MULTIMEDIA™

FLEXIBLE GLUE DOWN

Multimedia redefines what resilient flooring can be; offering an unprecedented spectrum of design possibilities. With five distinct aesthetics, this collection delivers on the “Multi” in every sense. Crafted using Vitacore™, an innovative PVC-free material made from recycled content, this collection proves that sustainability and sophistication can beautifully coexist. Whether styling a refined urban loft or a cutting-edge commercial space, Multimedia offers a curated canvas to bring your ideas to life, with unmatched versatility and conscious craftsmanship

- Crafted using Vitacore™, an innovative PVC-free material made from recycled content
- Flexible Glue Down
- 20 mil wear layer for heavy commercial applications
- Embossed
- TitanGuard™ Technology
- 100% Waterproof

IMAGINE WHAT'S POSSIBLE™ WITH DALTILE DESIGNS

Cover photo features Multimedia™ Fabric Velvet, 18 x 36 on the outer floor, and Multimedia™ Terazzo Lake, 18 x 18 on the inner floor.
Above photo features Multimedia™ Wood Nook, 18 x 18 on the floor.

WHAT IS PETG?

- **Definition & Performance:** PETG is a clear, durable thermoplastic polyester that offers excellent impact resistance, stability, and chemical durability. It provides a strong alternative to traditional materials and is 100% PVC free.
- **Uses:** Suitable for high-traffic flooring applications thanks to its toughness and consistent surface quality.
- **Advantages:** Can be precisely formed and fabricated with minimal cracking, which helps reduce production waste.
- **Circularity:** PETG is PET-based and recyclable in many regions, supporting circular-use opportunities where recycling systems are available.

ENVIRONMENTAL FEATURES AND BENEFITS

- **Post-Consumer Recycled Content:** Many PETG products may contain up to 50% recycled plastic, which can help reduce demand for virgin materials.
- **Energy Savings:** Using recycled PETG can reduce the energy required in production by as much as 70% compared to using virgin materials.
- **Consumer Analogy:** One square foot of PETG sheet could equate to the repurposing of approximately 3–4 plastic bottles, depending on product composition. When applied across a larger space, the potential impact increases substantially.

TitanGuard™ is an advanced, environmentally conscious protective finish designed for high-traffic flooring applications. This innovative technology uses PETG and microscopic ceramic beads infused into a durable urethane layer to enhance scratch resistance, improve wear performance, and provide added anti-slip support—all without PVC materials. Engineered for the demands of commercial spaces, TitanGuard delivers long-lasting performance.

PERFORMANCE & CHARACTERISTICS

Construction:	PVC Free Resilient Flooring
Classification:	ASTM F1700 - Class III, Type B Embossed
Squareness:	ASTM F2421 - Passes - ± 0.010" max
Size and Tolerance:	ASTM F2421 - Passes - ± 0.024 in.
Thickness:	ASTM 386/387 - Passes - ± 0.199 in.
Flexibility:	ASTM F137 - Passes - 1" mandrel, no crack or break
Dimensional Stability:	ASTM F2199 - Passes - L: -0.007 W: -0.006
Static Load Limit:	ASTM F970 - Passes - Average = 0.003 in.
Residual Indentation:	ASTM F1914 - Passes - 4.76%
Resistance To Chemicals:	ASTM F925 - Passes - No change observed
Resistance To Light:	ASTM F1515 - Passes - ΔE < 8.0
Resistance To Heat:	ASTM F1514 - Passes - Average ΔE < 8.0
Critical Radiant Flux:	ASTM E648 - Passes - Class 1 (> 0.45w/cm2)
Smoke Density:	ASTM E662 - Part A - Passes - <450 W/cm2

SPECIFICATIONS

Installation Advisory:	Glue Down Resilient Flooring must be installed using Daltile's recommended adhesives. See daltile.com/multimedia-collection for more information.
Stocking Platform:	5.0 mm | 20 mil
Special Platform Order:	Additional platforms available on special order. Minimum quantities apply. Contact your Daltile representative for additional information.

NOTES

See daltile.com for recommended installation and care guidelines.
