NOTES

Since there are variations in all glass products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.2 standards. Not for use on ramps. Water, oil, grease, improper drainage and certain footwear can create slippery conditions. Floor applications expected to be exposed to these conditions require extra caution in product selection.

To achieve optimal results, all tile should be selected from multiple cartons and shading and graphic arrangement planned prior to installation.

For additional information refer to "Factors to Consider" at: americanolean.com/Factors.

Use of a white latex modified thin-set is recommended for installation.
