

# NATURAL QUARTZITE

NATURAL STONE SLAB

# CREATE YOUR MASTERPIECE

**Like a true art piece.** A modern day Da Vinci. The canvas – boundless. From dazzling grey and white tones to an earthier selection palette, Natural Quartzite will bring your creative visions to life. Harder than granite, Quartzite will live a long durable life, free of flaws like scratches and etching. A collage of subtle movement and soft veining, combined with unrivaled performance, will be hallmarks of the showpieces created with this modern classic. There is a renaissance in the art world. And it is sleek, modern, and natural. Go forth and create your masterpiece.

## STYLISH AESTHETIC

- Features a soft color palette with striking movement and veining
- Unique variation created from minerals carried by groundwater that impart color hues onto the stone
- Distinct veining from solid color to crystalline appearance

## DURABILITY + PERFORMANCE

- Highly resistant to heat and stains
- Very durable, eliminating the concern for etching
- Virtually maintenance free

## NOTES

Natural stone products inherently lack uniformity and are subject to variation in aesthetics (color, shade, finish, etc.) and performance (hardness, strength, slip resistance, etc.). Natural stone products do not meet minimum coefficient of friction thresholds recommended by safety standard setting organizations. Check local building codes prior to specification or installation to verify that product technical characteristics comply with required parameters. Final selection should be made from actual slabs, and not from samples or color reproductions.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to [www.P65Warnings.ca.gov](http://www.P65Warnings.ca.gov).

Refer to the Safety Data Sheet for more information regarding Natural Quartzites.
