the steel** for a stronger stud
- **Less downtime** and cost less per km
