CT motion™ Syringeless Injector

Less waste. Fewer steps. Do more with syringeless.

Utilizing a fully shielded, mobile design, the system infuses accurate, repeatable, patient-specific doses from a multi-dose vial, all managed through a simple touchscreen.

With less prep time, streamlined patient turnover and fewer steps, the automated syringeless technology of CT motion helps facilitate efficiencies that keep your radiology suite moving.

CT motion streamlines the delivery of iodinated contrast media used in CT procedures. It is approved for use with Omnipaque™ (iohexol), and Isovue® (Iopamidol) in imaging bulk package and single dose. It is also approved for use with Visipaque™ (iodixanol) in single dose.

- Integrated CM heat retainers to maintain CM temperature in container
- Display unit for simple, safe, and quick operation
- Includes a 12'' color monitor

Please see Boxed Warning, Important Safety Information, and Full Prescribing Information for Omnipaque (iohexol) & Visipaque (iodixanol) starting on page 73.

Injectors

Medrad® Stellant FLEX® CT Injection System with Contrast Dose Management options

The Medrad™ Stellant FLEX™ helps you meet your financial, clinical, and organizational goals, so that you can continue to deliver quality patient care while maintaining healthy business operations.

Focus on patient safety with added system features

Increase operational efficiency with interoperability and design

Decrease departmental costs with syringe savings

Extend service life of your CT technology

New Options for Contrast Delivery

- 150 mL syringe option is offered in addition to the 200 mL syringe size for protocols that require higher volumes of contrast
- Syringe options offer you the flexibility to optimize contrast media use, reduce environmental impact, and cut the cost of waste disposal, all of which reduce operational costs

Certegra® Workstation

From study set-up and preparation to study administration and results management, the Certegra® Workstation serves as a workflow-centralized technologist interface to help users enhance efficiencies and patient care, enabling options such as:

- Modality Work List connectivity
- Point-of-care data capture
- Interconnectivity with Hospital IT systems including PACS, RIS and Speech Reporting Systems

Pedestal mount configuration includes:

- Dual injector head on pedestal with integral IV pole

Ceiling mount configurations include:

- Dual injector head on Overhead Ceiling Mount

Pedestal mount and ceiling mount configurations include:

- Syringe heat maintainer
- Certegra Workstation with USB drive
- DualFlow software
- ISI-ready software to accept ISI900G integrated injector option†
- Base control unit
- 22.8 m (75 ft) head extension cable
- 7.6 m (25 ft) base to display cable
- Power cord, North America
- Power cord, international
- Product information package
- Operations manual
- Installation, customer's operational training at time of installation, and one year full on-site warranty in Bayer service countries

Medrad Stellant FLEX Injection system with Integrated Communication

Designed to save time and increase CT scan throughput, the Medrad Stellant FLEX with Certegra Workstation is validated for use with GE's Enhanced Xtream Injector option on selected scanners – enabling CAN Class 4 functionality for seamless communication. The resulting injector and CT scanner integration benefits include:

- Reduced overall programming time
- Improved scanner and injector protocol matching through programming of the injector from the scanner console
- Better control over contrast injection procedure with a synchronized CT scan start time. A single button-press on the scanner starts both the injector and scanner
- Preview injection parameters before beginning the scan
- Complete post-study reviews of injection results at the scanner console
- Automatic documentation of the injection results in PACS System

Certegra® P3T® option is a contrast-injection software that automates personalized contrast dosing at the point of care. Our offerings include:

Certegra® P3T® 2.0 Pulmonary Angiography CT

Certegra® P3T® 2.0 Abdominal CT

Certegra® P3T® 2.0 Cardiac CT

- Save/recall Certegra® P3T® 2.0 software protocols in protocol manager
- Create protocol presets based on radiologist preferences
- Enables generation of individualized contrast injection protocols, customized to the patient
- Increases consistency of individualized protocols amongst clinicians
- Certegra® P3T® (PA and Cardiac) software are used for CT angiography of cardiac structures, coronary arteries, chambers of the heart, thoracic and abdominal aorta, and pulmonary vasculature
- Utilizes the power of DualFlow technology (simultaneous injection of contrast and saline) to obtain functional cardiac data

P3T 2.0 Options

Cat#	Description	Warranty
E80141DE	Medrad P3T Cardiac 2.0 option for Certegra Workstation	H
E80141DF	Medrad P3T Abdomen 2.0 option for Certegra Workstation	H
E80141DG	Medrad P3T Pulmonary Angiography (PA) 2.0 option for Certegra Workstation	H
E80141DH	Medrad P3T 2.0 Bundle option for Certegra Workstation (Cardiac, Abdomen and PA)	H

Medrad Contrast Dose Management Software

A contrast dose management solution is available when the Medrad® Stellant® D Injector is combined with the Certegra™ Workstation and the contrast Dose Management software option. This enables a patient centric workflow designed to enhance personalized contrast delivery, protocol management, and data capture across the Healthcare IT landscape.

Certegra Workstation

CT Point of Care software

Point of care data entry automates direct documentation:

- Auto-populate the accession number, study description, and more – directly from RIS
- Capture vital injection details, including contrast brand and concentration, saline, catheter gauge, injection site, lot number, expiration date and technologist IDs

Outbound interface packages

- Inter-connectivity between the scanner, injector PACS, RIS, and Radiology Reporting System allows captured data to be centrally mobilized and made instantly available, promoting productivity throughout the chain of care

Patient-centric workflow eliminates the guesswork

- Select patient (with demographic information) directly from the Modality Worklist/Patient Worklist
- Instantly tie appropriate contrast delivery directly to each patient

Interface connectivity drives complete and consistent documentation

- Auto-populate patient injection and study information into PACS, RIS, Radiology Speech Reporting Systems with Outbound interface options

Nemoto DUAL SHOT alpha 7 Injector

The Nemoto DUAL SHOT alpha 7 Injector with integrated NCOM option rounds out the GE HealthCare Accessories family of products for your complete CT suite.

This CT injector can be a useful tool in helping your practice optimize contrast procedures. With its innovative design and intuitive operation, facilities, patients and clinicians alike benefit from this exceptional injection system.

E8004KB/KC/KD

Innovation

- New design with only two components
- Body Weight protocol for optimized image quality in IV contrast management
- Advanced protocols with dilution (simultaneous saline and contrast), multi-phases, and saline flush
- Innovative syringe design provides the option of off-line filling of syringes
- SD memory card for quick and easy software updates
- Dual control of injection pressure to secure injection continuity

Ease of use

- Intuitive anatomical protocol selection complements the GE HealthCare CT scanner protocol setup
- Minimal button presses required to create protocols
- Real-time injection pressure graph
- Indicator of selected protocol name
- Thumbnail style display for visual protocol settings
- Easy syringe loading and unloading, one touch syringe adapter with snap lock
- Automatic Quick Purge button on head side
- Air Check button on console and head
- Adjustable quick return for easy syringe refill
- Timing bolus injection
- Needle placement test
- Home button for quick return to main menu
- Injection results screen of the last 100 injections, in a table or pressure graph format
- Low pressure warning
- Adjustable maximum pressure per protocol

Nemoto DUAL SHOT alpha 7 CT Injector packages – stand alone injector

Cardiac Gating

IVY® 7800 Cardiac Trigger Monitor for CT, PET/CT and SPECT/CT

The Model 7800 is IVY Biomedical's fifth generation cardiac trigger monitor with the intended use primarily on patients in applications requiring precision R-wave synchronization. Incorporating a simple, easy to use touchscreen interface, the 7800 displays two simultaneous ECG vectors along with the patient's heart rate.

Intuitive Operation
Acquiring a trigger ECG can often be a challenging task, and selecting the right ECG vector can be problematic. The 7800's AUTO lead select feature (Trigger lead only) will determine which lead (I, II or III) provides for the best amplitude-to-noise ratio of the ECG signal and thus a more reliable cardiac trigger.

Patient Monitoring
When required, high and low heart rate alarm limits can be adjusted to bracket a patient's heart rate, so that a violation of these limits produces an audible and visual indication of the alarm.

Improved Communications
The Model 7800 has an electrically isolated Ethernet connector with 2 channels, enabling communication between the monitor and the external console, as well as the gantry display. An integrated USB drive allows users to store and retrieve ECG events for retrospective analysis.

Integrated Chart Recorder
Prints ECG strips on demand for manual review.

Precision Engineering
A color Trigger Mark clearly indicates the timing of each synch pulse with respect to the ECG, providing a visual reference for timing and synchronization.

ECG Viewer Software
Included on the USB drive is an easy to use ECG viewer specifically designed to enable detailed analysis of individual ECG.

Touch Screen Operation
Quickly adjust alarm limits, or make adjustments on the fly using the on-screen menus and buttons.

Configurations include everything you need to get started
The Kit includes:
7800 Cardiac Trigger Monitor, set of 4 RT lead wires – 30 in, low noise patient cable – 4 lead, Ethernet Internet cables, ECG adult electrode (box of 40), cord-set hospital grade (12 ft), NuPrep Gel, USB Memory Stick, Recorder Paper, Roll Stand for model 7000 series and IPC cable.

IVY® CTM-400 Cardiac Trigger Module for CT

IVY Biomedical's CTM-400 Cardiac Trigger Module is a sophisticated Computer Tomography (CT) gating module that synchronizes a patient's ECG to help remove motion artifacts when generating cardiac or other physiological images.

Imaging Applications

The CTM-400 module is intended primarily for use on patients in applications requiring precision R-wave synchronization such as timed imaging studies. Simultaneously ECG vectors and the ECG trigger are sent to the CT system.

Intuitive Operation

Built-in LED indicators provide visual status of power and system communication while a varied intensity light pipe illuminates the perimeter of the module during use. An RS-422 D-sub 15-position standard density network interface connector provides two-way communications between the module and the external console.

ICM Cardiac Assembly Collector Kits

The IVY CTM-400 Cardiac Trigger module is completely integrated with select GE HealthCare CT scanners and installed directly onto the gantry table with bridge and tray assembly included.

Respiratory Gating Systems

Varian RGSC 2.0 Respiratory Gating System

Respiratory Gating for Scanners (RGSC) from Varian Medical Systems is used to characterize the patient's respiratory patterns and monitor the patient position during diagnostic CT image acquisition. Using a single infrared camera and a reflector block, the system tracks the patient's respiration pattern, range of motion and provides recorded information to the scanner.

- Available in a couch-mount or wall/ceiling-mount configuration
- An integrated database with the ARIA® oncology information system and Eclipse™ treatment planning
- The software user interface is intuitive and helps simplify the image acquisition and treatment delivery process

E8505VG	Docking Station for CARINAnav® system only (Wall and Bridge Mount Only)	D

LAP Laser DORADOnova 3 Laser Control

DORADOnova laser systems are operated by CARINAnav®, consisting of hardware and software. With CARINAnav®, LAP provides you a control system to move the lasers and interact with your RT planning system. Once connected to your RT planning or virtual simulation system the data can be imported via LAP file format or DICOM.

CARINAnav® – Intuitive, Easy, Portable

CARINAnav's tablet PC is a portable wireless laser control system in a compact design. Patient data is imported via Bluetooth or Wi-Fi interface.

CARINAnav® has been designed to be the platform for future laser alignment tasks. Modular thinking and open design offer the base for developing solutions covering the requirements to come.

- Portable – Move to your preferred working location
- Flexible – Select patient data, enter this data or move the lasers manually
- Intuitive – Touchscreen navigation allows for quick startup and auto reconnect
- Secure – User login required and permanent laser position feedback

CARINAnav

Flat Table Tops

Elekta iBEAM evo CT Overlay

- Equivalent geometric and dosimetric configuration to iBEAM® evo Couchtop
- Integrated indexing system compatible with a wide range of existing surface mounted industry standard accessories
- Designed to help reduce image artifacts
- Quick and easy installation and removal of the iBEAM evo CT Overlay

The iBEAM® evo CT Overlay facilitates new potentials for treatment planning and simulation. The iBEAM evo CT Overlay is identical in design, geometry and dosimetric properties with the iBEAM evo Couchtop and offers the total departmental solution in combination with an iBEAM evo Couchtop (installed on the LINAC table).

The integrated indexing system:

- Optimizes patient positioning accuracy and reproducibility, reducing patient setup time, minimizing patient setup inaccuracies further in the treatment chain and maximizing the stability of positioning devices

E8819LA

Specifications

Material	Carbon-fiber sandwich with foam core
Weight	11 kg (24 lb)
Dimensions (Length x Width)	2000 mm x 530 mm (79 in x 21 in –approx.)
Indexing	BodyFIX 14 indexing system
Estimated Useful Life	10 years
Non-Compatibility	Not compatible with Varian couch-mount respiratory gating systems

Cat#	Description	Warranty
E8819LA	Elekta iBEAM evo CT Overlay - includes iBEAM CT Overlay, iBEAM evo extension 415, and indexing bars (set of 3)	C
Compatibility: Discovery CT590 RT, Optima CT580 RT, Discovery RT, Discovery MI/MI DR, Revolution CT, Omni Legend, Revolution Ascend, Revolution CT, Revolution CT ES, Revolution Vibe, Revolution Apex, Revolution Altitude, Revolution RT		

CQ Medical® Couchtop™

CQ Medical (formerly CIVCO RT™ and Qfix®) couchtops are constructed of rigid carbon fiber and have indexing points running down the side.

These indexing points make it possible for facilities to offer accurate and reproducible patient positioning from imaging room to the cancer treatment room.

One-stop shop

Purchasing a CQ Medical Couchtop through GE HealthCare guarantees a verified product for a GE HealthCare system. From the simplified ordering process to coordinated delivery and install, we offer a onestop shop that makes it simple and easy for the customer.

Couchtop positioning

The CQ Medical Couchtops are designed to fit multiple GE HealthCare global tables and on most tables, it will be shorter than the cradle. Position the couchtop per the Users Manual.

3000 Series Overlays

- Economical radiation removable couchtop with 14 cm indexing
- Compatible with RGSC and RPM camera mount
- Not compatible with Varian VCD mount

Catalog # E8505MJ

Table compatibility: GT 1700, GT 2000, GT 2000X, NG table, GT PET

Dimensions (L x W x H): 2175 x 530 x 74 mm (85.63 x 20.87 x 2.93 in)

Catalog # E8505MF

Table compatibility: H-Power (long)

Dimensions (L x W x H): 2661 x 530 x 72 mm (104.75 x 20.87 x 2.83 in)

Cat#	Description	Warranty
E8505MJ	CQ Medical CT Overlay for GE HealthCare CT & PET/CT systems, (2175 x 530 x 74 mm (85.63 x 20.87 x 2.93 in); features Prodigy indexing and includes Prodigy Lok-Bar (53 cm) and 1 year manufacturer warranty	L
E8505MF	CQ Medical CT Overlay for GE HealthCare PET/CT systems with H-Power table, (2661 x 530 x 72 mm (104.75 x 20.87 x 2.83 in)); features Interloc indexing and includes Interloc Lok-Bar (48 cm) and 1 year manufacturer warranty	L

Compatibility: See the Reference Table on page 25

6000 Series

The CQ Medical Universal Couchtop 1 Piece is an excellent IGRT and SBRT solution with a uniform design and no junctions. This couchtop offers a dosimetrically matched couchtop for most major CT and Linac models.

- No extension or seams
- Low attenuation and surface dose
- Economic option for facilities with multiple linear accelerators and CTs
- Allows for attachment of Body Pro-Lok ONE SBRT bridges and accessories for SBRT Immobilization
- No overlays required when using Body Pro-Lok ONE SBRT. Overlays required for thermoplastic devices
- Clear scanning area is 50.02 in (1270 mm) length portion of the couchtop

Catalog # E8516AA

Table compatibility: GT 1700

Dimensions (L x W x H): 2198 x 530 x 50 mm (86.53 x 20.87 x 1.97 in)

Catalog # E8516AC

Table compatibility: GT 2000

Dimensions (L x W x H): 2452 x 530 x 50 mm (96.53 x 20.87 x 1.97 in)

Cat#	Description	Warranty
E8516AA	CQ Medical Universal Couchtop 1 Piece, for GT1700 table; (2198 x 530 x 50 mm (86.53 x 20.87 x 1.97 in); includes carbon fiber indexable couchtop, mounting hardware, Prodigy 2 Lok-Bar and 5-year manufacture warranty	ZZ
E8516AC	CQ Medical Universal Couchtop 1 Piece, for GT2000 table; (2452 x 530 x 50 mm (96.53 x 20.87 x 1.97 in); includes carbon fiber indexable couchtop, mounting hardware, Prodigy 2 Lok-Bar and 5-year manufacture warranty	ZZ
Compatibility: See the Reference Table on page 25		

6000 Series

The UCT LE (Universal Couchtop Long Extension) is a comprehensive solution for enabling advanced treatments in your clinic. Specifically designed to answer the demands of IGRT delivery, the CQ Medical LE contains no rails or junctions in the treatment area to help facilitate better dose delivery and target coverage. This couchtop is dosimetrically matched for most major CT and Linac models.

- Self-locking extension seam located outside of treatment field • Low attenuation and surface dose
- Allows for attachment of Body Pro-Lok ONESBRT bridges and accessories for SBRT Immobilization
- No overlays required when using Body Pro-Lok ONE SBRT or thermoplastic devices
- Clear scanning area is 47.14 in (1197 mm) length portion of the couchtop

Catalog # E8516AB

Table compatibility: GT 1700

Dimensions (L x W x H): 2198 x 530 x 50 mm (86.25 x 20.87 x 1.97 in)

Catalog # E8516AD

Table compatibility: GT 2000

Dimensions (L x W x H): 2452 x 530 x 50 mm (96.25 x 20.87 x 1.97 in)

Cat#	Description	Warranty
E8516AB	CQ Medical UCT LE (Universal Couchtop Long Extension), for GT1700 table; (2198 x 530 x 50 mm (86.25 x 20.87 x 1.97 in); includes carbon fiber base with carbon fiber rectangle extension, mounting hardware, Prodigy™ 2 Lok-Bar, Storage Rack and 5-year manufacture warranty	ZZ
E8516AD	CQ Medical UCT LE (Universal Couchtop Long Extension), for GT2000 table; (2452 x 530 x 50 mm (96.25 x 20.87 x 1.97 in); includes carbon fiber base with carbon fiber rectangle extension, mounting hardware, Prodigy™ 2 Lok-Bar, Storage Rack and 5-year manufacture warranty	ZZ
Compatibility: See the Reference Table on page 25		

See page CT 24 for optional extensions available.

CQ Medical Quantum Series Couchtop

Create a flat, indexed surface ready for RT simulation. Quantum is thinner and lighter than most other indexed CT overlays. This ultra thin profile increases usable bore space with Varian Exact indexing.

An array of white fiducial markers is placed down the center of the couch. The markers are located in line with the center of each indexing notch. A second array of fiducial markers are offset laterally to designate the superior or inferior location of the markers in relation to the indexing origin. This makes it easy to identify the indexing locatioin on your image.

