Owner's Guide

READ AND SAVE THESE INSTRUCTIONS

IMPORTANT SAFEGUARDS

When using electrical appliances, basic safety precautions should always be followed, including the following:

1. Read all instructions before using.
2. Do not touch hot surfaces. Use handles or knobs.
3. To protect against electrical shock, do not immerse cord, plug or TEMPERATURE CONTROL PROBE in water or other liquid.
4. Close supervision is necessary when any appliance is used near children. This appliance is not to be used by children.
5. Unplug from outlet when not in use and before cleaning the appliance. Allow to cool before putting on or taking off parts, and before cleaning.
6. Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner. Return appliance to the manufacturer (see warranty) for examination, repair, or adjustment.
7. The use of accessory attachments not recommended by manufacturer may cause injuries.
8. Do not use outdoors.
9. Do not let cord hang over edge of table or counter, or touch heated surfaces.
10. Do not place on or near a hot gas or electric burner, or in a heated oven.
11. Extreme caution must be used when moving appliance containing hot oil or other hot liquids.
12. Always attach TEMPERATURE CONTROL PROBE to appliance first, then plug cord in the wall outlet. To disconnect, turn TEMPERATURE CONTROL DIAL to "OFF", then remove plug from wall.
13. Do not use appliance for other than intended use.

SAVE THESE INSTRUCTIONS

This appliance is for **HOUSEHOLD USE ONLY**. No user-serviceable parts inside. Do not attempt to service this product. A short power supply cord is provided to reduce the hazards resulting from entanglement or tripping over a long cord. An extension cord may be used with care. However, the marked electrical rating should be at least as great as the electrical rating of the skillet. The extension cord should not be allowed to drape over the counter or tabletop where it can be pulled on by children or tripped over unintentionally.

POLARIZED PLUG

This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug will fit into a polarized outlet only one way. If the plug does not fit fully into the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to modify the plug in any way. If the plug fits loosely into the AC outlet or if the AC outlet feels warm do not use that outlet.

Keep Warm Setting

The temperature control probe has a “Keep Warm” range setting of approximately 150°F to 180°F. The indicator light will cycle on and off when this setting is in use to indicate that the skillet is maintaining the desired temperature.

IMPORTANT

Check the **HANDLES/LEGS** of your skillet periodically for looseness. If needed, re-tighten with a screwdriver. **CAUTION:** Overtightening can result in stripping of screws or cracking of handles and base.

KNOW YOUR ELECTRIC SKILLET

Figure 1

HOW TO ASSEMBLE YOUR ELECTRIC SKILLET

Remove all parts from the packaging.

1. Locate Lid Knob in packaging.
2. Holding Lid Knob on the outside top of the Glass Lid, align hole in Lid Knob into hole located on the outside of the Lid. Knob should be centered on Glass Lid.
3. Place the Phillips head screw through screw hole on the inside of the lid.
4. Tighten screw until snug. Do not overtighten. The Lid is now ready for use.

HOW TO USE YOUR ELECTRIC SKILLET

1. Set the skillet on a flat, dry, heat resistant surface. Some countertop and table surfaces, such as Corian® and other surfaces, are not designed to withstand the prolonged heat generated by certain appliances. If you plan to use the product for a prolonged period of time, we recommend placing a hot pad or trivet under your skillet beforehand to prevent possible damage to the surface.
2. Turn temperature control to "OFF", plug temperature control probe securely into receptacle on skillet, plug into standard 120V AC outlet and turn temperature control to desired setting.
3. The temperature control indicator light will come on when you set or adjust the temperature. Once the desired temperature is reached, the indicator light will go out. (When adding food, the indicator light will come on briefly as the overall cooking temperature is reduced.)
4. Preheat the skillet with the lid on for 10 – 15 minutes or until the indicator light goes out. **NOTE:** The cooking temperatures listed in this user manual are estimates. Adjust the cooking temperature slightly up or down to achieve the results you prefer.
5. A steam vent is located on the Glass Lid. The steam vent allows steam to escape while cooking with the lid in place. **CAUTION:** Escaping steam is hot! Be careful when removing or lifting lid. Oven mitts are recommended when removing cover from skillet base or when replacing it.

NOTE: If heating oil, always leave the lid off. If oil smokes, immediately turn skillet "OFF" and allow to cool.

HOW TO CLEAN YOUR SKILLET

CAUTION: Skillet is hot. Handle carefully.

1. Always allow the skillet to completely cool before cleaning.
2. Unplug cord from wall outlet, then remove temperature control probe from appliance. **CAUTION:** The probe on the temperature control piece could be hot. Wipe probe clean with a dry towel.
3. Immerse the skillet and lid in warm, soapy water and wash with a soft cloth. Rinse well and dry. All parts, except the temperature control probe, are fully immersible and dishwasher safe.

NOTE: Do Not use steel wool, abrasive cleaners, or metal scouring pads on cooking surfaces as this will damage the non-stick coating.

WARNING: Do not immerse temperature control probe in water or other liquid.

HELPFUL HINTS

- Before using the skillet for the first time, lightly brush cooking surface with vegetable oil. Heat, uncovered, to 300°F. Turn "OFF" and cool completely. Wipe away excess oil.
- Your skillet features a convenient Spoon Rest. Refer to Figure 1 for location. Use only nylon or heat-proof plastic cooking utensils. Metal utensils may scratch the non-stick surface.
- This skillet is not designed to deep fry. To pan-fry, do not use more than 1 cup of oil. Select a vegetable oil or peanut oil for frying. Butter and olive oil should only be used to sauté foods on a lower temperature setting.
