

ANODIZED GLADHANDS

Tectran's premium gladhands are available with an anodized aluminum body for extra protection in extremely corrosive environments. All of our anodized gladhands meet or exceed SAE J318 specifications.

All Anodized Gladhands feature:

Corrosion resistant Anodized Aluminum cast body protects against road salt and other harmful chemicals

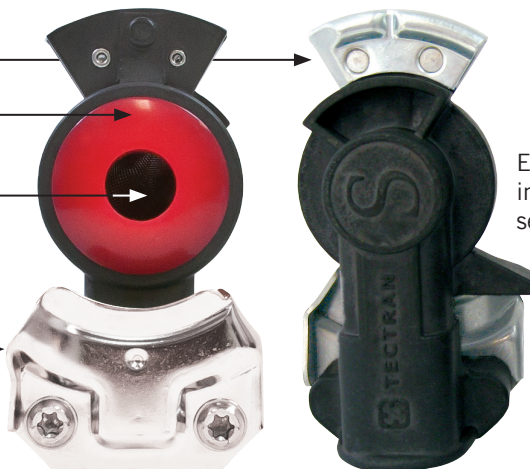

Plated striker plate

101119 series polyurethane wide lipped seal resists oil and improves sealing

Stainless steel fine mesh filter protects against harmful debris from entering your system

Stainless Steel clamp and hardware

Embossed lettering provides improved identification of service & emergency lines

38° ANGLE MOUNT GLADHANDS

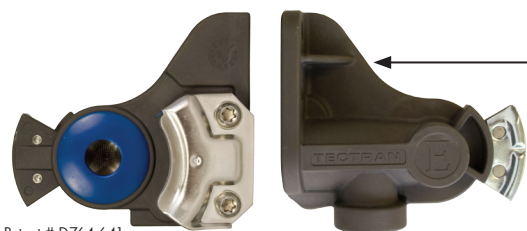

- Standard trailer bracket mount configuration

Sturdy, barrel type body design & gusset provides additional support against side pull force.

90° ANGLE MOUNT GLADHANDS

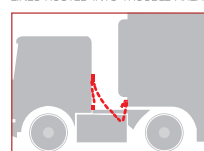

The Industry's FIRST 90° gladhand! The perfect Solution for applications where gladhands are mounted very low in the trailer. The 90° body design will assist in raising the air lines, keeping them from getting caught on the quarter fender, stairs, deck, or other tractor mounted accessories. Heavy duty body will support the weight of horizontal connections.

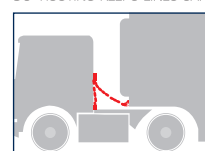

Patent # D764,641

Sturdy, barrel type body design & gusset provides additional support against side pull force.

PROBLEM
LINES ROUTED INTO TROUBLE AREAS

SOLUTION
90° ROUTING KEEPS LINES SAFE