- Quickly ensures treatment couch is in the same position as the simulation couch – every time
- Enables more accurate and faster workflows
- Virtual Indexing is available on most couchtops, CT overlays, and many devices

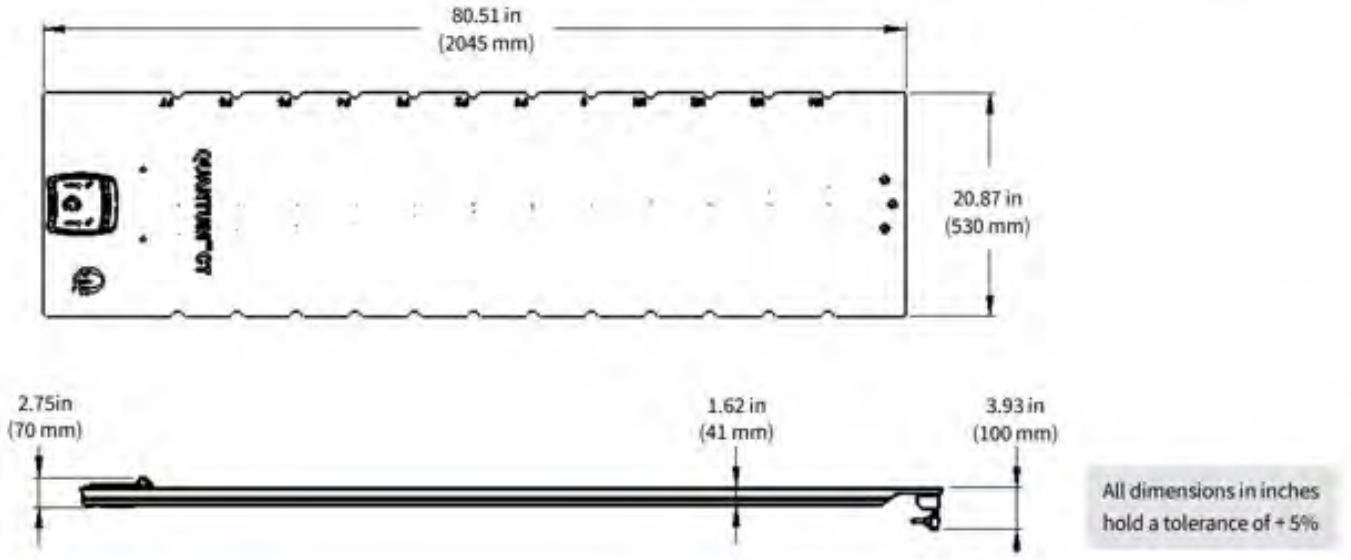

Catalog # E6401JB

Table compatibility: GT 1700, GT 2000,GT 2000 X, NG 1700, NG 2000

Dimensions (L x W x H): 2045 x 530 x 70 mm (80.51 x 20.87 x 2.75 in)

Indexing: Varian Exact, 14 cm spacing

Weight: 9.7 kg (21.5 lbs)

Available in U.S. only.

Cat#	Description
E6401JB	CQ Medical CT Overlay for GE HealthCare CT systems, (2045 x 530 x 70 mm); features Prodigy indexing and includes Varian exact indexing and includes two CQ Medical Locating Bars and 1 year manufacturer warranty. Includes Indexable carbon fiber couchtop, mounting hardware, two CQ Medical Locating Bar's.

Compatibility: See the Reference Table on page 25

CQ Medical® UCT LE Optional Extensions

Full flexibility with many extension options to help facilitate patient imaging, simulation and treatment. These extensions feature a unique profile allowing for direct attachment of all CQ Medical Body Pro-Lok SBRT bridges, Solstice™ and trUpoint ARCH™ SRS/SRT Systems, and head & neck thermoplastics.

Wired Rectangular

- An embedded wire rectangular extension option is available to assist with patient alignment. The standard rectangular extension is provided in the GE HealthCare offering

Red lines in image shows wire location.

Type-S™

Compatible with Solstice™ SRS System, Fiberplast® and Aquaplast RT™ thermoplastics, including ClearVision™ and Assure™ Open View masks designed for use with optical tracking systems.

Posifix®

Compatible with Solstice SRS System and Fiberplast, Aquaplast RT and Posicast® thermoplastics, including Assure Open View masks designed for use with optical tracking systems.

ProForm™

Unique head & neck patient immobilization solution for proton or photon treatment. Pediatric option available

Grid

Helps minimize surface dose and skin reactions

UCT Head

Extends the patient an additional 17 cm

End Plates for Varian

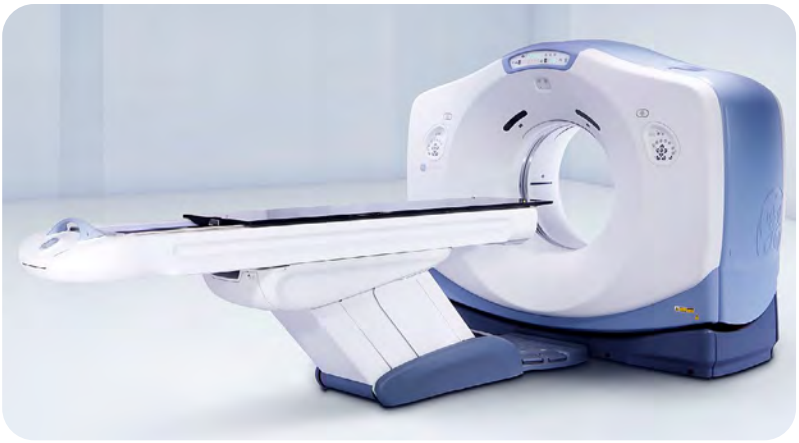

Allow the use of various QA devices

Diacor Flat Tabletop

- The Flat Tabletop, or “CT Overlay,” provides a secure, flat surface for CT Simulation applications, consistent with the treatment couch, for accurate and reproducible patient positioning
- Varian Exact technology and indexing immobilization patient positioning system along entire length of the overlay
- Carbon fiber construction with foam core provides a durable, lightweight device with outstanding imaging properties
- Easily locks and unlocks from the CT Table, providing easy transition between therapy and diagnostic procedures
- Measures 85.25 in (L) × 20.87 in (W) × 1.62 in (H)

CT Guided Intervention

IMACTIS® CT-Navigation™

CT-Navigation is a guiding and tracking stereotactic solution for percutaneous CT-guided Interventional Radiology. It displays simulated images on a computer screen of the interventional instrument while also displaying images of the targeted organ(s) allowing the user to anticipate the instrument's trajectory.

Everything you need to get started

- CT-Navigation stand-alone workstation
- CT-Navigation software
- 24 in touch screen
- Application setting
- User documentation
- Mobile cart
- Black pelican case
- 10 NaviKits
- Initial 3-day, in-person customer training

NaviKit

NaviKit is a single-use kit dedicated for percutaneous interventions performed with IMACTIS CT-Navigation. It is used with a non-sterile needle holder for planning.

- Offered in quantity of 5 or 25 Navikits/box

E85101LE/LG

Training/Demonstration phantom

Dedicated phantom for training and demonstration use with IMACTIS CT-Navigation.

INVIA 4DM software

4DM quantifies perfusion and function. In simplified terms, 4DM assigns values to parts of the heart based on how much blood the heart muscle retains at rest vs stress — perfusion — and how well the heart expands and contracts at rest vs stress — function.

This quantification enables physicians to assess a patient's cardiac health by reviewing patient images and 4DM values all in a single, convenient, and configurable application. Integrated reporting — within 4DM or with your PACS platform — further streamlines the workflow.

4DM fits seamlessly into your current nuclear imaging workflow, receiving data from PET and SPECT cameras and exporting to PACS and EMRs.

- Nuclear Cardiology Perfusion, Function, and viability quantification
- Planar and SPECT Blood Pool quantification
- Supported patient data
  - Nuclear Medicine: Static, Gated, Dynamic, Whole Body
  - SPECT Perfusion: Tomo, Recon Tomo, Gated Tomo, Gated Recon Tomo, Dynamic (SA, HLA, VLA, Transverse)
  - SPECT MUGA: Gated Tomo, Gated Recon Tomo (SA, HLA, VLA, Transverse)
  - 8 and 24-bit DICOM static and multi-frame screen captures
- Normal databases
  - SPECT protocol databases: One and 2-day Tc-99m, Dual Isotope (Tc-99m and Tl-201), Tl-201 Stress/Rest/Redistribution
  - Camera Specific SPECT Databases (C.CAM, C.Clear, Profile AC, Symbia AC, IQ•SPECT, cardiusx•act, 530C, D-SPECT, Astonish AC)
  - Iterative Reconstruction for SPECT (Astonish, Evolution, Flash3D, and nSPEED)
  - User-defined database generation and editing
- 1 day onsite training
- Training available in English and French languages only

E8510EC	INVIA 4DM standalone software for PET/CT camera plus MFR quantification

CT

Optellum Virtual Nodule Clinic with Lung Cancer Prediction

World's first and only AI-based lung cancer clinical solution for early lung cancer diagnosis which supports:

- Nurse navigators and pulmonologists with automated identification, management and tracking of patients with reported nodules using Natural Language Processing (NLP) based patient discovery AI
- Pulmonologists with optimal clinical decisions driving earlier cancer treatment and fewer invasive procedures on benign nodules

Lung Cancer Prediction AI is a "radiomics"-based digital biomarker which computes a nodule malignancy score from a CT image.

How it works

Patient discovery AI uses natural language processing (NLP) to automatically identify patients with incidentally detected nodules from radiology reports.

Patients with lung nodules are presented in Virtual Nodule Clinic for clinicians to schedule follow-up.

Virtual Nodule Clinic automatically builds timeline, with prior CTs and reports.

Physician clicks on a suspicious nodule, all marked nodules are longitudinally tracked.

The Optellum™ AI computes a Lung Cancer Prediction (LCP) score from the CT image.

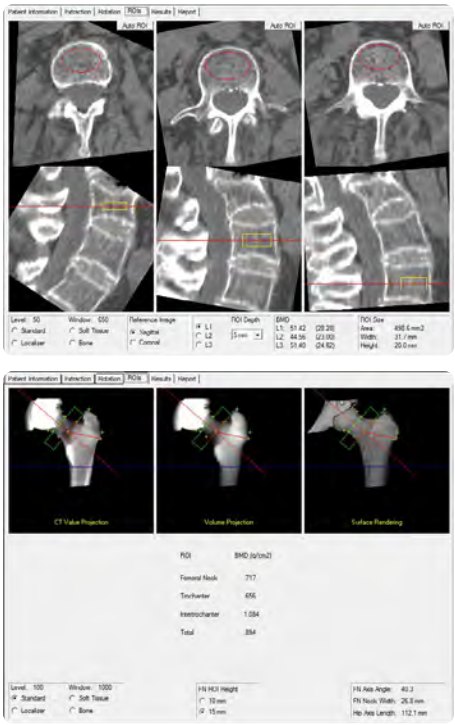

Physician diagnosis and recommended treatment is informed by the power of AI.

Mindways QCT PRO™ Spine and Hip BMD System

Features/Benefits:

- Complete Spine and Hip QCT BMD system
- 3D Volumetric Spine module isolates and measures only trabecular bone for high sensitivity, and early detection of bone loss and theraputic response
- CTXA-Hip module produces DXA-equivalent hip measurements
- QCT PRO framework manages the patient database, quality control administration, and report generation
- All BMD results are provided as printed, color reports, and can be exported to PACS
- One set of software can support multiple CT scanners
- Package Includes:
- Software with User's Guide
- New Solid QA and Calibration Phantoms and accessories
- SlicePick for extracting a subset of images from a larger data set (e.g. an abdomen CT)
- One day, on-site installation and training

CC TV System

Closed Circuit TV System

This closed-circuit TV camera package allows for visual monitoring of your patients during their scans and now features an optional integrated recording feature for high-risk patients and for security purposes. Ceiling or wall mounted fixed camera is unobtrusive and transmits high-quality color images in real time to the operator's console where a 17 in TFT LCD monitor is located. A dual camera system is also available allowing split-screen viewing by the technologists to see both the front and back sides of the bore simultaneously.

CC TV System includes:

- 17 in TFT LCD color monitor
- Compact color camera(s) with lens
- Signal interface box
- Exterior-mount power supply
- Mounting brackets for camera(s)
- Set of 3 cables: 10 ft, 40 ft, 100 ft
- Remote control

Phantoms

CT Performance Phantom

- Measures 9 separate performance parameters with just 1 device
- Permits the routine standardization of alignment, beam width, special uniformity, linearity/contrast, spatial resolution, linespread, noise, size independence and absorbed dose
- All components of the phantom are housed in a compact, transparent tank which holds the system together in the correct orientation
- Measures 15 in (L) x 8.5 in (W)

Slickers and Equipment Covers

Table and Footswitch Slickers

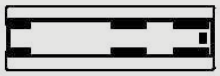

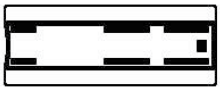

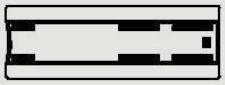

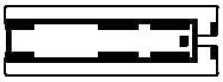

- A slicker cushion is foam material (2.54 cm/1 in thick) fully encased in a protective vinyl slicker cover
- A slicker cover is a vinyl cover made to fit an existing table pad
- Easy to install and comfortable for patients
- Will not interfere with normal operation of the table
- Clear PVC plastic facilitates faster cleanup of blood and fluids
- Prevents contaminate buildup in hard to clean areas
- Thermosealed seams and flaps
- Footswitch slickers and table skirts help protect electronics
- Footswitch slicker includes Velcro® for secure fit

See pages CT 33-35 for Slicker Reference Guides.

Sterile Covers for CT

Sterile Covers for CT Interventional Procedures

Soft, clear, sterile polyethylene covers help protect equipment from fluid contamination during CT interventional procedures.

- Sterile Starter Kit includes the following items for each procedure, 15 procedures per case:
- (1) remote control cover (8.4 × 83.8 cm) with clips to secure cover to cord
- (1) hand control cover (8.4 × 83.8 cm) with clips and attached latex bands for securing hand control to physician's arm for greater mobility
- (2) CT rail covers (38.1 × 76.2 cm) w/6 tape pieces for securing. Slip cover allows cover to be slid around control bracket, then taped together
- (1) monitor handle cover (21 × 8.9 cm) for sterile adjustment of CT monitor, fastens to handle with attached adhesive strip
- (2) hand grip/remote control covers (10.2 × 25.4 cm) with latex bands for securing to hand grip

E8003CF

Cat#	Description	Warranty
E8003CF	Patient Positioning Wedge Kit – 12 pads	H

Patient Arm Support

- Recommended for Single Head Imaging Systems
- Technician designed, patient tested
- Comfortably supports a patient's arms during various diagnostic and therapeutic medical procedure
- Engineered with maximum flexibility to fit most imaging tables
- Improves productity
- Increases technician efficncy
- Two disposable pillows, two mounting straps and one hand held strap are included
- Dimensions: 21'' W x 13'' D x 9'' H

E8500NA

Cat#	Description	Warranty
E8500NA	Butterfly Armrest for Molecular Imaging	H

Patient Arm and Leg Rests

- Patient arm rest has been developed to prevent arm and shoulder pain and also to reduce related motion artefact that commonly occurs during supine imaging.
- Patient leg rest has been developed to prevent low back stress and pain that occurs during supine imaging

Features

- Padded armrest combines total arm support and passive restraint, increasing patient comfort during extended procedures
- Designed to accommodate virtually all patients
- Compatible with most Nuclear Imaging systems and can also be used in MRI, CT, and PET applications
- Constructed with a comfortable, full support polyfoam with a seamless coated finish

Specifications

- Velcro-mounted, easily cleaned
- Arm rest: Width: 48 cm
- Leg rest: H 17.8 x D 43.2 x W 33 cm

E8500NB/NC

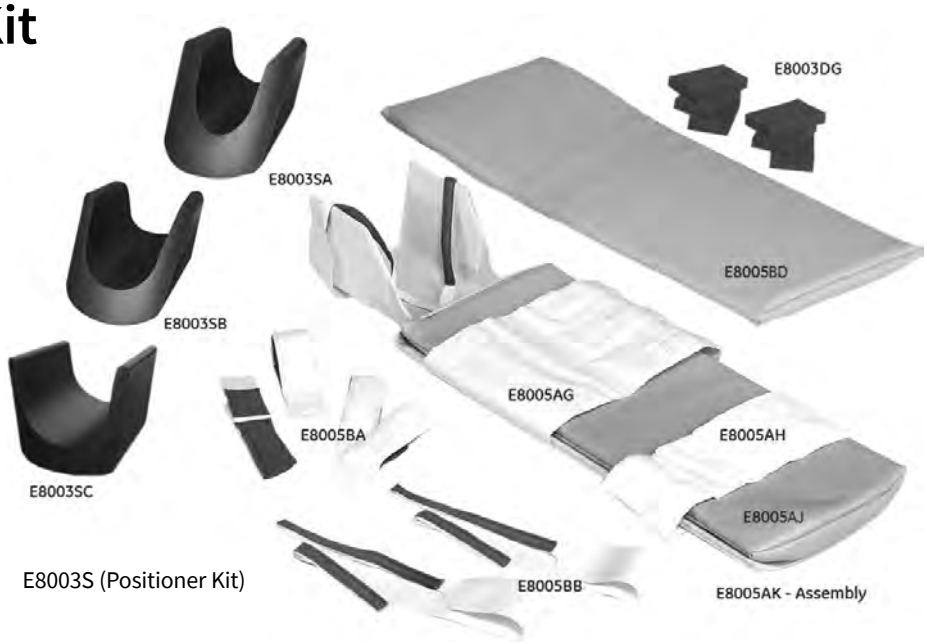

Cat#	Description	Warranty
E8500NB	Patient Arm Rest	H
E8500NC	Patient Leg Rest	H
E8500PC	Three Piece Patient Leg Rest Set	H

CT Child Positioner Kit

- Designed for ease of use and enhanced patient comfort, while still helping to reduce body motions during supine studies
- Diagnostic images and staff efficiency may be improved because the child's entire body is restrained
- By reducing body motion and the need for retakes, it may also help to reduce patient exposure
- Replacement pieces also sold separately

Complete kit (E8003S) includes:

- (1) child positioner assembly (cradle only)
- (1) child positioner pad
- (3) sizes of child positioner head cushions
- (1) wide body strap – 10 in (W) x 39 in (L)
- (1) narrow body strap – 5 in (W) x 39 in (L)
- (4) wrist straps
- (3) head straps
- (6) foam sponges
- (1) thick cradle pad

E8003S (Positioner Kit)

E8005BD*	Thick Cradle Pad for Children – Mist Gray	H
E8003DG	Foam Sponges for CT Axial Head Holder – 6/set	K
Compatibility: GE HealthCare CT systems that incorporate a curved tabletop		

* The E8005BD Thick Cradle Pad may be used with a standard table cradle.
This pad is not designed for use inside the Child Positioner Assembley (E8005AK).

