

# LIFELine® EXTENSION

The Tectran **LIFELine®** Extension attaches to an existing slider bar and holds your tractor-trailer connections out and away from the back of the cab.

- Prevents connections from hitting the cab and causing damage, which is costly to repair
- Creates approximately 10" of total clearance for spare tires, storage racks, and other equipment installed against the back of the cab
- Maintains a linear range of motion so your connections move freely during sharp turns as the truck manufacturer intended
- Easy to mount and provides a rock-solid platform for hanging your connections

Part Shown: 8473

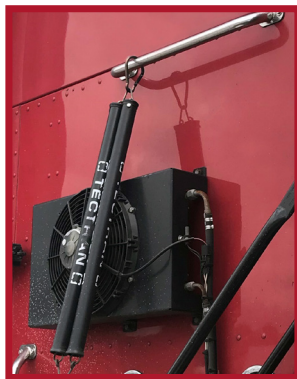

Part Shown: 8477

Part No. (Single Pack)	Stock Code	Fleet Pack Part No. (5 Pack)	Stock Code	Existing Slider Bar Diameter	Minimum Straight Portion of Slider Bar Required
8473	23815	8473-5	23865	1 in.	15 in.
8477	23817	8477-5	23866	0.75 in.	27 in.

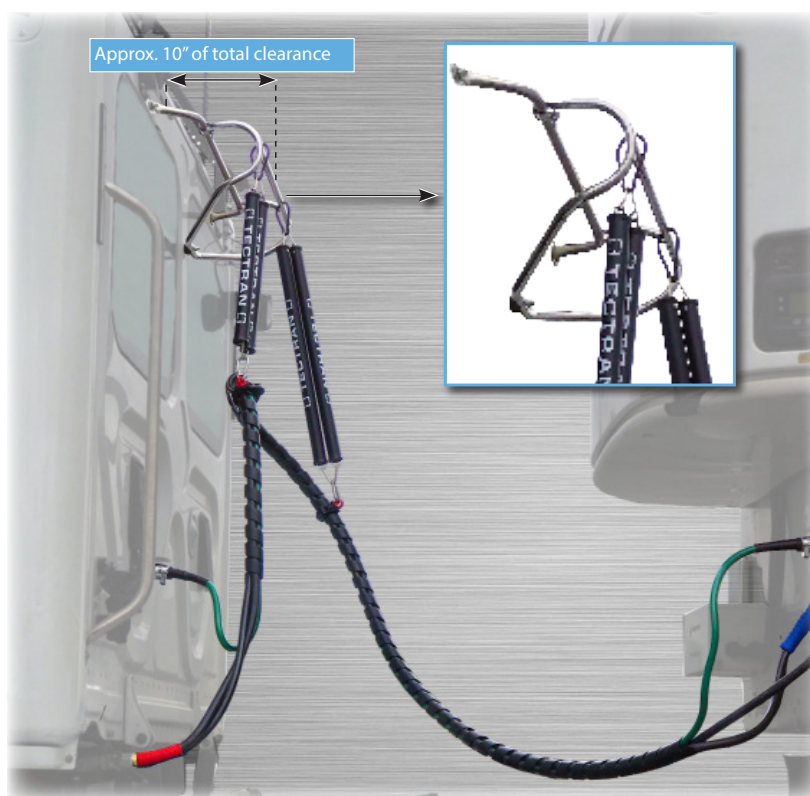

Note: The molded EPDM bumper must rest against a secure metal surface on the back of the cab. Do not mount the LIFELine® Extension with the bumper resting against a window or any other fragile surface as damage may occur.
