

LISTEN
TECHNOLOGIES

SOLUTIONS GUIDE

LISTEN TECHNOLOGIES UNDERSTANDS THE POWER

and fragility of sound. Our passion is helping people overcome the challenges of noise, distance, and hearing loss. Every environment has unique audio challenges – one product doesn't always address the needs of the venue or the individual. Listen approaches every project with the goal of promoting an all-encompassing solution rather than simply selling a product.

Our products are designed to complement each other and can be used for a variety of applications in various settings. Our solutions solve the challenges associated with the venue or the individual to create an environment of inclusion and engagement.

ListenRF

- + Broadest range available
- + 20 dB less hiss – highest quality audio
- + Great for large or small coverage needs, indoors or out

ListenTALK

- + Two-way communication
- + Portable and completely wireless

ListenIR

- + Secure signal – great for adjacent classrooms and courtrooms
- + IR that sounds like RF
- + Enhance existing IR systems with iDSP receivers

Audio Everywhere from Listen Technologies

- + Assistive Listening for smart phones
- + Stream audio over existing Wi-Fi
- + Customizable app

ListenLOOP

- + Less time managing equipment
- + Distributes audio directly to t-coil enabled hearing devices
- + Audio tailored to user preferences

HOSPITALITY

SOLUTIONS FOR
HOSPITALITY

With 1.9 billion smartphone users worldwide, and new advancements in technology every day, connecting tech savvy guests to meaningful experiences becomes more important than ever before. Listen Technologies solutions allow you to provide visitors with an exceptional and personalized listening experience.

Audio Everywhere

AUDIO IN SPORTS BARS,
RESTAURANTS

Optimize your multi-screen investment by adding the element of audio, allowing guests to hear the play-by-play as they watch the big game.

HOTEL LOBBIES, POOL,
COMMON AREAS

Customize the Audio Everywhere app to provide announcements, deals, and specials as guests stream music by the pool or TV audio in the lobby.

HOTEL FITNESS
CENTERS

Provide your guests with a customized experience while they get their workout in, as they listen to the morning news while running on the treadmill.

ListenTALK

EVENT STAFF
COMMUNICATION

Affordable two-way communication enables your staff to stay on top of the demands of the events indoors or out.

Assistive
Listening

CONFERENCE CENTER

Make sure conference space is ADA compliant by adding on any of Listen Technologies' installed or portable assistive listening solutions.

EDUCATION

SOLUTIONS FOR EDUCATION

As education becomes more collaborative, effective communication becomes crucial. From K-12 to Higher Ed, Listen Technologies offers scalable audio solutions that reach past ADA compliance to create truly engaging learning spaces.

Assistive
Listening

CLASSROOM

Adjacent classrooms need a secure solution for assistive listening. Listen**IR** provides great audio quality with no spillover. To create engaging two-way assistive listening, pair Listen**TALK** with an existing soundfield setup or use on its own as a portable solution.

Listen**TALK**

THEATER

Listen**TALK** wireless two-way communication offers affordable backstage communications and can even be integrated into existing installed intercom setups.

Audio Everywhere

STUDENT LOUNGE AND FITNESS CENTERS

Offer streaming TV audio and announcements anywhere on campus with **Audio Everywhere's** scalable coverage and customizable app.

STADIUMS

Large venues need the broad coverage that only Listen Technologies can deliver. Listen**RF**216 MHz offers coverage up to 914 m (3,000 ft.). Pair stadium audio with **Audio Everywhere** and all your fans can stream the game directly to their phone via Wi-Fi.

Listen**RF**

MANUFACTURING

SOLUTIONS FOR MANUFACTURING PLANTS

Listen Technologies designs and manufactures two-way audio solutions for manufacturing plants to monitor quality through Gemba walks conducted by management as well as plant floor communication to ensure safety.