Patient Transfer and Transport

Patient Transfer Boards

- Flexible patient transfer board – 3/16 in high density polyethylene
- Narrow transfer board 18.25 in (W) × 73 in (L) × 0.5 in (H), includes four 1.5 × 16 in security straps
- Wide transfer board 23 in (W) × 73 in (L) × 0.5 in (H), includes four 1.5 × 16 in security straps
- Transfer board hanger can hold up to 5 patient transfer boards, either wide or narrow or both; includes mounting hardware

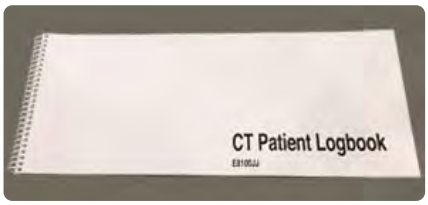

Cat#	Description	Warranty
E6328BF	Transfer Board Hanger	H
E6328BG	Transfer Board – Narrow	H
E6328BH	Transfer Board – Wide	H

Misc. Accessories

CT Logbooks

- The GE HealthCare CT Patient Logbook can be an effective way to track daily patient studies in the CT department
- Includes columns for date/time, patient information, clinical information, doctor/tech, contrast, scan information, exam number, archive media number and CT diagnosis
- Each logbook records 6 patients per page on 64 double-sided pages, for a total of 768 patients
- Five logbooks per box; sold per box

E8100JJ

Cat#	Description	Warranty
E8100JJ	CT Logbooks (5/box)	H

Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and under voltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.
- Configurations are available to support multi-modalities or even complete departments

Dynamic Sag Corrector

Dynamic Sag Corrector (DySC)

- Corrects for voltage sags at the system, department or facility level
- DySC is optimized for fast sag detection and response time (voltage detect time of 1 ms; sags are corrected with a peak voltage response time of 1.5 ms)
- A green power solution at > 99% energy efficiency, the DySC has no batteries and over time can offer lower cost of maintenance
- Smaller footprint and lighter weight than comparable (kVA) UPS systems
- Service Contracts offered by GE Healthcare

E4505SJ

Cat#	Description	Warranty
E4505SJ	200 Amp (166 kVA) ProDySC Dynamic Sag Corrector (without installation)	Y

Main Disconnect Panels

Main Disconnect Panels

- Main Disconnect Panels provide emergency shut down, undervoltage protection, overcurrent protection, OSHA lockout tag provisions, and serves as a local disconnect for the GE HealthCare Diagnostic Imaging System.
- Helps reduce installation time by providing a single-point power connection, eliminating the need to mount and wire a number of individual components
- Standardized design and testing helps ensure high product quality and system reliability
- UL and cUL listed for compliance with National Electric Code
- Surface or semi-flush mounting
- Please consult your GE HealthCare Field Engineer to determine if this is the appropriate product for your needs before purchasing

AC Lighting Controllers

AC Lighting Controllers

- "X-ray in Use" warning and room lighting control panel provides a low voltage interface between the "X-ray in Use" warning lights, interior room general lighting systems and the system
- Convenient, push on/off pre-wired footswitch for control of room general lighting
- Enhances servicing safety by the use of a low voltage interface circuit between the imaging system and the line voltage lighting system

GE HealthCare Adventure Series – Customized Rooms

The GE HealthCare Design team will work with a small group of your hospital staff to create a custom layout and select themed graphics from the existing catalogs, or at times, create new appliques that fit the space and flow of each room.

Shop online: U.S. – **ServiceShop.GEHealthCare.com**
Canada – **shop.gehealthcare.ca/gehcstorefront**

CT

In today's crowded markets, standing out and creating a unique patient experience can be a key to success. While Adventure Series provides a range of creative options to choose from, GE HealthCare understands that some discerning facilities desire something even more unique.

For those of you seeking a product experience custom tailored to you and your facility, we are pleased to offer you the ability to customize your Adventure Series room. GE HealthCare will work with you through the custom design process to create the experience you envision.

Adventure Series can be customized for the following spaces:

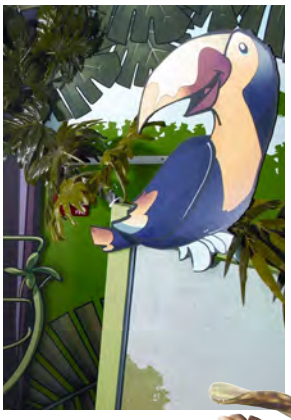

- Scan rooms
- Hallways
- Waiting rooms
- Uptake rooms
- Cafeterias
- Stress Lab
- Exam rooms

OMNIPAQUE™ (iohexol) injection, HCP Important Safety Information

WARNING: RISKS ASSOCIATED WITH INTRATHECAL ADMINISTRATION OF OMNIPAQUE INJECTION 140 mg IODINE/mL and 350 mg IODINE/mL

Use only the OMNIPAQUE iodine concentrations and presentations recommended for intrathecal procedure. Intrathecal administration of OMNIPAQUE of a wrong iodine concentration, even if inadvertent, may cause death, convulsions, seizures, cerebral hemorrhage, coma, paralysis, arachnoiditis, acute renal failure, cardiac arrest, rhabdomyolysis, hyperthermia, and brain edema.

INDICATIONS:

OMNIPAQUE is indicated for intrathecal procedures for:

- Myelography and computerized tomography myelography (lumbar, thoracic, cervical, total columnar) in adults and pediatric patients aged 2 weeks and older
- CT cisternography in adults and pediatric patients aged 2 weeks and older

OMNIPAQUE is indicated for intra-arterial procedures for:

- Cardiac ventriculography in adults and pediatric patients
- Aortography including studies of aorta and its branches in adults and pediatric patients
- Selective coronary arteriography in adults
- Cerebral arteriography in adults
- Peripheral arteriography in adults
- Intra-arterial digital subtraction angiography (IA-DSA) of the head, neck, abdominal, renal, and peripheral vessels in adults
- Pulmonary angiography in pediatric patients

OMNIPAQUE is indicated for intravenous procedures for:

- Excretory urography in adults and pediatric patients
- CT of the head and body in adults and pediatric patients
- Peripheral venography (phlebography) in adults
- Intravenous digital subtraction angiography (IV-DSA) of the head, neck, abdominal, renal, and peripheral vessels in adults

OMNIPAQUE is indicated for oral or rectal procedures for:

- Radiographic examination of the gastrointestinal tract by oral administration in adult patients and by oral or rectal administration in pediatric patients
- CT of the abdomen and pelvis by oral administration in adults and pediatric patients in conjunction with intravenous administration of OMNIPAQUE

OMNIPAQUE is indicated for intraarticular procedures for:

- Arthrography in adults

OMNIPAQUE is indicated for body cavity procedures for:

- Endoscopic retrograde pancreatography and cholangiopancreatography in adults
- Herniography in adults
- Hysterosalpingography in adults
- Voiding cystourethrography in pediatric patients

Specific dosage forms, concentrations and presentations of OMNIPAQUE are recommended for each type of imaging procedure. See dosing and administration in the prescribing information.

CONTRAINDICATIONS:

OMNIPAQUE for hysterosalpingography is contraindicated during pregnancy or suspected pregnancy, menstruation or when menstruation is imminent, within 6 months after termination of pregnancy, within 30 days after conization or curettage, when signs of infection are present in any portion of the genital tract including the external genitalia, and when reproductive tract neoplasia is known or suspected because of the risk of peritoneal spread of neoplasm.

WARNINGS AND PRECAUTIONS:

Risks Associated with Intrathecal Administration of OMNIPAQUE injection 140 mg iodine/mL and 350mg iodine/mL: Use only the iodine concentrations and presentations recommended for intrathecal procedures. See Boxed Warning

Risks Associated with Parenteral Administration of OMNIPAQUE Oral Solution: For oral use only. Adverse reactions such as hemolysis may occur if OMNIPAQUE is administered intravenously or intraarterially due to low osmolality.

Hypersensitivity Reactions: OMNIPAQUE can cause life-threating or fatal hypersensitivity reactions including anaphylaxis. Most severe reactions develop shortly after the start of the injection (within 1 to 3 minutes), but delayed reactions can also occur. There is an increased risk in patients with a history of a previous reaction to contrast agent and known allergic disorders or other hypersensitivities. Premedication with antihistamines or corticosteroids does not prevent serious life-threatening reactions but may reduce both incidence and severity.

Acute Kidney Injury: Acute kidney injury, including renal failure, may occur after parenteral administration of OMNIPAQUE. Risk factors include pre-existing renal impairment, dehydration, diabetes mellitus, congestive heart failure, advanced vascular disease, elderly age, concomitant use of nephrotoxic or diuretic medications, multiple myeloma/paraproteinaceous diseases, repetitive and/or large doses of an iodinated contrast agent. Use lowest dose in patients with renal impairment. Adequately hydrate patients prior to administration and do not use laxatives, diuretics, or preparatory dehydration prior to OMNIPAQUE administration.

Cardiovascular Adverse Reactions: Life-threatening or fatal cardiovascular reactions including hypotension, shock, cardiac arrest have occurred with the parenteral administration of OMNIPAQUE. Most deaths occur during the injection or 5-10 minutes later, with cardiovascular disease as the main aggravating factor. Use the lowest dose necessary in patients with congestive heart failure and have resuscitation equipment and trained personnel available.

Thromboembolic Events: Serious, rarely fatal, thromboembolic events causing myocardial infarction and stroke can occur during angiocardiography procedures with iodinated contrast agents. Risk factors for thromboembolic events include: length of procedure, catheter and syringe material, underlying disease state, and concomitant medications. Use meticulous angiographic techniques and minimize length of procedures to minimize events. Avoid blood remaining in contact with syringes containing OMNIPAQUE and avoid angiocardiography in patients with homocystinuria.

Extravasation and Injection Site Reactions: Extravasation of OMNIPAQUE during intravenous or intra-arterial injection may cause tissue necrosis and/or compartment syndrome, particularly in patients with severe arterial or venous disease. Ensure correct placement and monitor patients for extravasation.

Thyroid Storm in Patients with Hyperthyroidism: Thyroid storm has occurred after the intravenous or intra-arterial use of iodinated contrast agents in patients with hyperthyroidism, or with an autonomously functioning thyroid nodule. Evaluate the risk in these patients before use of OMNIPAQUE.

Thyroid Dysfunction in Pediatric Patients 0 to 3 Years of Age: Thyroid dysfunction characterized by hypothyroidism or transient thyroid suppression has been reported after both single exposure and multiple exposures to iodinated contrast media.

Hypertensive Crisis in Patients with Pheochromocytoma: Hypertensive crisis has occurred after the use of iodinated contrast agents in patients with pheochromocytoma. Monitor patients when administering OMNIPAQUE intravenously or intra-arterially. Use the minimum amount of contrast necessary and monitor blood pressure throughout the procedure.

Sickle Cell Crisis in Patients with Sickle Cell Disease: Iodinated contrast agents when administered intravenously or intra-arterially may promote sickling in individuals who have sickle cell disease. Hydrate patient prior to and following OMNIPAQUE administration and use OMNIPAQUE only if the necessary imaging cannot be obtained with alternative imaging modalities.

Severe Cutaneous Adverse Reactions: Severe cutaneous adverse reactions may develop from 1 hour to several weeks after intravenous or intra-arterial contrast agent administration. These reactions include Stevens-Johnson syndrome and toxic epidermal necrolysis, acute generalized exanthematous pustulosis and drug reaction with eosinophilia and systemic symptoms. Reaction severity may increase and time to onset my decrease with repeat administration of contrast agents. Prophylactic medications may not prevent or mitigate severe cutaneous adverse reactions. Avoid administering to patients with a history of severe cutaneous reactions.

Interference with Laboratory Test: OMNIPAQUE can interfere with protein-bound iodine test.

Increased Risk of Seizures with Intrathecal Procedures: Focal and generalized motor seizures have been reported after intrathecal use of iodinated contrast agents. Use of medications that may lower the seizure threshold should be carefully evaluated. Consider discontinuing these agents at least 48 hours before and at least 24 hours following intrathecal administration of OMNIPAQUE.

Most Common Adverse Reactions

Intrathecal Administration: In clinical trials ≥1% of 1,531 adult patients included: headaches, pain (including backache, neckache, stiffness, and neuralgia), nausea, vomiting and dizziness. In clinical trials ≥1% of 152 pediatric patients included headache, vomiting and backache.

Intra-arterial or Intravenous Administration: In clinical trials ≥1% of 1,485 adult patients included arrhythmias (including PVCs and PACs), pain, vision abnormalities (including blurred vision and photomas), taste perversion and nausea. In clinical trials ≥1% of 391 pediatric patients included vomiting and nausea.

Oral or Rectal Administration for Examination of the Gastrointestinal Tract: In clinical trials ≥1% of 54 adult patients included diarrhea, nausea, vomiting, abdominal pain, flatulence and headache. In clinical trials ≥1% of 58 pediatric patients included diarrhea, vomiting, nausea, abdominal pain, fever, urticaria and hypotension.

Oral Administration for CT of the Abdomen in Conjunction with Intravenous Administration: In clinical trials ≥1% of 44 adults patients included a single report of vomiting. In clinical trials ≥1% of 69 pediatric patients included a single report of vomiting.

Intraarticular Administration: In clinical trials ≥1% of 285 adult patients included administration site pain, swelling and heat.

Body Cavity Use: No new adverse reactions were associated with the use of OMNIPAQUE in 51 pediatric patients.

Drug-Drug Interactions:

- In patients with renal impairment, metformin can cause lactic acidosis.
- OMNIPAQUE may interfere with thyroid uptake of radioactive iodine and decrease therapeutic and diagnostic efficacy. Avoid thyroid therapy or testing for up to 6 weeks post OMNIPAQUE.

Pregnancy and Lactation:

- There are no data with iohexol use in pregnant women. Published literature report intravenously iohexol crosses the placenta and is visualized in the digestive tract of exposed infants after birth.
- Published literature reports that breast feeding after intravenous iohexol administration to the mother would result in the infant receiving an oral dose of approximately 0.7% of the maternal intravenous dose. Lactating women may consider pumping and discarding breast milk for 10 hours after OMNIPAQUE administration to minimize drug exposure to the breastfed infant.

Please Click Here to see the full Prescribing Information, including boxed warning and additional Important Safety Information

To report SUSPECTED ADVERSE REACTIONS, contact GE HealthCare at 800 654 0118 (option 2, then option 1) or the FDA at 800 FDA 1088 or www.fda.gov/medwatch.

Product Indications and Important Safety Information – VISIPAQUE – 04/2023

INDICATIONS AND USE – VISIPAQUE™ (IODIXANOL) INJECTION

Intra-Arterial Procedures

Adult and pediatric patients 12 years of age and older: Intra-arterial digital subtraction angiography (270 and 320 mg iodine/mL); angiocardiography (left ventriculography and selective coronary arteriography), peripheral arteriography, visceral arteriography, and cerebral arteriography (320 mg iodine/mL). Pediatric patients less than 12 years of age: Angiocardiography, cerebral arteriography, and visceral arteriography (320 mg iodine/mL)

Intravenous Procedures

Adult and pediatric patients 12 years of age and older: Computed tomography (CT) imaging of the head and body (270 and 320 mg iodine/mL); excretory urography (270 and 320 mg iodine/mL); peripheral venography (270 mg iodine/mL); coronary computed tomography angiography (CCTA) to assist in the diagnostic evaluation of patients with suspected coronary artery disease (320 mg iodine/mL).

Pediatric patients less than 12 years of age: CT imaging of the head and body (270 mg iodine/mL); excretory urography (270 mg iodine/mL)

IMPORTANT SAFETY INFORMATION FOR VISIPAQUE (iodixanol) INJECTION

WARNING: NOT FOR INTRATHECAL USE

Inadvertent intrathecal administration may cause death, convulsions/ seizures, cerebral hemorrhage, coma, paralysis, arachnoiditis, acute renal failure, cardiac arrest, rhabdomyolysis, hyperthermia, and brain edema.

CONTRAINDICATION:

Visipaque injection is contraindicated for intrathecal use.

WARNINGS AND PRECAUTIONS:

- **Hypersensitivity Reactions:** Life-threatening or fatal reactions can occur. Most severe reactions develop shortly after the start of the injection, but reactions can occur up to hours later. Always have emergency equipment and trained personnel available.
- **Contrast-Induced Acute Kidney Injury:** Acute injury including renal failure can occur. Minimize dose and maintain adequate hydration to minimize risk.
- **Cardiovascular Adverse Reactions:** Life-threatening or fatal cardiovascular reactions, including hypotension, shock, and cardiac arrest have occurred with the use of Visipaque. Most deaths occur during injection or five to ten minutes later, with cardiovascular disease as the main aggravating factor. Use the lowest necessary dose of Visipaque in patients with congestive heart failure.
- **Thromboembolic Events:** Serious, rarely fatal, thromboembolic events causing myocardial infarction and stroke can occur during angiocardiography procedures with both ionic and nonionic contrast agents.
- **Extravasation and Injection Site Reactions:** Extravasation of Visipaque injection may cause tissue necrosis and/or compartment syndrome, particularly in patients with severe arterial or venous disease. Ensure intravascular placement of catheters prior to injection.
- **Thyroid Storm in Patients with Hyperthyroidism:** Thyroid storm has occurred after the intravascular use of iodinated contrast agents in patients with hyperthyroidism, or with an autonomously functioning thyroid nodule.
- **Thyroid Dysfunction in Pediatric Patients 0 to 3 Years of Age:** Thyroid dysfunction characterized by hypothyroidism or transient thyroid suppression has been reported after both single exposure and multiple exposures to iodinated contrast media (ICM) in patients 0 to 3 years of age.
- **Hypertensive Crisis in Patients with Pheochromocytoma:** Hypertensive crisis has occurred after the use of iodinated contrast agents in patients with pheochromocytoma. Inject the minimum amount of contrast necessary, assess the blood pressure throughout the procedure, and have measures for treatment of a hypertensive crisis readily available.
- **Sickle Cell Crisis in Patients with Sickle Cell Disease:** Iodinated contrast agents when administered intravascularly may promote sickling in individuals who are homozygous for sickle cell disease.
- **Severe Cutaneous Adverse Reactions (SCAR):** SCAR may develop from one hour to several weeks after intravascular contrast agent administration. These reactions include Stevens-Johnson syndrome and toxic epidermal necrolysis (SJS/TEN), acute generalized exanthematous pustulosis (AGEP), and drug reaction with eosinophilia and systemic symptoms (DRESS). Avoid administering Visipaque to patients with a history of a SCAR to Visipaque.

USE IN SPECIFIC POPULATIONS:

- **Pediatric Use:** Pediatric patients at high risk of adverse reactions during and after administration of contrast agents include those with asthma, hypersensitivity to other medication and/or allergens, cyanotic and acyanotic heart disease, chronic heart failure, or a serum creatinine >1.5 mg/dL. Patients with immature renal function or dehydration may be at increased risk due to prolonged elimination of iodinated contrast agents.
- **Geriatric Use:** While no overall differences in safety or effectiveness were observed in patients >65 years, greater sensitivity regarding some older individuals cannot be ruled out.

ADVERSE REACTIONS:

- Serious, life-threatening, and fatal reactions, mostly of cardiovascular origin, have been associated with the administration of iodine-containing contrast agents, including Visipaque Injection.
- Most common adverse reactions (incidence greater than 0.5%) in adult patients after Visipaque injection: Discomfort, warmth, pain; Cardiovascular: angina. Gastrointestinal: diarrhea, nausea, vomiting. Nervous System: agitation, anxiety, insomnia, nervousness, dizziness, headache, migraine, unusual skin sensations, sensory disturbance, fainting, sensation of spinning. Skin: itchy rash, severe itching, hives. Special Senses: Smell, taste, and vision alteration. Pediatric patients experienced similar adverse reactions.

