Drawer Removal Instructions

STOP Please read all instructions before you begin.
All Pedestal Drawers must be removed before attaching the Pedestal to a desk.

- Step 1:** Stand in front of the pedestal and open the drawer you wish to remove.
Pull drawer all the way out until met with resistance.
- Step 2:** With both hands, place fingers underneath the open drawer on each side near the drawer release/locking lever (highlighted below) like you would be picking up the drawer. Keep hold of the drawer and using just your pointer finger on your right hand and your thumb on your left hand, simultaneously push the lever **UP on the right side** and push **DOWN on the left side**. While continuing to hold both levers in the correct pushed position, pull the drawer out.
- Step 3:** To put the drawer back in, simply align the rails on the drawer with the tracks on the pedestal unit and push in.