Audio Everywhere

EMPLOYEE LOUNGE OR LOBBY

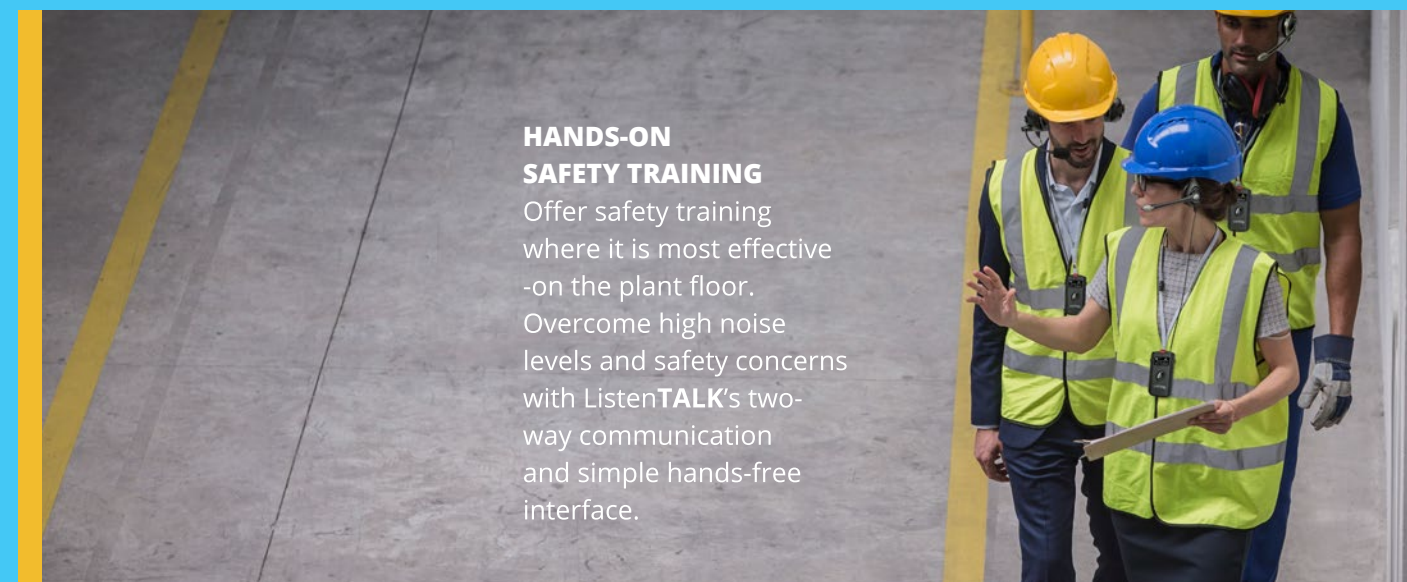

Create relaxing and functional spaces throughout the facility by streaming TV audio directly to smartphones via Wi-Fi with **Audio Everywhere**.

ListenTALK

TOURS AND PLANT FLOOR WALKS

ListenTALK's flexible system enables group communication on tours of any size. With 3 participation modes and excellent audio clarity, guides can field questions and offer language interpretation without having to raise their voices or repeat themselves.

HANDS-ON SAFETY TRAINING

Offer safety training where it is most effective - on the plant floor. Overcome high noise levels and safety concerns with ListenTALK's two-way communication and simple hands-free interface.

HOUSE OF WORSHIP

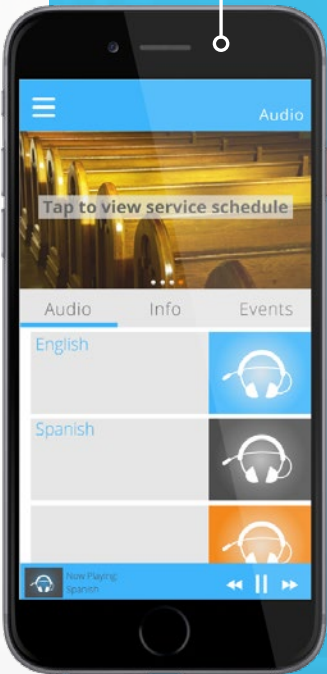

SOLUTIONS FOR
HOUSE OF
WORSHIP

Address the needs of all congregants by providing language interpretation, audio for overflow areas, and assistive listening for those with a hearing impairment. An effective audio solution delivers a clear message and keeps the congregation engaged.

Audio Everywhere

FOYER AND
COMMON AREAS

Pair an existing Wi-network with **Audio Everywhere** to stream the message to overflow areas, cry rooms, or any common area, allowing congregants to hear the message no matter where they are in the building. Customize the free app to add bulletins, announcements, and helpful links.

Assistive
Listening

SANCTUARY

Ensure everyone hears the message with assistive listening and language interpretation solutions from Listen Technologies.

ListenTALK

MINISTRY
TEAMS

Communication is key when it comes to an effective ministry. Whether it's the audio video team, children's ministry, or the welcome team, **ListenTALK's** secure and flexible 2-way communication helps the service come together without a hitch.