DRUG-DRUG INTERACTIONS:

- **Metformin:** In patients with renal impairment, metformin can cause lactic acidosis. Iodinated contrast agents appear to increase the risk of metformin-induced lactic acidosis, possibly as a result of worsening renal function. Stop metformin at the time of, or prior to, Visipaque administration in patients with an eGFR between 30 and 60 mL/min/1.73 m2; in patients with a history of hepatic impairment, alcoholism or heart failure; or in patients who will be administered intra-arterial iodinated contrast. Re-evaluate eGFR 48 hours after the imaging procedure and reinstitute metformin only after renal function is stable.
- **Radioactive Iodine:** Administration of iodinated contrast agents may interfere with thyroid uptake of radioactive iodine (I-131 and I-123) and decrease therapeutic and diagnostic efficacy in patients with carcinoma of the thyroid. The decrease in efficacy lasts 6 to 8 weeks.
- **Beta-adrenergic Blocking Agents:** The use of beta-adrenergic blocking agents lowers the threshold for and increases the severity of contrast reactions and the responsiveness of treatment of hypersensitivity reactions with epinephrine. Because of the risk of hypersensitivity reactions, use caution when administering Visipaque to patients taking beta-blockers.
- **Oral Cholecystographic Contrast Agents:** Renal toxicity has been reported in patients with liver dysfunction who were given an oral cholecystographic agent followed by intravascular iodinated contrast agents. Postpone the administration of Visipaque in patients who have recently received an oral cholecystographic agent.

Please Click Here to see the full Prescribing Information, including Boxed Warning for additional important safety information.

To report SUSPECTED ADVERSE REACTIONS, contact GE HealthCare at 800 654 0118 (option 2, then option 1), or the FDA at 800 FDA 1088 or www.fda.gov/medwatch.

VISIPAQUE™
(IODIXANOL) INJECTION

Canada

Product Indications and Clinical Use – Omnipaque™ (iohexol injection USP)

Adults: Subarachnoid: Omnipaque 240 (iohexol 240 mg I/mL) and Omnipaque 300 (iohexol 300 mg I/mL) are indicated for subarachnoid administration in adults for lumbar, thoracic, cervical and total columnar myelography. Delayed CT scans of the spinal subarachnoid space and of the intracranial CSF spaces may be obtained at the appropriate time following myelography, taking advantage of delayed opacification by the physiological cephalad circulation of the opacified CSF. Intravascular: Omnipaque 350 (iohexol 350 mg I/mL) is indicated in adults for left ventriculography, coronary arteriography, intravenous contrast enhancement for computed tomographic head and body imaging, peripheral arteriography, excretory urography, and intravenous digital subtraction arteriography. Omnipaque 300 (iohexol 300 mg I/mL) is indicated in adults for cerebral arteriography, intravenous contrast enhancement for computed tomographic head and body imaging, peripheral arteriography, peripheral venography, and excretory urography. Omnipaque 240 (iohexol 240 mg I/mL) is indicated in adults for intravenous contrast enhancement in computed tomographic head imaging, and for peripheral venography. Arthrography: Omnipaque 300 (iohexol 300 mg I/mL) or Omnipaque 240 (iohexol 240 mg I/mL) is recommended in adults for arthrography of the knee joint. Omnipaque 300 (iohexol 300 mg I/mL) is recommended for arthrography of the shoulder joint in adults. Oral: Omnipaque 300 and Omnipaque 350 are indicated in adults for oral administration for radiographic imaging of the gastrointestinal tract (including esophagus, stomach, small bowel and colon). Omnipaque 240, Omnipaque 300 and Omnipaque 350 diluted to 6 to 9 mg I/mL are indicated for oral administration in adults for CT of the abdomen and pelvis in conjunction with intravenous administration of Omnipaque.

Pediatrics: Intravascular: Omnipaque 350 (iohexol 350 mg I/mL) is indicated in children for angiocardiography. Omnipaque 300 (iohexol 300 mg I/mL) is indicated in children for excretory urography and may be used in infants for angiocardiography. Oral, Rectal, or by Enteric Tube: Omnipaque 240 and Omnipaque 300 are indicated for oral, rectal, or by enteric tube administration for radiographic imaging of the gastrointestinal tract (including esophagus, stomach, small bowel and colon). Omnipaque 240, Omnipaque 300 and Omnipaque 350 diluted to 9 to 29 mg I/mL are indicated for oral administration in children for CT of the abdomen and pelvis in conjunction with intravenous administration of Omnipaque.

CONTRAINDICATIONS

- Omnipaque (iohexol) is contraindicated in patients who are hypersensitive to this drug or to any ingredient in the formulation, including any non-medicinal ingredient, or component of the container.
- Omnipaque is contraindicated in patients with clinically significant impairment of both hepatic and renal function.

Serious Warnings and Precautions

- The possibility of hypersensitivity including serious, life-threatening, fatal anaphylactic/anaphylactoid reactions should always be considered. The majority of serious undesirable effects occur within the first 30 minutes. Late-onset (that is 1 hour or more after application) hypersensitivity reactions can occur. Patients should be observed for at least 30 minutes after administration of Omnipaque.
- Serious or fatal reactions have been associated with the administration of water-soluble contrast media. It is of utmost importance that a course of action be carefully planned in advance for immediate treatment of serious reactions, and that adequate facilities and appropriate personnel be readily available in case a severe reaction should occur.

- Concentration used: Use the recommended Omnipaque concentration for the particular procedure to be performed
- Caution is advised in patients with:
  - Sickle cell; fluid restriction is not advised in individuals who are homozygous for sickle cell disease
  - Multiple myeloma
  - Severe cardiovascular disease, hyperthyroidism, a history of bronchial asthma or other allergic manifestations, or sensitivity to iodine
  - Pheochromocytoma
  - Endotoxemia or elevated body temperature
- Elderly and pediatric patients may present a greater risk
- Thyroid dysfunction: Omnipaque, like all other iodinated contrast media, may induce changes in thyroid function in some patients. Transient hyperthyroidism or hypothyroidism has been reported following iodinated contrast media administration to adult and pediatric patients. Decreased levels of thyroxine (T4) and triiodothyronine (T3) and increased levels of TSH were reported after exposure to ICM in infants, especially preterm infants, which remained for up to a few weeks or more than a month. Hypothyroidism in infants may be harmful for growth and development, including mental development, and may require treatment
- Thyroid function should be checked in neonates following administration of iodinated contrast agents to mothers during pregnancy
- Contrast media-induced nephrotoxicity. Patients with pre-existing conditions that alter renal function are at increased risk
- Inaccurate thyroid function tests in the several weeks following radiopaque examination
- Potential for thyroid storm in patients with hyperthyroidism or autonomously functioning thyroid nodule
- Risk of severe adverse reactions in patients on adrenergic beta-blockers
- Risk of clinical deterioration, convulsions, and serious temporary or permanent neurological complications in patients with increased intracranial pressure, cerebral thrombosis or embolism, primary or metastatic cerebral lesions, subarachnoid hemorrhage, arterial spasm, transient ischemic attacks, and in any condition when the blood-brain barrier is breached or transit time of the contrast media through the cerebral vasculature is prolonged
- Caution in dose selection for patients with renal insufficiency
- Risk of acute renal failure in patients with pre-existing renal impairment, sepsis, hypotension, dehydration, advanced vascular disease, congestive heart disease, diabetes mellitus, multiple myeloma or other paraproteinacious diseases, the elderly with age-related renal impairment, and those on medications that alter renal function
- Patients should be adequately hydrated
- Safety and efficacy not established in pregnant women or those who are breastfeeding

Subarachnoid Use: Myelography should not be performed in the presence of infection; caution should be taken with patients on anticonvulsants and at risk of seizures.

Vascular Use: Serious thromboembolic events; patients with serum creatinine above 3 mg/dL; extreme caution with vasopressors; general anesthesia; metformin should be discontinued and withheld for 48 hours subsequent to the procedure and reinstituted only after renal function has been re-evaluated and found to be normal.

Prior to administration, please read the Product Monograph for Omnipaque and the Important Safety Information About Iodinated Contrast Media, which is available by calling Customer Service 1 800 387 7146 or through an email request to canadainfo@gehealthcare.com.

Reporting Side Effects

To report SUSPECTED ADVERSE REACTIONS, contact GE HealthCare at 1 800 654 0118 (option 2, then option 1), or email canadainfo@gehealthcare.com to request an adverse events form, or fax to 905 847 5849 to request an adverse events form.

Adverse reactions can also be reported to Health Canada as follows:

- Visiting the Web page on Adverse Reaction Reporting (https://www.canada.ca/en/health-canada/services/drugs-health-products/medeffect-canada.html) for information on how to report online, by mail or by fax; or
- Calling toll-free at 1-866-234-2345.

NOTE: Contact your health professional if you need information about how to manage your side effects. The Canada Vigilance Program does not provide medical advice.

PRODUCT INDICATIONS AND USE)

VISIPAQUE (iodixanol) 320 mg I/mL is indicated for use in angiocardiography (left ventriculography, aortic root injections and selective coronary arteriography) and can be used in the diagnosis of coronary artery disease as well as evaluation of the function of the chambers of the heart and heart valves.

- VISIPAQUE 320 mg I/mL is indicated for visualization of the aorta and its branches and for selective peripheral and visceral arteriography and in diagnosing arterial occlusive diseases, aneurysms, arteriovenous malformations and tumors. It may be used for both conventional radiography and digital subtraction angiography (DSA).
- VISIPAQUE 270 mg I/mL is also indicated for visualization of the aorta and its branches and for selective visceral arteriography and in diagnosing arterial occlusive diseases and tumors.
- VISIPAQUE 320 mg I/mL or 270 mg I/mL administered intravenously is indicated in refining diagnostic precision in areas of the brain that may not otherwise be satisfactorily visualized.
- VISIPAQUE 320 mg I/mL or 270 mg I/mL administered intravenously is indicated for enhancement of computed tomographic images for detection and evaluation of lesions in the liver, pancreas, kidney, aorta, mediastinum, pelvis, abdominal cavity, thoracic space, and retroperitoneal space.
- VISIPAQUE 320 mg I/mL or 270 mg I/mL administered intravenously is indicated in excretory urography to provide diagnostic contrast of the urinary tract and in the diagnosis of prostate enlargement, renal calculi, obstructive uropathy, urinary tract anomalies, neurogenic bladder, and urinary tract malignancies.
- VISIPAQUE 270 mg I/mL administered intravenously is indicated for venography and is useful in the diagnosis of thrombosis, phlebitis, or obstructed venous system.

Important Safety Information About Visipaque

CONTRAINDICATIONS: Visipaque (iodixanol) should not be administered to patients with known or suspected hypersensitivity to iodixanol.

MOST SERIOUS WARNINGS AND PRECAUTIONS

Concentration Used: Use the recommended Visipaque concentration for the particular procedure to be undertaken.

Fatal Reactions: Serious or fatal reactions have been associated with the administration of water soluble contrast media. It is of utmost importance that a course of action be carefully planned in advance for immediate treatment of serious reactions, and that adequate facilities and appropriate personnel be readily available in case a severe reaction should occur.

Other serious warnings and precautions:

- Hypersensitivity including serious, life-threatening, fatal anaphylactic/anaphylactoid reactions. Patients should be observed for at least 30 minutes after administration.
- Contrast media-induced nephrotoxicity, presenting as transient impairment of renal function, may occur after intravascular Visipaque administration.
- Patients with pre-existing renal impairment, diabetes mellitus, sepsis, hypotension, dehydration, cardiovascular disease, elderly patients, and patients with multiple myeloma, hypertension, patients on medications which alter renal function and patients with hyperuricemia, are at increased risk of this condition. Patients with both renal impairment and diabetes are at the highest risk for contrast media-induced nephrotoxicity.
- Pheochromocytoma
- Sickle cell
- Multiple myeloma
- Coagulation with serious, rarely fatal thromboembolic events
- Use with vasopressors, general anesthesia, metformin, cholecystographic agents, adrenergic beta-blockers, or inotropic agents
- Ensure patients are well hydrated prior to administration
- Patients with a history of allergy, bronchial asthma or other allergic manifestations, combined renal and hepatic disease, the elderly, debilitated or severely ill patients, those with homocystinuria, endotoxemia, elevated body temperature, severe hypertension or congestive heart failure and other cardiovascular diseases, Buerger's disease, severe ischemia, suspected thrombosis, ischemic disease, local infection, significantly obstructed vascular system, chronic obstructive pulmonary disease, ventricular failure, pulmonary hypertension, stenotic pulmonary vascular beds, hyperthyroidism and recent renal transplant recipients, as well as patients sensitive to iodine, present an additional risk and call for careful benefit/risk ratio assessment.
- Increased intracranial pressure, cerebral thrombosis or embolism, primary or metastatic cerebral lesions, subarachnoid hemorrhage, arterial spasm, transient ischemic attacks, and in any condition when the blood brain barrier is breached or the transit time of the contrast material through the cerebral vasculature is prolonged.
    - Ensure proper catheter placement
    - Aortic administration
    - Monitor vital signs and ECG through the procedure
    - **Myelography and CT scan of the head**
    - Breastfeeding
    - Safety and efficacy not established in children
    - Radioactive iodine uptake studies and Multistix® measurements

Prior to administration, please read the Product Monograph for Visipaque and the Important Safety Information About Iodinated Contrast Media, which is available by calling 1 800 654 0118 (option 2, then option 3) or through an email request to canadainfo@gehealthcare.com.

Reporting Side Effects

To report SUSPECTED ADVERSE REACTIONS, contact GE HealthCare at 1 800 654 0118 (option 2, then option 1), or email canadainfo@gehealthcare.com to request an adverse events form, or fax a request for a form to 905 847 5849.

Adverse reactions can also be reported to Health Canada as follows:

- Online at MedEffect.com
- By calling 1 866 234 2345 (toll-free)
- By completing a Canada Vigilance Reporting Form and sending it by:
    - Fax to 1 866 678 6789 (toll-free)
    - Mail to Canada Vigilance Program, Health Canada, Postal Locator 0701E Ottawa, ON K1A 0K9
    - Postage-paid labels and the Canada Vigilance Reporting Form are available at MedEffect.com

Injectors

Medrad Mark 7 Arterion Injector

The Mark 7 Arterion™ is light, maneuverable and easy to use. Less time positioning and setting up the Arterion means more time with the patient. The clearly visible and intuitive user interface guides you through proper set-up and highlights the information you need to perform injections confidently.

- Ergonomic handle for easier maneuverability
- Front load syringe for simple insertion and clean removal
- Syringe provides a clear view of the contrast
- Light injector head with a handle to make it easier to position for injection
- Smooth arc design of pedestal for extended reach
- Small footprint which increases mobility around a busy lab
- Bright and colorful intuitive user interface is designed to highlight the information you need
- Highlighted armed state to know when the system is ready to inject
- History and protocol screens to easily access the amount of contrast delivered to the patient and to store and recall protocols

E7018HA/HC

Cat#	Description	Warranty
E7018HA	Mark 7 Arterion injector on integrated pedestal with installation and warranty (GE HealthCare Innova package)	E
Compatibility: Discovery™ IGS730/740, Innova IGS 620/630/520/530/540, Innova IQ 2100/3100/4100		
E7018HB	Mark 7 Arterion injector on table mount with installation and warranty (GE HealthCare Innova package)	E
Compatibility: Innova™ IGS 620/630/520/530/540 (Omega table), Innova IQ 2100/3100/4100 (Omega table)		

Medrad Mark 7 Arterion Injector on Table Mount with Floor Mount rack for Innova IQ table

- Medrad® Mark 7 Arterion™ injector can now be mounted at table-side on the Discovery™ IGS platform equipped with the Innova IQ table. This configuration includes:
  - Two adjustable table rail-mount devices to allow for the mounting of the injector head and the DCU on the IQ table rail
  - The power rack is set on a floor-mount bracket in proximity to the table, instead of the technical room
  - The injector power rack is connected to the Innova IQ table using the GE interface cable

E70381AF

Cat#	Description	Warranty
E70381AF	Mark 7 Arterion Injector on table mount with floor mount rack (GE Interventional Package)	E
Compatibility: Discovery IGS Platform equipped with the Innova IQ table		

Medrad Mark 7 Arterion Injector with ceiling mount

- The Mark 7 Arterion™ is also available in a ceiling mount configuration.
- 58, 85, and 100 cm post length available
- E8007PJ mounting plate required for installation

Cat#	Description	Warranty
E70381AG	Medrad Mark 7 Arterion Injector with ceiling mount (85 cm post length) GE HealthCare Interventional Package	E

Table Shields

Kenex X-ray Shields for Interventional Tables

Our portfolio of Lower Body Shields help substantially reduce exposure to scatter radiation emanating from the table or patient's body. We offer a dedicated head end shield as well as a line of standard table shields from Kenex. They are compatible with the following GE HealthCare Interventional tables:

- Omega IV
- Omega V
- Innova IQ/IQ OR

NOTE – not compatible with the Maquet table

Head End Table Shield

Kenex Table Head End Lower Body Shield

- The radiation exposure shield is dedicated to operators standing near the patient's head, fully integrated with the GE HealthCare table
- No additional wheel is needed to support the shield, facilitating placement of all other equipment
- Interventional Radiology: Helps reduce exposure for physicians and technologists in all intrajugular and upper chest access procedures
- Interventional Cardiology: Helps reduce exposure for echographers during structural heart procedures such as left atrial appendage closure (LAAC)
- The shield is supplied with a table top adaption bracket allowing it to easily attach to the head end
- The two side curtains (one 24 cm wide, one 68 cm wide) can each attach to either the left or right side of the central section
- Dimensions – 119 cm (W) x 83 cm (H) with the lift-off top shield, 60 cm (H) without the lift-off top shield
- Shield Weight (excluding table adaption bracket) – 13.2 kg / 29.1 lb

Wall Rack

Shields stored on Wall Rack

Catalog consists of:

- 0.5 mm Pb protective curtain
- 1 central section 37 cm, 1 pivotal section 24 cm
- 1 pivotal section 68 cm
- 1 carbon fiber support fitting on table head end
- 3 lift-off top shields, 23 cm (H) x 29 cm (W)
- 1 adaptation bracket
- 1 wall rack

Cat#	Description	Warranty
E30591JK	Kenex table head end lower body shield, 119 cm (W) x 83 cm (H), includes (3) 29 cm lift-off top shields, includes wall rack and adaptation bracket	C

Kenex Standard Table Shields

- Shields easily mount to either side of the table allowing the pivotal arm to always face the head end
- An attachment bracket slides onto a 25 mm high tableside accessory rail (maximum 11 mm thick)
- Catalog # E30591J/JL and E11181EA are configured to fit the 25 mm high tableside rails, but may be quickly adjusted on-site to fit the 29 mm high tableside rails
- Catalog # E30591JA/JM/JS are supplied with a 35 cm long integrated accessory rail (7.7 x 25 mm section) for the attachment of equipment controls that would otherwise be located on the table side
- All shields have an automatic wear adjustment feature ensuring accurate joint friction which prevents unwanted curtain movement even when the table is tilted in any direction
- The curtain forms around the under table X-ray tube without impeding movement

E30591JL

- Dimensions: 78 cm (W) x 70 cm (H) (30.7 in (W) x 27.6 in (H))
- Weight: 8.4 kg (18.5 lb)
- Single pivot

