# Introducing Our State-of-the-Art Behavioral Healthcare Recliner: The Pinnacle of Patient Safety and Comfort

## Key Features:

**Fully Concealed Hardware and Mechanical Components:** Our recliner is designed with safety at its forefront, featuring fully concealed hardware and mechanics. This design eliminates the risk of accidental harm or misuse, ensuring a safer environment for both patients and caregivers.

**Handle-Free and Loop-Free:** To further enhance safety and prevent any potential ligature points, our recliner is crafted without any handles or finger pull loops. This thoughtful design aspect ensures peace of mind for caregivers and a secure environment for patients.

**Reinforced Stitching on All Upholstery:** Durability meets safety with our high-quality upholstery, reinforced with extra stitching to withstand the rigors of daily use in a healthcare environment. This not only ensures longevity but also maintains a welcoming and comfortable seating experience for patients.

**Exceptional Weight Capacity:** Our standard recliner supports up to 500 lbs, with a bariatric version available for higher weight capacities. Remarkably, our standard recliner has been tested to 1050 lbs, showcasing our commitment to inclusivity and robust design.

**Innovative Multi-Position Footrest:** Designed with patient comfort and safety in mind, our recliner features a multi-position footrest without the traditional scissor mechanism, eliminating pinch points and enhancing patient safety.

**Stable and Secure:** Weighing in at 185 lbs, our recliner's substantial build ensures stability and prevents tipping, providing a secure seating option for patients.

**Customizable Solid Arm Caps:** Tailor the recliner to your facility's needs with our solid arm caps, available to enhance durability and ease of cleaning.

**5 Year Warranty:** We stand behind the quality and durability of our recliners with a 5-year warranty, ensuring your investment is protected.

**Bariatric Version Available:** To accommodate the diverse needs of patients, we offer a bariatric version of our recliner, designed with the same high standards of safety and comfort.
