POOL COPING OPTIONS LOCALLY SOURCED			
COLLECTION	SPECIAL ORDER	IMAGE	DESCRIPTION
Natural Stone	✓		If the timeline to receive the factory coping piece is a problem, there are alternative solutions available to get the job completed. We can suggest natural stone, cast-in-place concrete, concrete pavers and clay brick; all of which are great options, especially in the case of a free form pool shape. Pool coping is the most commonly requested trim profile for the TREAD 2cm pavers. Additionally, we can suggest considering a pool coping material of contrasting color to the field tile. This provides the additional benefit of a visual demarcation, especially in an area that will also be used for entertaining.
Cast in Place Concrete	✓		
Concrete Pavers	✓		
Clay Brick	✓		

XTERIORS CUSTOM TRIM PROFILE ORDERING PROCESS FOR FACTORY TRIMS	
STEP #	**DESCRIPTION**
STEP 1	**SSC to contact Exacta (Vendor #36983) with a request for fabrication providing pertinent information including:** – Finished product desired – Specifications – Size of tile to be supplied to Exacta – Quantity – Required date – Other pertinent details
STEP 2	**Exacta will provide the fabrication, packaging cost, and ETA based on when Exacta receives tile to start** – The unit of measurement "UOM" in which the quote will be received is PC, NOT square or linear foot
STEP 3	**SSC places the order by email or fax to Exacta and Exacta will then create a sales order in Exacta's system and puts the order in their production que**
STEP 4	**SSC places a "COPS" order to ship the material component to Exacta** – Ship the component from the SSC or – Transfer the component via Mohawk truck from an RDC
STEP 5	**Exacta receives the material and begins production based on lead time provided**
STEP 6	**Exacta completes the order, packages, and palletizes for shipment**
STEP 7	**Exacta contacts the SSC to confirm yielded quantity produced and revises quantity on the PO if required**
STEP 8	**Exacta will discuss shipping options with the SSC and ship based on their requested method** – Exacta typically ships LTL via approved Daltile freight companies and bills freight from third party – Exacta can also "cross-dock" back through the Sunnyvale RDC
STEP 9	**Exacta creates all the associated shipping documents, BOL, pallets tags, etc.**
STEP 10	**Order is shipped and invoiced at the time of shipping**

Please contact your local SSC to place your Custom Trim order.