E30591J

- Dimensions: 92 cm (W) x 70 cm (H) (36.2 in (W) x 27.6 in (H))
- Weight: 9.4 kg (20.7 lb)
- Double pivot

E11181EA

- Dimensions: 92 cm (W) x 70 cm (H) (36.2 in (W) x 27.6 in (H))
- Weight: 9.7 kg (21.4 lb)
- Double pivot

E30591JM	Kenex double pivot lower body shield, 114 cm wide x 70 cm high, includes 57 cm lift-off top shield, includes 35 cm integrated accessory rail	C

Kenex Top Shields

- Top shields are manufactured using the same 0.5 mm Pb protective material as the suspended curtains of the main shield. They include a flexible plastic material that enables them to stand 25 cm above the tableside rail, and provide additional higher and wider protection to the user
- The shape of the top shields (wider at the top) helps ensure that no gaps develop as the adjacent tops are pushed towards the patient during procedures
- Top shields can be quickly removed to ease patient transfer and access
- Solid stainless steel locating pins ensure the top remains in position during use

E30591JC – Kenex optional lift-off top shield, 57 cm wide

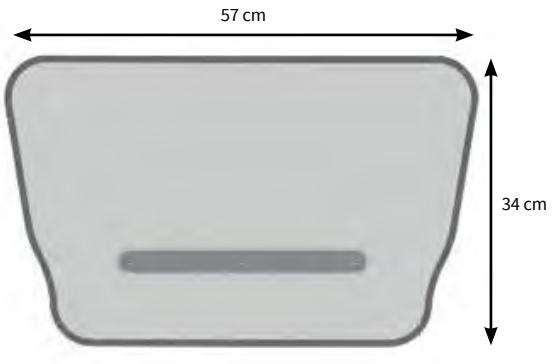

- Dimensions: 57 cm (W) x 34 cm (H) (22.4 in (W) x 13.4 in (H))
- Weight: 2.2 kg (4.9 lb)

E30591JN – Kenex optional lift-off top shield, 27 cm wide

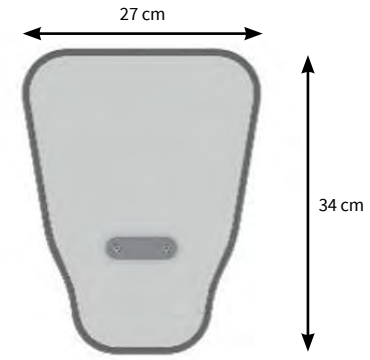

- Dimensions: 27 cm (W) x 34 cm (H) (10.6 in (W) x 13.4 in (H))
- Weight: 0.9 kg (2 lb)

E30591JP – Kenex optional lift-off top shield, 27 cm wide, short cut

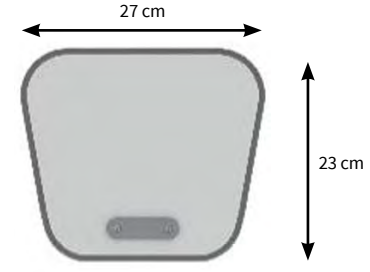

- For use on lower body shields fitted with an integrated accessory rail (Cat# E30591JA, E30591JM, E30591JS)
- Dimensions: 27 cm (W) x 23 cm (H) (10.6 in (W) x 9 in (H))
- Weight: 1 kg (2.2 lb)

MAVIG Lower Body Shields

Provides convenience, flexibility and enhanced protection for medical personnel. Helps shield technicians against scatter radiation from sources beneath the tabletop and also helps to protect the lower extremities. Flexible 0.5 mm lead equivalent curtains attached to the aluminum alloy pivoting arm. The entire lower body protector can be easily and quickly removed from the table.

The shields are compatible with the following GE HealthCare interventional tables:

- Omega IV
- Omega V
- Innova IQ/IQ OR

NOTE: not compatible with the Maquet table

E3053J
MAVIG Double-Pivot Lower Body Protector

E3053J – MAVIG Double-Pivot Lower Body Protector, model 6269

- Pivotal, flexible shield: 35 x 25 in (90 x 65 cm)
- Easy-on upper protective shield: 10 x 25 in (25 x 65 cm)
- Convenient and flexible system

E3053JA
MAVIG Single-Pivot Lower Body Protector

E3053JA – MAVIG Single-Pivot Lower Body Protector, model 6267

- One-piece economical model offers enhanced protection
- Comes with single joint adapter
- Measures 35 x 18 in (90 x 45 cm) including upper portion
- Upper portion is 7 in (H) (17 x 18 in) (17 x 45 cm)

E3053JB – MAVIG Flexible, Double-Pivot Lower Body Protector, model 6260

- This model is designed to offer enhanced protection in combination with tiltable tables
- Performance angle +/-15°
- Adjustable brakes for lower shields
- Left and right table mounting with a single adapter
- Similar features of the E3053J model
- Height: 29.5 in (75 cm) main part
  12.2 in (31 cm) upper shield
- Width: 19.3 in (49 cm) 3 overlapping panels
  7.9 in (20 cm) adapted sway panel

Ceiling Tracks and Cable Spoolers

MAVIG Ceiling Tracks and Cable Spoolers

The ceiling track is suited for universal use of ceiling guided accessories, including radiation protective shields, lamps, injectors, monitors, and other equipment.

- The innovative structure profile ensures smooth running of the carriage
- With little force, the installed system can be moved and positioned
- The carriage glides smoothly, even after many years of routine use
- Adjustable cross-struts simplifies the system installation
- The cable spooler houses the electrical cables for the lamp. It is only needed when planning to install a lamp on a track mounted system

MAVIG LED Lamps

Mavig Surgical Lamp YLED-3F

- The YLED-3F is an OR-light with 160.000 lux and with a fully cardanic suspension. The sophisticated faceted lens system provides realistic color reproduction and homogeneous light with less shadows. Rotating the adjustment ring at the handle focuses on the light field.
- The compact design of the YLED-3F contains 36 powerful LED modules, with an outstanding light intensity of overall 160,000 Lux.

E3053HE

Cat#	Description
E3053HE	Lamp YLED-3F – single colour LED surgical lamp incl. power supply unit 160.000 Lux, with extension spring arm 75 cm/91 cm, without column

Mavig Surgical Lamp YLED-2F

- The YLED-2F is an OR-light with 130.000 lux and with a partially cardanic suspension. The sophisticated faceted lens system provides realistic color reproduction and homogeneous light with less shadows. Rotating the adjustment ring at the handle focuses on the light field.
- The compact design of the YLED-2F contains 36 powerful LED modules, with an outstanding light intensity of overall 130,000 Lux.

Cat#	Description
E63611CF	Lamp YLED-2F - single colour LED surgical lamp incl. power supply unit 130.000 Lux, with extension spring arm 75 cm/91 cm, without column

Examination Light YLED-1F

- The compact YLED-1F contains 17 powerful LED modules. All modules provide a combined light intensity of 70,000 Lux
- A wide range power supply is integrated into the housing. This integrated power supply enables you to save space and time by means of simple installation
- Covers a wide range of applications, from examinations to minor surgical procedures
- It is intuitively controlled by means of the side-mounted control panel and the sterilizable handle
- Lifetime of at least 60,000 hours for the LED module
- Dimension: 360 x 280 mm

Radiation Protection Shields

MAVIG Radiation Protection Shields with Overlapping Panel Curtain

- Minimization of scattered radiation exposure to the examiner and assistant due to the panel curtain and drapes

Protective shield

- The high quality of the radiation protective shield made from lead acrylic allows optimal transmission and therefore a clearer view

Panel curtain

- The panel curtain is made of a highly flexible, radiation protective material and covered with a suitable textile outer material

Extension arm options

- Catalogs E30611DA/DB have a 750 mm extension arm
- Catalogs E30611DC/DD are the same product, but with a 950 mm extension arm. Select the longer reach if installation of column is far from the patient: extra 200 mm length on total arm's length

E30611DA/DC

E30611DB/DD

Cat#	Description	Warranty
E30611DA	X-ray protective shield with curtain RIGHT, Pb 0.5 mm, incl. Portegra2 extension/spring arm 750/910 mm	D
E30611DB	X-ray protective shield with curtain LEFT, Pb 0.5 mm, incl. Portegra2 extension/spring arm 750/910 mm	D
E30611DC	X-ray protective shield with curtain RIGHT, Pb 0.5 mm, incl. Portegra2 extension/spring arm 950/910 mm	D
E30611DD	X-ray protective shield with curtain LEFT, Pb 0.5 mm, incl. Portegra2 extension/spring arm 950/910 mm	D

MAVIG Radiation Protection Shields

The lead acrylic radiation protective shields have a lead equivalent of 0.5 mm Pb. The shields provide excellent high-optical transmittance. Rounded corners and edges and shatter-proof materials minimize the risk of injury. In an emergency, the shields can be removed quickly and easily.

- All shields include the corresponding Mavig Portegra2 Extension Spring Arm (75/91 cm)

MAVIG Configuration Guide

Suspension Overview

Suspension Configurations Include:

Electrical Availability

Each standard column can support only one electrified feature (lamp or monitor holder) and one non-electrical (shield).

If your configuration requires more than one electrical feature contact the Accessories & Supplies team who can work with MAVIG on a custom order request.

MAVIG Configuration Reference

Create a Customized Solution

Column Length and Bridge Selection depends on the floor to structural ceiling distance **(DistC)** assuming distance between floor and point B **(DistB)** should remain around **210/220 cm**.

The bridge should be hidden on top of the false ceiling i.e. between the structure ceiling and the false ceiling.

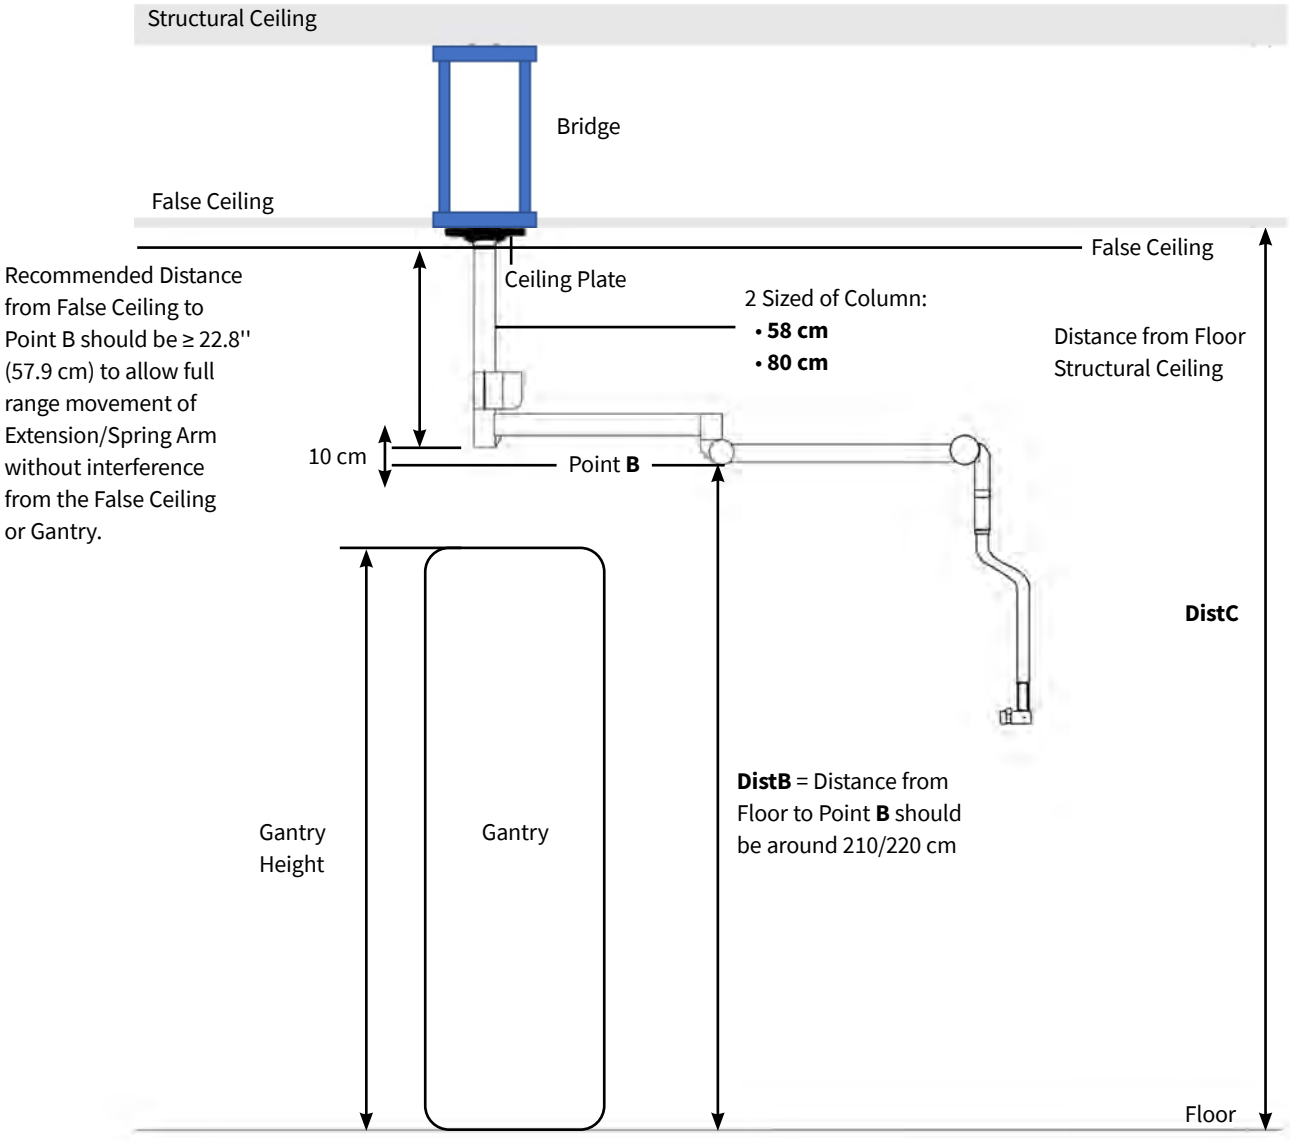

Choose the correct column length- and bridge if needed, to achieve this distance.

Do not forget to substract addtional 10 cm (Dist between B and end of column).

Column Length and Bridge Selection

Recommended Distance from False Ceiling to Point B should be ≥ 22.8'' (5 7.9 cm) to allow full range movement of Extension/Spring Arm without interference from the False Ceiling or Gantry.

Column Length and Bridge Selection

Selecting the Ceiling Anchorage

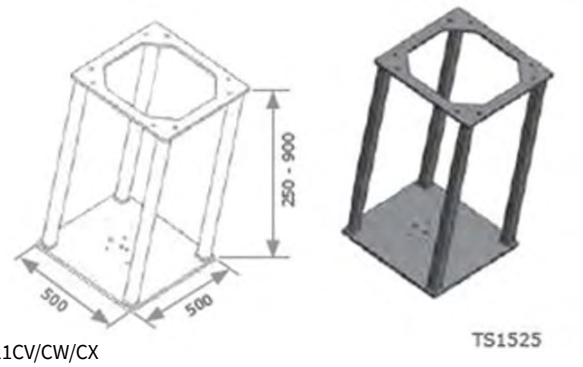

Bridge – Optional

1. Select the appropriate Bridge if required by the room configuration (refer to Column length and bridge selection on page 19)

Three bridge heights available (select one)

- 200 mm – E63611CV
- 500 mm – E63611CW
- 900 mm – E63611CX

Contact GE HealthCare Global Parts to order the bridge.

E63611CV/CW/CX

Selecting the Suspension Type (Fixed vs. Track)

Fixed Suspension

2. Select the mounting plate – E3053CA.

Track Suspension

2. If your configuration includes an LED Lamp, please select from:

- 2.5 m Light Cable Spooler – E3053CC
- 4.0 m Track with Light Cable Spooler and Monitor Cable Holders – E3053CB

If your configuration includes a monitor support, please include the Monitor Cable Holders (3 pcs) – E3053CM

Selecting the Shields, Lamps and Monitor Holders

Shields

The corresponding Portegra2 Extension Spring Arm is included with the shields.

E3053CH

- Contour cut out
- Guided by a removable handle
- 24 x 30 in

E3053CJ

- Contour cut out
- Laterally guided
- 30 x 24 in

E3053CK

- Laterally guided
- Flexible curtain
- 30 x 27 in

E30611DA/DB/DC/DD

- Contour cut out
- Flexible curtain
- 30.7 x 35.4 in

LED Lamps

The corresponding Portegra2 Extension Spring Arm is included with the lamps.

E3053HE – YLED-3F – single colour LED surgical lamp incl. power supply unit 160.000 Lux, with extension spring arm75 cm/91 cm, without column

- Intuitive Control Panel
- 160,000 Lux
- Focus Illuminated Field Size: 190 - 260 mm / 7.5 - 10.2 in

E63611EA/EB – YLED-1F Examination Light

- Compact LED
- 70,000 Lux
- Approx. 36 cm x 28 cm

Monitor Holder

The corresponding Mavig Portegra2 Extension Spring Arm is NOT included with the E3053CL. It is available though your local GE HealthCare Field Engineer. Mavig part #E0T75-70120.

- Flexible holder for one 19'' display
- Double jointed hinge to allow a wide range of different viewing angles
- In case of minor collisions, the monitor moves to the side and repositions itself
- Maximum weight load is 17 kg (39 lbs)
- Vesa Adapter 75/100 mm

E3053CL

Mobile Barriers

MAVIG Adjustable Height Mobile Barriers

- Mobile barriers allow easy adjustment of the clear acrylic viewing area
- E3053JH model has laterally-mounted lead rubber apron for under-the-table positioning
- For both models, upper shield is 0.5 mm lead equivalence and lower shield is 1.0 mm lead equivalence
- Wheel-based for easy positioning
- E3053JG –
  - Base width: 31 in (78 cm)
  - Height min: 45 in (115 cm)
  - Height max: 75 in (190 cm)
- E3053JH –
  - Lower width: 51 in (128 cm)
  - Upper width: 43 in (110 cm)
  - Height min: 55 in (140 cm)
  - Height max: 75 in (190 cm)

Personal Radiation Protection

GE HealthCare offers premium-quality radiation protection accessories. Choose from a variety of aprons, glasses, and storage solutions from MAVIG®. MAVIG protective aprons offer innovative, light weight material providing high radiation absorption across the radiology spectrum. Their ergonomic, application-minded design helps ensure comfort for your staff.

MAVIG Allround Vest and Skirt, model RA631 Balance

The model 631 Allround combination offers great weight distribution and cut to see you through a comfortable day.

- Outer material cover: ComforTex™ HPMF Hybrid
- Inlay material: NovaLite™
- Shoulder padding is included
- Lead Equivalency: (front/back) 0.5/0.25 mm
- Color: Blue Admiral

Cat#	Size	Warranty
E11041PA	MED	H
E11041PB	LG	H

- The skirt has a wide belt strap in addition to the high-quality hook & burr fastener
- An elastic insert in the back part allows the user to hold his/her posture and can be easily replaced if necessary, thanks to a zipper
- The upper width of the skirt can be varied by changing the size of the insert

Cat#	Size	Length
E11041PC	MED	70 cm
E11041PD	LG	80 cm

Size	Recommended for
MED	Breast girth 96 – 106 cm Waist girth 98 – 107 cm Hip girth 98 – 107 cm
LG	Breast girth 107 – 117 cm Waist girth 108 – 118 cm Hip girth 108 – 118 cm

Size choice: For the vest, the larger value of the chest and waist girth determines the size. For the skirt, the larger value of the waist and hip girth determines the size.

MAVIG Allround Coat, model RA632 Synergy

Optimally protected all around! This model is for the person that wants an apron that is fast and easy to put on and take off. The coat also includes shoulder padding. Additionally an elastic belt shifts the weight from the shoulders to the hips.

- Front protection is provided from side seam to side seam by overlapping front panels
- Coat's design creates the required safety zones by a double-layer structure in the sensitive areas
- The variable snap fastener strip permits each user to adjust the belt to his or her individual waist height
- The belt can be buttoned onto the coat on one side or both sides
- In the bottom area, the coat is also secured with a snap buckle fastener
- Outer material cover: comforTex HPMF Hybrid
- Inlay material: NovaLite
- Lead Equivalency: (front/back) 0.5/0.25 mm
- Color: Blue Admiral

Cat#	Size	Length	Warranty
E11041QA	SM	110 cm	H
E11041QB	MED	110 cm	H

Visualize your radiation exposure in real time.

RaySafe i3 Dosimetry System

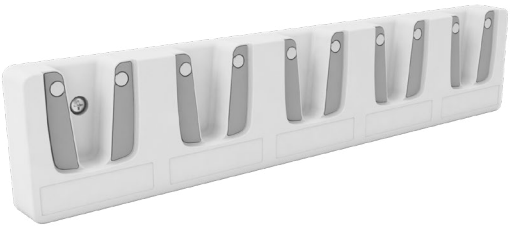

RaySafe i3 visualizes X-ray exposure in real time using easy-to-read bar graphs. Instant feedback empowers medical staff to learn and adapt their behavior to minimize unnecessary radiation exposure.

The measurements are simultaneously stored for post-procedure analysis, to facilitate continued learning as well as to enable comparisons over time or between labs

- **Real-time Dosimeter**
  The Real-time Dosimeter measures and records radiation every second. Data is transferred wirelessly to the Real-time Display
- **Real-time Display**
  The Real-time Display shows dose data for connected dosimeters in real time
- **Software**
  Dose Viewer is used for administrating dosimeters and viewing personal dose information

Intercom System

E6220J

VIS-A-VIS Vitalinq™ Intercom System

The Vitalinq is a combination intercom and music system designed to meet the specific needs that arise during diagnostic and interventional procedures in Cath, EP and IR labs. Features and benefits of the Vitalinq include:

- Enables physicians to have continuous two-way conversation with control room operators throughout diagnostic and angioplasty procedures
- Physician is not required to wear or touch any type of device
- Capable of picking up conversation in a normal tone of voice. Allows control room operator to respond immediately to physicians' requests
- Specialized microphone design contributes to high voice intelligibility, even within the acoustically active space of a full-functioning procedure room
- Designed to enhance articulation by reducing the potential echo path, Vitalinq gathers and transmits speech in a highly efficient manner
- Provides music via separate ceiling stereo speakers. Music sources include CD, FM receiver and any device that can output to a USB or auxiliary input (smart phones, USB sticks, Satellite radio receivers, etc.)
- Music can be played in both rooms or faded between the rooms to allow different listening volumes or no music at all

Specifications

- Each Vitalinq system includes intercom and music and is provided with everything needed for installation including pre-terminated cables
- Ease of installation. Speakers "daisy chain" together using color coded Ethernet cables thereby minimizing the number of cables
- Console Dimensions (Working Surface Footprint): 8.5 in (W) x 9 in (D) x 4.5 in (H)
- Console Weight: 7.4 lbs
- Everything is provided for a complete installation
- Shipping Dimensions and Weight:
  - Ships in 2 cartons totaling 55 lbs
  - Carton 1, 24 in (L) x 10 in (W) x 10 in (H), 19 lbs
  - Carton 2, 29 in (L) x 17 in (W) x 7 in (H), 36 lbs

Patient Positioning Aids

Headholder and Armboards

The Head Holder and Armboards are designed for patient positioning and immobilization during a variety of radiology and angiography procedures. The unique composite construction provides rigid, secure positioning. They are designed to work with flat top angiography tables and flat imaging tables. They are easily maneuvered to allow for quick positioning adjustments.

Adept Medical Patient Positioning Products

Adept Medical's range of Interventional Patient Positioning Products have been clinically designed to optimize the operational environment to produce improved imaging outcomes. With solutions to assist with clinician workflow, access, patient and workspace management, Adept Medical's radiology positioning devices streamline Interventional Radiology procedural processes.

Adept Medical STARSystem — # E30621PA

The STARSystem includes three components — the STARBoard, STARSupport and STARTable to form a complete, clinically engineered solution. This system is designed for right and left radial procedures whilst the clinician remains on the right side of the patient.

Key features and benefits

- Radiolucent
- Clinically designed
- Scatter radiation shielding
- Fits all tables
- Quick set-up and removal
- Easy positioning
- Crafted from Carbon Fibre
- Ergonomic surface
- Adjustable arm board with pad
- Adjustable length on the STARBoard and STARTable
- 2-year manufacture defect

STARBoard

- Dimensions: 819–964 mm (L) x 254 mm (W) x 254 mm (H)
- Weight: 1.3 kg

STARTable

- Dimensions: 788–909 mm (L) x 512 mm (W) x 229 mm (H)
- Weight: 3.0 kg

STARSupport

- Dimensions: 355 mm (L)
- Weight: 0.4 kg

STARBoard STARTable STARSupport

E30621PA

Adept Medical Retrograde IR Platform — # E30621PD

A lightweight over-patient work surface that improves workflow and patient safety during retrograde femoral access procedures.

Key features and benefits

- Strong stable work-surface
- Quick set-up and removal
- Secures over patient
- Easy positioning
- Adjustable height
- Radiolucent
- Optional extension
- Easy to clean
- Dimensions: 1400 mm (L) x 817 mm (W) x 190–406mm (H)
- Weight: 8.7 kg
- 2-year manufacture defect

E30621PD

Cat#	Description	Warranty
E30621PA	Adept Medical STARSystem (three piece kit)	D
E30621PD	Adept Medical Retrograde IR Platform	D

Adept Medical Prone Support — # E30621PB

Prone Support for supporting and managing a prone patient, providing comfortable patient positioning during C-arm image-guided procedures supporting both the arms and face.

Key features and benefits

- Radiolucent
- Height and angle adjustment of head support
- Cushioned face support
- Versatile arm positions
- Suits range of patient sizes
- Suits C-arm table
- Dimensions: 780 mm (L) x 694 mm (W) x 288 mm (H)
- Weight: 2.2 kg
- 2-year manufacture defect

E30621PB

Adept Medical Drape Support — # E30621PC

Designed to support a sterile drape over the patient, the extremely versatile Drape Support offers a wide range of imaging table placement options

Key features and benefits

- Optimal patient comfort reducing anxiety
- Quick set-up and removal
- Work surface for light-weight items
- Extremely versatile
- Fits all tables
- Radiolucent
- Takes up minimal space around table
- Light-weight, small storage footprint
- Dimensions: 428 mm (L) x 413 mm (W) x 387 mm (H)
- Weight: 1.4 kg

E30621PC

Adept Medical Overhead Arm Support — # E30621PE

Designed to comfortably support the supine patient's arms, it eliminates extreme shoulder flexion, allows abdominal access and removes unwanted artifacts when imaging.

Key features and benefits

- Allows abdominal access
- Removes unwanted artifacts
- Quick placement and set-up
- Optional safety straps
- Patient comfort
- Fits all tables
- Suits range of patient size
- Dimensions: 496 mm (L) x 592 mm (W) x 265–376 mm (H)
- Weight: 1.9 kg
- 2-year manufacture defect

Innova Foot-End Table Rail with Two Table Clamps

System controls may be located at the end of the table to enhance patient access by providing an alternate mounting location for controls. It provides for improved panning capabilities and allows dual system control.

- Allows for more physician and technologist tableside work space
- System controls placed at two locations for greater operational flexibility
- System controls can be moved to the end of the table for easy table-end panning
- Location at the foot-end is a more natural push-pull action for table panning
- Fosters productivity in patient loading and unloading, and patient safety
- Allows cardiologist and scrub tech access to the patient, unencumbered by items under the sterile drape

Primary use locations:	Angiographic and Cardiographic tables
Construction:	Heavy gauge stainless steel
Width:	30.5 in
Depth:	4 in (L) offset
Height:	Variable with 14 in posts
Includes:	Stainless steel clamps (2)

Slickers and Sterile Drapes

TIDI full drape kit for Allia™ centered C-arm X-ray systems

The drape kit is especially designed to cover detector lift, tube and C-arm

- Allia C-arm X-ray systems
- Sterile and disposable
- Clear material
- Latex free
- Single-use
- Each kit includes one drape each for detector lift, tube and C-arm
- 12 kits/case

Cat # E7009CH

C-drape specifications: 86 × 19.5 in (218.4 × 49.5 cm)
Detector drape specifications: 50 × 60.5 in (127 × 153.7 cm)
Collimator drape specifications: 51 × 24 in (129.5 × 61 cm)

E7009CK

C-drape specifications: 86 × 19.5 in (218.4 × 49.5 cm)
Detector drape specifications: 44 × 60.5 in (111.8 × 153.7 cm)
Collimator drape specifications: 51 × 24 in (129.5 × 61 cm)

Detector lift drape

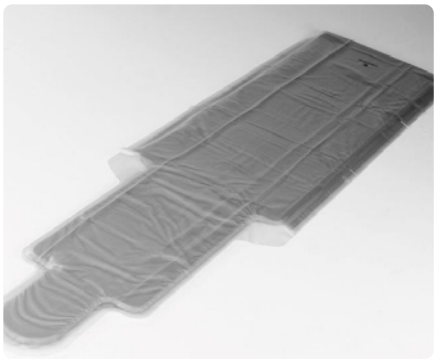

Tube collimator drape

C-arm drape

Cat#	Description	Warranty
E7009CH	Full drape kit for Allia centered C-arm 40 cm X-ray system, composed of LDPE with acrylic adhesive – C-drape, detector and collimator (12 kits/case)	W
E7009CK	Full drape kit for Allia centered C-arm 30 cm X-ray system, composed of LDPE with acrylic adhesive – C-drape, detector and collimator (12 kits/case)	W

X-ray Vascular and Angio Slickers

- Increase system uptime by protecting table from spills and particulate contaminants
- Easy to install and comfortable for patients
- Will not interfere with normal operation of table
- Clear PVC plastic facilitates faster cleanup of blood and fluids; latex-free
- Prevents contaminate buildup in hard-to-clean areas
- Thermosealed seams and flaps
- Recommended for trauma centers and sites concerned about exposure to blood and fluid-borne disease

E8016AY

Cat#	Description	Warranty
E8016AS	Angio Slicker for GE Omega IV Tables – 118 in (L) x 26 in (W)	W
E8016AY	Angio/Cardiac Slicker for Omega V Tables – 132 in (L) x 26 in (W)	W

IGS 320/330, IGS 520/530/540, IGS 620/630 and IGS 730/740 Systems

- A drape solution that complements system appearance
- Easy for technologists to quickly apply
- Elastic opening, transparent and durable polyethylene
- Sterile and disposable
- Latex-free

Sterile Equipment Drapes

- Helps reduce opportunity of cross-contamination
- Large drape (E7009AG) is for 9-20 in diameter opening, measures 27 in D
  - Recommended for draping MLX tube hanger and Polarix or other C-arm intensifiers; also compatible with remote console and 16 in image intensifiers
- Clear polyethylene, latex-free
- Individually packaged, 20 drapes per box
- Product is not returnable for artifacts

E7009AG

Cat#	Description	Packaging	Warranty
E7009AG	Large Sterile Drapes – for 9-20 in Diameter Openings, 27 in D	20/Box	W

Sterile Equipment Drapes – Joystick and Pedestal

- Helps reduce opportunity of cross-contamination
- AFM/CFM pedestal drape (E7009AE) is also compatible with tableside control and 12 in image intensifiers for the tilting C-arm; packaged 25 drapes per box
- AFM/CFM joystick drape (E7009AF) has non-slip design and maintains the functionality of the joystick control; packaged 50 drapes per box
- Clear polyethylene, latex-free, individually packaged
- Product is not returnable for artifacts

E7009AE

Cat#	Description	Packaging	Warranty
E7009AE	Sterile Drapes – AFM/CFM Pedestal	25/Box	H

Uninterruptible Power Solutions

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and undervoltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.
- Configurations are available to support multi-modalities or even complete departments

E4582AG

Cat#	Description	Warranty length
Interventional UPS		
E4502WA	Eaton 150 kW 93PM (non-seismic) UPS, non-upgradeable, 6.1 min runtime	1 year from startup
E4502WB	Eaton 150 kW 93PM (seismic) UPS, non-upgradeable, 6.1 min runtime	1 year from startup
E4582AG	Riello MHT 160 kVA UPS (non-seismic)	2 years from startup
E4582AL	Riello MHT 160 kVA UPS (seismic)	2 years from startup

See Power Quality Compatibility Guide on page II 44

Main Disconnect Panels

Main Disconnect Panels

- Main Disconnect Panels provide emergency shut down, undervoltage protection, overcurrent protection, OSHA lockout tag provisions, and serves as a local disconnect for the GE HealthCare Diagnostic Imaging System.
- Helps reduce installation time by providing a single-point power connection, eliminating the need to mount and wire a number of individual components
- Standardized design and testing helps ensure high product quality and system reliability
- UL and cUL listed for compliance with National Electric Code
- Surface or semi-flush mounting
- Please consult your GE HealthCare Field Engineer to determine if this is the appropriate product for your needs before purchasing

E46001BD

Cat#	Description	Warranty
Interventional Main Disconnect Panels		
E46001BD	Main Disconnect Panel – UL, OSHPD, 100 Amp, 480 VAC, 60 Hz, 3-phase	Y

See Power Quality Compatibility Guide on page II 44

AC Lighting Controllers

AC Lighting Controllers

- "X-ray in Use" warning and room lighting control panel provide a low voltage interface between the "X-ray in Use" warning lights, interior room general lighting systems and the X-ray system
- Convenient, push on/off pre-wired footswitch for control of room general lighting
- Enhances servicing safety by the use of a low voltage interface circuit between the imaging system and the line voltage lighting system

E4502SS

Cat#	Description	Warranty
E4502SS	X-ray Warning and Room Lighting Control Panel (X-ray, Vascular, R&F)	Y
E4502RL	X-ray Warning Light Control Panel (CT, MR, X-ray)	Y

Injectors

ulricheasyINJECT Max 3 Injector

Max 3's syringeless injector technology helps increase workflow efficiency, optimizes contrast media utilization, prioritizes patient safety, and saves valuable staff time through its intuitive ease of use.

Simple workflow for increased efficiencies and higher patient throughput

- No syringes needed, which allows for rapid patient changeover
- Injector display offers an intuitive and simple user interface for an easy and safe workflow

Efficient contrast media management for optimized delivery

- Ability to switch between contrast media for optimal contrast delivery
- May help reduce contrast waste and enable cost savings

Enhanced safety features protect patients and users

- SafeConnect with touch protection
- Automatic, patient-side air detectors protect against air injection
- Reliable protection against retrograde contamination[1]

User-friendly setup and operation for streamlined staffing

- 18-hour battery life for all day use
- No cords, a small footprint, and total mobility
- Wireless connection to the injector from the scan room

1. UL International GmbH (Grenzenstr. 13,88416 Ochsenhausen, Germany. GLP-compliant study: Virological evaluation of Retrograde Contamination Potential at the Pump Tubing Set (XD 2035) or the CT motion (XD 8000). Report 10874251 2.1. November 12, 2015. Study is unpublished but available on request with nondisclosure agreement. The results of the non-clinical investigation mentioned are applicable to the ulricheasyINJECT systems Max 3 and Max 2M as the physical barrier with respect to possible retrograde contamination is implemented in all of the systems by means of structurally identical two check valves.

Combining precision, safety and workflow efficiency

With advanced hardware and a sleek, syringeless design to help optimize contrast delivery through use of multi-dose packaging, Max 3 helps improve patient safety and workflow.

Saline

with bottle up to 1,000 ml (33.81 fl oz)

with media rod up to 2,000ml (67.63 fl oz)

3 media connection points

1 for saline and 2 for contrast media for standard media containers

Easy-Click-Cassette and spikes

with 24-hour use, air and particle filters, and SafeConnect

Injector display

with real-time pressure curve and intuitive, simple touch functionality

Patient tubing

with the only patient-side Luer lock connector and two check valves

Cordless operation

with 18-hour, lithium-ion battery output

Available in U.S. only.

Due to contractual obligations product may not be available through GE HealthCare in Canada, talk to your GE HealthCare representative about availability.

Cat#	Description	Warranty
E8026AR	ulricheasyINJECT Max 3 Injector System — US only, with installation, applications training, 1-year warranty	E

MEDRAD® MRXperion™ MR Injection System

Improved Efficiencies

- Snap-on/Twist-off syringe design
- Auto plunger advance and retract when attaching and detaching syringes
- Automatic filling and priming
- Injection/post-injection reminders
- Injection pressure graph

Reproducible Quality

- Proven track record of design and performance
- On-site field service and VirtualCare® Remote Support* for advanced injection system diagnostics and real-time support

Personalized Care

- Patient-Centric workflow design
- Protocol storage/retrieval
- On-board eGFR and weight based dosing calculators
- Injection enabled when head is tilted down

SMART Packages

Medrad® MRXperion™ Injector SMART Package includes Informatics software

E88221XN (Available in US only)

- Bayer's latest Medrad® MRXperion™ MR Injection System with new automation features to allow less time preparing for the injection and more time to focus on the patient
- Point of Care Software enabling modality worklist connectivity
- Choice of 1 Outbound Interface (PACS, RIS, or Speech Recognition) for automated data capture
- Clinical in-service training
- Software implementation

Package value Benefits: Injection System Automation and Accessible & Automated Contrast Documentation

Medrad® MRXperion™ Injector SMART Plus Package includes Informatics & Analytics software

E88221XP (Available in US only)

Includes everything in SMART Package Plus:

- Contrast Dose Management Analytics with Cross Modality Cumulative Patient Scope Card
- Choice of 1 additional Outbound Interface (PACS, RIS, or Speech Recognition)

Package value Benefits: Injection System Automation and Accessible & Automated Contrast Documentation PLUS Accurate Contrast Dose Management (CDM) Dashboards including Cumulative Patient Contrast Dose

All MRXperion Injector packages include:

- Dual injector head on pedestal with integral double hook IV pole
- Certegra™ workstation
- Installation, customer's operational training at time of installation, and one year full on-site warranty in Bayer service countries
- LAN port for VirtualCare Remote Service

Disposable Syringe Kit:

Disposable Syringe Kit option (E88221XD) includes:

- 65 mL Syringe for contrast media
- 115 mL Syringe for Saline
- One large spike for saline
- One small spike for contrast media
- «96'' Low Pressure Connector Tube with T-connector and check valve

E88221XD
20 kits/box

BAYER Wall Mount for Mobile Applications

- Compatible with the MRXperion™, Stellant D™ and Stellant FLEX™ injectors
- Designed to securely fasten to a trailer's wall for Bayer injectors in mobile applications
- Includes the foldable clamp, pad for injector head support, and smaller accessories to affix the desktop control unit

MR Chillers

Dimplex Chillers

Engineered for reliability and efficiency, the GO2-2-5000, GO2-7500, GO2-2-10000 chillers are verified for compatibility with GE HealthCare MR systems, ensuring optimal system operation and peace of mind.

Features

- Stable, dedicated cooling for MR system needs
- Air-cooled design with high-quality components
- Dual pumps for redundancy in case of pump failure
- Automated pump rotation for increased longevity by load sharing
- Dual refrigeration circuits with redundant control system to support high uptime
- Powder-coated cabinet and coated condenser coils for protection in coastal areas
- Non-ozone harming refrigerant R454B has a Global Warming Potential (GWP) of 466
- KoolMed Connect remote monitoring via IoT and cloud-based data

Inclusions

- Includes three 43.3-gallon drums of pre-mixed water-glycol (50% glycol)
- Remote display panel (included) for control room monitoring
- Filter kit with flow meter (included) helps to ensure water purity prior to entry to the MR system

55 kW MR Chiller - Dimplex model GO2-2-5000

Catalog includes: chiller, glycol, vendor start-up visit, commissioning visit, 1 year full parts and labor warranty commencing at commissioning including 1 preventative maintenance visit

Compatible with SIGNA™ Artist and Optima™ MR450w

Cat#	Description	Temperature Range
E8912GA	Dimplex GO2-2-5000 54.5 kW Chiller — Standard	-40˚ to 122˚F (-40˚ to 50˚C)
E8912GS	Dimplex GO2-2-5000 54.6 kW Chiller — Seismic	-40˚ to 122˚F (-40˚ to 50˚C)
Chiller Options		
E8911GB	Dimplex BACnet Communications Kit – option for GO2 chillers	
E8911GF	Dimplex Long Distance Remote kit – option for GO2 chillers	
E8911GJ	Dimplex Isolation Springs – option for GO2 chillers	
E8911CG	Manual Cryogen Compressor Water Bypass	

36 kW MR Chiller - Dimplex model GO2-7500

Catalog includes: chiller, glycol, vendor start-up visit, commissioning visit, 1 year full parts and labor warranty commencing at commissioning including 1 preventative maintenance visit

Compatible with SIGNA™ Pioneer, SIGNA Hero, SIGNA Sprint™ Select, SIGNA Voyager, SIGNA Champion™

Cat#	Description	Temperature Range
E8914GA	Dimplex GO2-7500 36.5 kW Chiller – Standard	-40˚ to 122˚F (-40˚ to 50˚C)
E8914GS	Dimplex GO2-7500 36.3 kW Chiller – Seismic	-40˚ to 122˚F (-40˚ to 50˚C)
Chiller Options		
E8911GB	Dimplex BACnet Communications Kit – option for GO2 chillers	
E8911GF	Dimplex Long Distance Remote kit – option for GO2 chillers	
E8911GJ	Dimplex Isolation Springs – option for GO2 chillers	
E8911CG	Manual Cryogen Compressor Water Bypass	

100 kW MR Chiller - Dimplex Model GO2-2-10000

Catalog includes: chiller, glycol, vendor start-up visit, commissioning visit, 1 year full parts and labor warranty commencing at commissioning including 1 preventative maintenance visit

Compatible with SIGNA Sprint Elite, SIGNA Bolt™ Elite, SIGNA Bolt Elite XT, SIGNA Architect, SIGNA PET/MR, SIGNA Premier, SIGNA Premier XT, Discovery™ MR450 and Discovery MR750/750w

Cat#	Description	Temperature Range
E8911GA	Dimplex GO2-2-10000 100 kW Chiller – Standard	-40˚ to 122˚F (-40˚ to 50˚C)

Chiller Options		
E8911GB	Dimplex BACnet Communications Kit – option for GO2 chillers	
E8911GF	Dimplex Long Distance Remote kit – option for GO2 chillers	
E8911GJ	Dimplex Isolation Springs – option for GO2 chillers	
E8911CG	Manual Cryogen Compressor Water Bypass	

KKT MR Chillers

Engineered for reliability and efficiency, the rBoxX Series of chillers are verified for compatibility with GE HealthCare MR systems, ensuring optimal system operation and peace of mind.

Features

- Designed to provide stable, fully dedicated cooling for your MR system's needs.
- Standard 7-inch touchscreen display provides a user-friendly interface, precise temperature control and advanced monitoring.
- Built in IoT module with cloud connectivity provides remote diagnostics and monitoring.
- Dual pumps for redundancy. If a pump fails the second pump is activated automatically to ensure continuous operation.
- Non-ozone harming refrigerant R32 has a Global Warming Potential (GWP) of 675.
- Powder coated cabinet and coated condenser coils provide protection in coastal areas.
- Leveling feet and isolation springs on each foot come standard, allowing installation at ground level or on a rooftop.
- This vented chiller is easier to commission than a pressurized system.

Inclusions

- Chiller ships in a robust full wooden crate for protection during transport
- Special anchoring feet included automatically
- Remote display panel provides the ability to monitor the system's operation from the control room, 164 ft (50 m) cable included. For longer distances order Long Distance Remote kit – catalog # E8915LE

41 kW MR Chiller - KKT Model rBoxX 60

Catalog includes: chiller, glycol, vendor start-up visit, commissioning visit, 1 year full parts and labor warranty commencing at commissioning including 1 preventative maintenance visit

Compatible with SIGNA™ Pioneer, SIGNA Hero, SIGNA Sprint™ Select, SIGNA Voyager and SIGNA Champion™

Cat#	Description	Temperature Range
E8914KC	KKT rBoxX 60 41 kW Chiller	-40˚ to 122˚F (-40˚ to 50˚C)
Chiller Options

- Coolant outlet temperature: 55° F (13° C)
- Refrigerant: R32
- Coolant: water/glycol (KKT Protect) 50%

Everything you need to get started:

- Chiller catalogs include pre-mixed 50/50 glycol for initial fill
- A filter and flowmeter kit
- Start-up by OEM representative
- Chiller delivery coordinated by GE HealthCare PMI
- Start-up and commissioning by OEM representative
- 1 year full parts and labor warranty commencing at commissioning
- 1 preventative maintenance visit after 6 months

Patient Monitors

E8812CF

Closed-Circuit TV System

This closed-circuit TV camera package allows for visual monitoring of your patients during their scans and now features an optional integrated recording feature for high-risk patients and for security purposes. Ceiling or wall mounted fixed camera is unobtrusive and transmits high-quality color images in real time to the operator's console where a 17 in TFT LCD monitor is located. A dual camera system is also available allowing split-screen viewing by the technologists to see both the front and back sides of the bore simultaneously.

CCTV System includes:

- 17 in TFT LCD color monitor
- Compact color camera with lens
- Signal interface box
- Exterior-mount power supply
- Mounting brackets for camera
- Set of 3 cables: 10 ft, 40 ft, 100 ft
- Remote control

E8812CL	CCTV System (2 camera kit) with 17 in LCD Monitor	H

Expression MR400 MRI Patient Monitoring System

The Expression MR400 MRI Patient Monitoring System is designed to assist clinicians in monitoring patient vital signs in the dynamic magnetic resonance environment.

- 15 in color LED widescreen display for high resolution patient information
- Monitor display is fixed to the cart
- Intuitive touchscreen graphical user interface
- Colored waves and large numeric displays
- Bedside-quality “SINC” parameters
- Exclusive, advanced ECG solution for MRI
- 8-hour battery life and user-replaceable batteries for extended run time
- Simultaneous display of up to 13 parameters, and 6 waveforms and associated values
- Multi-priority visual and audible alarm signals, unique “alarm flag” messages, and pulse tones
- Gating, both digital pulse and analog waveform

E8819TA/TB/TC/TK
(Available in U.S. only)

Configurations include everything you need to get started:

- Traditional Roll-Around cart
- Wireless ECG (with ECG) module
- Wireless SpO_2 (with SpO_2) module
- ECG lead cables and 25 electrodes
- SPO_2 probes and clips
- NIBP cuffs and hoses
- Applicable starter kit of consumables dependent on configuration selected

Available in U.S. only.
Due to contractual obligations product may not be available through GE HealthCare in Canada, talk to your GE HealthCare representative about availability.

IRadimed® 3880Q MRI Patient Monitor

Non-Magnetic. Lightweight. Portable.

- This lightweight, portable monitor has been meticulously engineered to meet the needs of today's complex MRI workflow
- From bedside through transport, the IRadimed 3880Q non-magnetic monitor is mountable patient-side, on a wall, roll-stand, bed rail, or an anesthesia cart
- The 3880Q can be quickly detached for immediate mobility and provides MR safety with full functionality in a compact, non-magnetic package

E8829TF/TG/TH/TJ
E88191TF/TG/TH/TJ

Everything you need to get started

- Patient monitor
- Accessory starter pack
- Non-magnetic roll stand
- Universal mounting bracket
- Anesthesia cart mounting brackets (if applicable)
- IBP pod and charging adapter (if applicable)
- Training is included

E8829TP

E8829TK/ E88191TK

- Remotely monitor patients inside the MRI Zones III and IV with minimal interruptions
- Tablet wirelessly controls the 3880Q with full audio and visual alarm functionality
- HL7 and RS232 simultaneous output options allows integration to both legacy and future EMR systems

Infusion System

IRadimed® MRidium 3860+ Infusion System

The better choice for MRI critical IV medication delivery. Traditional infusion pumps are not safe for use in the MRI scan room (Zone IV). MRI IV infusion workarounds can cause delays, hazards and infusion inaccuracies. Adding long IV extensions may reduce drug flow rate and increase the chance of a hospital acquired infection. Instead, use a non-magnetic1 IV infusion pump to more safely infuse critical medications in the MRI room.

Reduce your patient's time away from their care unit

Connecting the patient to an MRI infusion pump in their originating department streamlines the MRI workflow. Using the MRidium® with critical IV medications allow pump transfers to happen in a familiar and controlled environment.

The MRidium Dual Channel system

The MRidium 3860+ MRI IV Infusion System meets the demanding clinical needs of today's patients, by allowing continuous delivery of medications and anesthetics throughout the MRI care cycle. The dual system allows the simultaneous delivery of 2 IV drugs from a syringe, bag, or bottle fluid source in the MRI room suite.

Its light weight design (11.5 lb/5.2 kg) makes it easy to transport critically ill patients from ICU to the MRI department.

E8829TM/ E88191TM

MRidium IV Infusion Pump

The non-magnetic design allows the MRidium infusion pump to safely operate in the MRI room.

E8829TL/ E88191TL

MRidium Wireless Remote Control

(optional) The Wireless Remote eliminates delays caused by stopping the MRI scan to titrate or bolus by providing clinicians full operation from the MRI control room. It utilizes the same user interface as the 3860+ infusion pump.

Laser System

LAP® Laser Alignment System

- MR Simulation process helps localize, define and reconstruct a patient's tumor in 3 dimensions
- For MR simulation, the system consists of two moving lasers to project the coronal plane and two fixed overhead crosshair laser to project sagittal and axial planes
- Configured as a free-standing structure
- An innovative, absolute encoding system eliminates the need for any calibration
- Precision marking helps enable the radiation therapist to reproduce the treatment set up each day with a high degree of accuracy

Software

DynaCAD® Breast and Prostate Software by Invivo®

DynaCAD Breast

The DynaCAD software has been tailored to enhance your imaging workflow by providing:

- A large flexible workspace with custom hanging protocols
- Multi-vendor viewing capabilities
- Configurable worklists for easy study management

- It can be configured to automatically generate multi-planar reformatted (MPR) and maximum intensity projection (MIP) images
- The system can apply 3D image registration for correction of motion artifacts. The post-processed data is then available for viewing in one of DynaCAD's customized hanging protocols or can be automatically forwarded to a PACS archive

DynaCAD Prostate

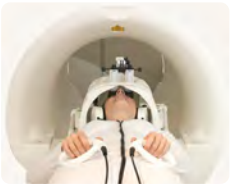

- Empowers radiologists with a comprehensive set of advanced visualization tools for real-time analysis, review, and reporting of studies
- Images can be transferred directly from the MRI to DynaCAD for automatic processing and customized display
- Upon case completion key images, statistical data, and prostate PIRADS reports can be automatically transferred to PACS for archiving
- Enhances your multi-parametric approach by calculating color overlay maps based on perfusion characteristics ADC and diffusion values
- Processes and creates ADC and interpolated high b-value image series for your review with a simple menu selection

Available in U.S. only.
Due to contractual obligations product may not be available through GE HealthCare in Canada, talk to your GE HealthCare representative about availability.

NordicNeuroLab fMRI Solution

Integrated hardware and software solution for clinical fMRI

The introduction of fMRI (functional Magnetic Resonance Imaging) as a clinical tool has added vital information to patient treatment and evaluation. By utilizing parallel imaging techniques, an fMRI exam can be completed in less than 30 minutes.

nordicAktiva – Stimulus presentation software

- Ready-to-use standard clinical paradigm library
- Includes library with pre-defined paradigms for language, motor, visual, auditory and cognitive tasks

NNL InroomViewingDevice

An easy to use alternative to conventional projectors or goggle-based image delivery systems.

E8825AA
(Available in U.S. only)

- 40'' LCD monitor
- 4K ultra high definition
- Height adjustable mobile stand
- Monitor can also be ceiling mounted (through third party)

NNL ResponseGrip

E8825AE
(Available in U.S. only)

- Ergonomically designed for use in either hand and ease of use for patient
- Two button, handheld ResponseGrip (two buttons per hand, index finger + thumb)
- Includes interface for monitoring responses in real time, cabling and fiber bundle

NNL SyncBox

Synchronizes image acquisition with fMRI stimulus delivery.

E8825AC
(Available in U.S. only)

NNL VisualSystem HD – Goggles

Includes everything needed to present visual stimuli inside the MR scanner

E8825AD
(Available in U.S. only)

- VisualSystem HD, Control Room Interface and all required cables for power and connection through an available waveguide
- Full HD resolution displays (1920 x 1200)
- Integrated binocular eye-tracking
- Support for 3D / Stereoscopic
- Built-in diopter- and pupil distance adjustment
- Diopter correction is -8 to +5
- Appropriate for both children and adults

Hardware and Stimulus Presentation Software

Available in U.S. only.
Due to contractual obligations product may not be available through GE HealthCare in Canada, talk to your GE HealthCare representative about availability.

MR Music Systems

MRI Audio Music System

The MRIaudio premium sound system is designed for comfort and allows the patient to listen to music while being scanned in an MRI. The technologist is in full control of the system headphones, microphone, sound source and volume controls. Standard 3.5 mm plug for music source allows any compatible music player, tablet or phone. In-ear headphones work with any head coil. The system is auto-voice compatible with GE HealthCare MRI systems.

Package includes:

- Digital amplifier
- iPad
- Adjustable iPad stand
- 3G transducer
- Over-ear MRI headphones, 29 dB noise reduction
- In-ear MRI headphones, 29 dB noise reduction
- Slimline over-ear MRI headphones (audio only, must be worn with earplugs)
- Disposable ear tips (300 pairs)
- Technologist's speakers
- 8 ft RCA 3.5 mm cable
- Auto-voice/MIC adapter

NeoCoil Guardian Wireless Audio System

The NeoCoil Wireless Audio system provides audio entertainment and facilitates communications between the patient and technologist. Wireless solution eliminates multiple cords and standard 3.5mm audio jack allows any compatible music source.

- Integrates audio entertainment, the technologist's voice, and AutoVoice for optimum patient communication
- MR conditional wireless audio system for use with high field MRI up to 3.0T
- Wireless solution operates on 3 batteries

E8800XA

Package includes:

- Wireless 29dB headphones (over-ear)
- Wireless audio interface for earbuds (in-ear)
- Wireless earbud assembly
- Disposable 29dB earbud inserts, 125 pair (250/pkg)
- Battery charging dock
- Audio cable, 3.5mm
- Rechargeable Individual Li-Po 3.7V Battery Packs (3)
- Wireless transmitter including couplers for penetration panel
- Technologist console interface
- Audio Source – Amazon® Fire® tablet, tablet stand, tablet lock, and (2) speakers

Newmatic MR Music/Sound System

Equipped for both patient and operator comfort, the MR Music/Sound System provides everything you need to relax your patients with music during their MRI scan. The MR Music/Sound System allows patients and technologists to listen to different music sources at the same time, and with the Dual Active Headsets, both the patient and a companion can wear headsets listening to the same source, allowing for encouragement and assistance when listening to the technologist's instructions.

Includes everything you need to get started:

- Re-engineered patient amplifier and transducer
- Custom mini iPad with downloaded Apps ready for music
- Anti-theft iPad stand
- High quality technologists speakers with a small footprint
- Push-button desktop microphone for easy communication with patient
- Includes all the necessary wiring
- NGHS29-10, ANSI approved NRR (Noise Reduction Rating) 29dB Noise Guard headset provides a comfortable listening experience
- NHS (Non-Headset) is designed for the tightest of head coils. Using this headset in conjunction with our ear plugs results in the required 29dB NRR. The non-headset has two 1" foam ear muffs which can be positioned at the patient's ear in a head coil (not pictured)

NOTE: this product is not compatible with GE HealthCare MRI system's auto-voice feature.

Newmatic Music System

E8822J

Although the Newmatic system is compatible with all GE HealthCare MRI systems, it does not support the Auto-Voice feature, which provides computerized voice prompts to assist patients with breath holds. As a result, an additional microphone is required and is included with the system.

E8822J

MR Awareness

MR Warning Signs

- Highly visible orange, black and white signs warn doctors, patients and hospital staff that they are approaching a high magnetic field
- Recommended for placement at the five Gauss line to warn people with pacemakers and other metallic implants to stay out of the magnetic field
- Mount warning signs at the entrance to the magnet room to alert everyone about dangers of loose metal objects, which may be pulled into magnet and become dangerous projectiles
- Silk-screened signs printed in fade-resistant ink on durable acrylic, with double-sided tape strips for quick and easy mounting
- Large-sized signs (12 × 19 in) are available in English and Spanish

MR Safety

We offer a few options of safety devices for MRI.

- Zone II protection – Wall mounted ferromagnetic detector: Accurately differentiates between both internal and external ferrous and non-ferrous metals, as only ferrous metals are of primary concern in the MRI environment. A proper scan takes 5-10 seconds as the subject makes turns in front of the device, with technologist/operator maintaining a safe social distance (Cat# E8810MB)
- Zone IV protection – Ferroguard Assure provides you with clear, simple, early warning of risk items approaching the magnet room. It gives you confidence that your FMDS will do its job when it really matters (Cat# E8810MD/MH)

Ferroguard Screener for patients – Zone II protection

Simple to adopt

An added layer of security to your standard screening process for added reliability.

Accessible for every budget

A must-have addition to your MRI safety procedures

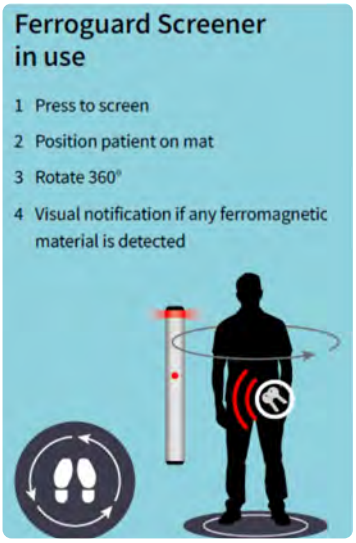

Entirely passive

Completely safe to use on all patients, including those with implants

The quality you expect

FMDS designed under ISO9001 international quality standards

Cat#	Description	Warranty
E8810MB	Metrasens Ferroguard Screener with Installation	H

Ferroguard Assure
Zone IV protection

Ferroguard Assure provides you with clear, simple, early warning of risk items approaching the magnet room, together with lowest audible alarm rates.

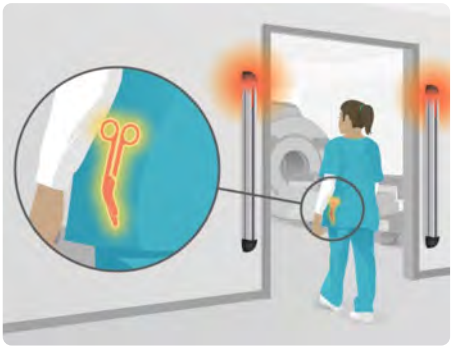

Trustworthy detection

Gives you confidence that your FMDS will do its job when it really matters. Ferroguard Assure is always on, always detecting, providing you time to react to prevent an incident.

Clear, simple alerts

Intuitive, eye-level, traffic light displays alert you to approaching risk items.

Smart audible-alert reduction

Ferroguard Assure's Smart Alarm™ can reduce audible alerts by 85%.* Never an alarm on exiting the room, or through door movement. It enables improved safety and workplace effectiveness with the lowest probability of alarm fatigue.

Designed for your facility

Constructed from ruggedized aluminum, built to survive the inevitable gurney collisions. Elegant styling, with a versatile design that enables optimal deployment for every layout.

Installation

Planning, installation, service and training performed by Metrasens factory-trained Ferroguard specialists.

Warranty

One-year limited warranty

Everything you need to get started

- 2 Ferroguard Assure detector systems
- 1 MRI Safety Manager Tablet w/mount and MRI Safety Suite Software Portal
- 1 Ferroguard Assure Hub unit (includes central processor and power supply unit, 100-240VAC)
- 1 installation kit suitable for installation with inward or outward opening MRI-room doorway

Cat#	Description	Warranty
E8810MD	Metrasens Ferroguard CENTURION Entry Control-Wall-mounted, includes installation, training and calibration	H

PET Annulus DQA (Daily Quality Assurance) Imaging Phantom

Designed exclusively for the Discovery™ MI, Discovery IQ PET and SIGNA™ PET/MR systems

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

E8008PN

Note: All pin, flood and phantom sources are non-returnable and non-refundable. Copy of site license must be provided before order can be filled.

Cat#	Description	Warranty
E8008PN	Daily Quality Assurance (DQA) Phantom for use with Discovery MI, Discovery IQ PET and SIGNA PET/MR systems	W
Compatibility: Discovery MI, Discovery IQ and SIGNA PET/MR systems		

Note: When not in use, secure this sealed source in a protected shielded area.
Should cleaning become necessary, use a cloth moist with mild soap and water.
Do not use strong organic solvents for cleaning plastic sources. Leak test annually.

VQC (Volumetric Quality Control) Imaging Phantom

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET/MR detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

Note: All pin, flood and phantom sources are non-returnable and non-refundable. Copy of site license must be provided before order can be filled.

MRI Retrofit LED Lighting

Looking for an alternative to incandescent lighting?

While LED bulbs are the natural replacement, not all LED bulbs are suited for MRI scan rooms. With our LED Replacement System, you can rest assured that our solution has been tested with GE HealthCare MRI systems and will not impact your image quality.

Quickly, easily and cost effectively transition to LED lighting in as little as 90 minutes* and 3 simple steps.

Solutions

Choose from 3 options, dependent on the number of zones in your lighting system.

- E8825BA — MR LED Bulb Retrofit Package, 1 Lighting Zone
- E8825CA — MR LED Bulb Retrofit Package, 2 Lighting Zones
- E8825DA — MR LED Bulb Retrofit Package, 3 Lighting Zones

Cat#	Description	Power Supply Specifications	Number of Bulbs Included	Number of Dimmers Included
E8825BA	MR LED Bulb Retrofit Package, 1 lighting zone	Power supply accommodates a single lighting zone (All lights in the space are wired to 1 switch)	12	1
E8825CA	MR LED Bulb Retrofit Package, 2 lighting zones	Power supply accommodates up to 2 lighting zones (Lights in the space are wired to 2 different switches)	12	2
E8825DA	MR LED Bulb Retrofit Package 3 lighting zones	Power supply accommodates up to 3 lighting zones (Lights in the space are wired to 3 different switches)	12	3
E8825EA	MR LED Bulb — 2 Pack	n/a	2	n/a

Everything you need to get started

- 1 Power supply
- 12 LED bulbs
- Dimmer (1, 2, or 3) depending on selection
- Phone support for installation

Note: Additional bulbs are available if you require more than 12 to complete your zones (Catalog # E8825EA — 2 bulbs per box)

E8825BA

In-Bore Viewing with PVD (Portable Video Display)

- This PVD is connected to power and the video source with a 25’ cable. The Patient uses a mirror suspended in the MRI bore or mirror Glasses to view the PVD behind the bore.
- The PVD can be connected to an MRI music system supplied by others
- Includes:
  - 1 32’’ PVD on a rolling cart
  - 1 system control rack with power supply (does not include integration module for lighting control)
  - 4 wall mounted speakers (provide audio in the scan room)
  - 1 touchpad user interface
  - 1 installation cable kit
  - 1 PVD RF filter pack
  - 1 Blu-Ray player
  - 1 wireless access point
  - 1 device adapter

E80331BE	Physician Mobile Armchair	H

Patient Transfer and Transport

MR Lightweight Gurney for Mobile Sites

- Non-magnetic, lightweight gurney for mobile environments
- Adjusts to six height levels for easy patient transfers
- Telescoping head-end main frame section allows gurney to be shortened for maneuverability around tight corners and spaces
- Includes (4) locking casters, 3 in thick orange pad and (2) sets of restraining straps
- Optional IV pole (E8805BF) can be permanently mounted; folds down when not in use
- Can hold (4) 1-liter containers and (2) transport IV pumps, with hook and loop closures
- Height adjustable from 32.75 to 48.5 in
- Replacement orange gurney pad (E8805BD) constructed of polyurethane foam pad with vinyl-coated nylon cover, measures 72 in (L) × 18 in (W) × 3 in (H). Cover is abrasion- and fire-resistant, bacteriostatic and resists blood and body fluids
- Maximum weight capacity of the gurney is 400 lbs

MR Child Positioner Kit

- Designed for ease of use and enhanced patient comfort, while still helping to reduce body motions during supine studies
- Diagnostic images and staff efficiency may be improved because the child's entire body is restrained
- Replacement pieces also sold separately

Complete kit (E8823MR) includes:

- (1) child positioner assembly (cradle only)
- (1) child positioner pad
- (3) sizes of child positioner head cushions
- (1) wide body strap - 39 in (L) x 10 in (W)
- (1) narrow body strap - 39 in (L) x 5 in (W)
- (4) wrist straps
- (3) head straps
- (6) foam sponges
- (1) child thick cradle pad

E8823MR (Positioner Kit)

Available in the U.S. only, as medical device registrations are not currently in place in Canada.

Cat#	Description	Warranty
E8823MR	MR Child Positioner Kit	H
Replacement Child Positioner Pads and Straps		
E8005AH	Child Positioner Body Strap – Narrow (EA)	H

MR Coils and Accessories

Endorectal Coils

Combines eCoil and GE HealthCare 8-channel HD Torso coil for phased array imaging of the prostate.

- Enhanced ability to visualize internal architecture of the prostate and periprostatic structures; including prostate capsule and neurovascular bundles

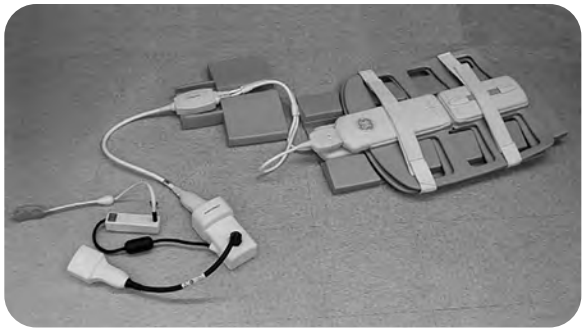

E8801R

Compatible with SIGNA™ Explorer, Optima™ MR450/MR450w, and SIGNA HDxt 1.5T

Interface Device for GEHC 1.5T System

- Compatible with 1.5T prostate eCoil
- Supports 8-channel HD Torso coil from GE HealthCare
- Provides high-resolution images leading to enhanced treatment planning
- May assist in tumor staging

E8801RG Torso coil is not included

1.5T Disposable Endorectal Coil — Prostate

- For use with the 1.5 T MR endorectal interface device (E8801RG)
- Disposable endorectal surface coil portion of SIGNA Endocavity Coil System for imaging of the prostate
- Single use, disposable coil for enhanced patient comfort and safety
- Coils are packaged 5 per box

Cat#	Description	Packaging	Warranty
E8801R	Disposable Endorectal Coil for SIGNA 1.5T – Prostate	5/Box	H

MR Earplugs

Honeywell® Maximum earplugs, Model MAX-1

- Offers excellent attenuation in a single-use earplug
- Polyurethane foam enhances comfort
- Bell shape for maximum in-ear comfort
- Smooth, soil-resistant skin prevents dirt build-up
- NRR 33 dB
- One size fits all
- Diameter: 12.76 mm
- Length: 23.63 mm
- Uncorded
- Orange
- Packaged 200 pairs/box

E8801BD
(Available in U.S. only)

MAXLite® Disposable Earplugs

- Bright green with smooth outer skin and tapered shape for easy insertion
- Special construction exerts less pressure on the ear than other expandable foam plugs, while still providing a high level of noise reduction
- Recommended for pediatric patients or patients with small ear canals
- Offers NRR 30 dB protection
- Packaged 200 pairs per box

E8801BC

Aearo Classic® Foam Disposable Earplugs

- Aearo Classic Foam are bright yellow, latex-free, hypo-allergenic polymer foam earplugs; custom fit to any ear canal by simply rolling and inserting into ear
- Recommended for patients or staff with medium to large ear canals
- Offers NRR 29 dB protection
- Packaged 200 pairs per box

Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and undervoltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.
- Configurations are available to support multi-modalities or even complete departments

Dynamic Sag Corrector

Dynamic Sag Corrector (DySC)

- Corrects for voltage sags at the system, department or facility level
- DySC is optimized for fast sag detection and response time (voltage detect time of 1 ms; sags are corrected with a peak voltage response time of 1.5 ms)
- A green power solution at > 99% energy efficiency, the DySC has no batteries and over time can offer lower cost of maintenance
- Smaller footprint and lighter weight than comparable (kVA) UPS systems
- Service Contracts offered by GE HealthCare
- Compatible with SIGNA™ Architect, SIGNA Artist, Discovery™ MR750, and Discovery MR750w/MR750 + GEM

E4505SJ

Cat#	Description	Warranty
E4505SJ	200 Amp (166 kVA) ProDySC Dynamic Sag Corrector (without installation)	Y

See Power Quality Compatibility Guide on page MR 57

Transformer

Transformer

- Meets or exceeds DOE 2016, NEMA TP-1, NEMA premium and DOD CSL-3 efficiency requirements
- Qualified to the seismic requirements of ASCE7.05, IEEE-693-2005 and IBC-2006
- UL Listed

Cat#	Description	Warranty
E4500TB	112.5 kVA Step Up Transformer – 208-480Y/277 Volt	Y

GE HealthCare Adventure Series – Customized Rooms

The GE HealthCare Design team will work with a small group of your hospital staff to create a custom layout and select themed graphics from the existing catalogs, or at times, create new appliques that fit the space and flow of each room.

MR

In today's crowded markets, standing out and creating a unique patient experience can be a key to success. While Adventure Series provides a range of creative options to choose from, GE HealthCare understands that some discerning facilities desire something even more unique.

For those of you seeking a product experience custom tailored to you and your facility, we are pleased to offer you the ability to customize your Adventure Series room. GE HealthCare will work with you through the custom design process to create the experience you envision.

Adventure Series can be customized for the following spaces:

- Scan rooms
- Hallways
- Waiting rooms
- Uptake rooms
- Cafeterias
- Stress Labs
- Exam rooms

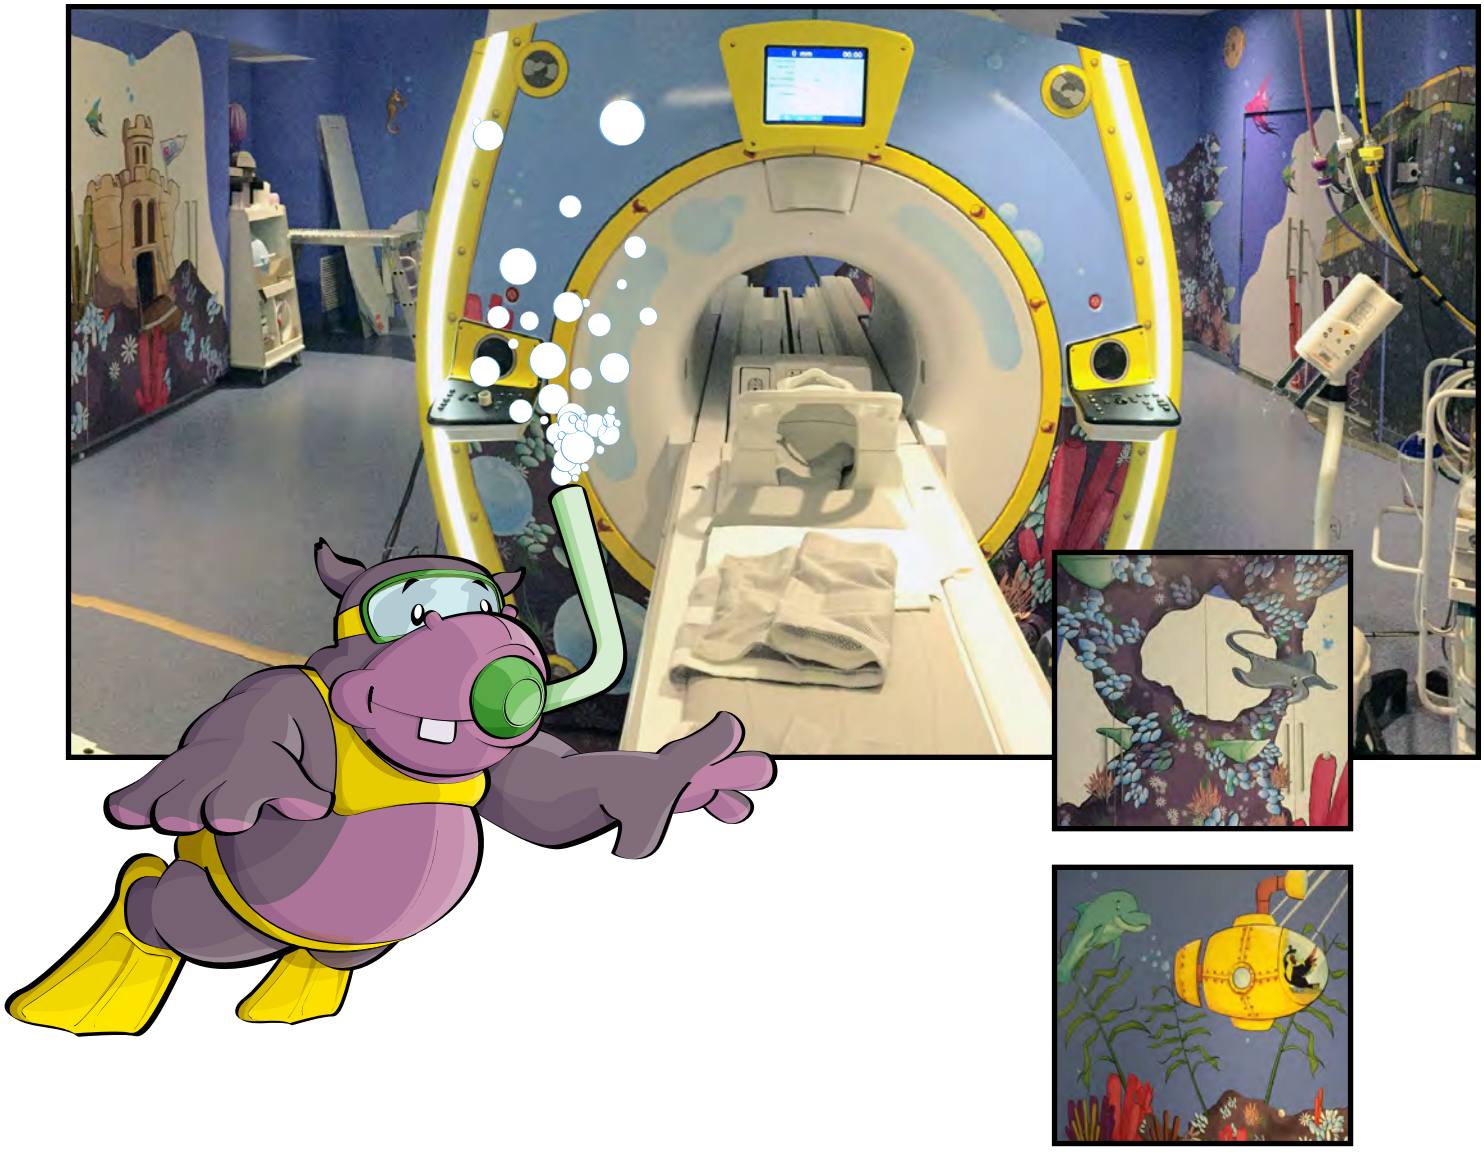

GE HealthCare Adventure Series for MR – Deep Blue Sea

Graphics are designed for use on smooth or textured/acoustic material walls

Cat#	Description	Warranty
E1500MZ‡	MR Deep Blue Sea for SIGNA™ Architect, SIGNA Artist, SIGNA PET/MR, Optima™ MR450w + GEM, Discovery™ MR750, and Discovery MR750w/MR750w + GEM	Y
E1500ZA	Adventure Series - Hawaii, Alaska, Puerto Rico, Canada Install	n/a

‡ MR Deep Blue Sea is not available for a ramped magnet room.

GE HealthCare Adventure Series for MR – Space Runway

Graphics are designed for use on smooth or textured/acoustic material walls

Please contact us for details. Our team can work with you to create an Adventure Series patient experience for your facility.

GE HealthCare Adventure Series for MR – Space Station

Graphics are designed for use on smooth or textured/acoustic material walls

Cat#	Description	Warranty
E1500MK	MR Space Station for SIGNA™ Architect, SIGNA Artist, SIGNA PET/MR, Optima™ MR450w/MR450w + GEM, Discovery™ MR450, Discovery MR750, and Discovery MR750w/MR750w + GEM	Y
E1500ZA	Adventure Series - Hawaii, Alaska, Puerto Rico, Canada Install	n/a

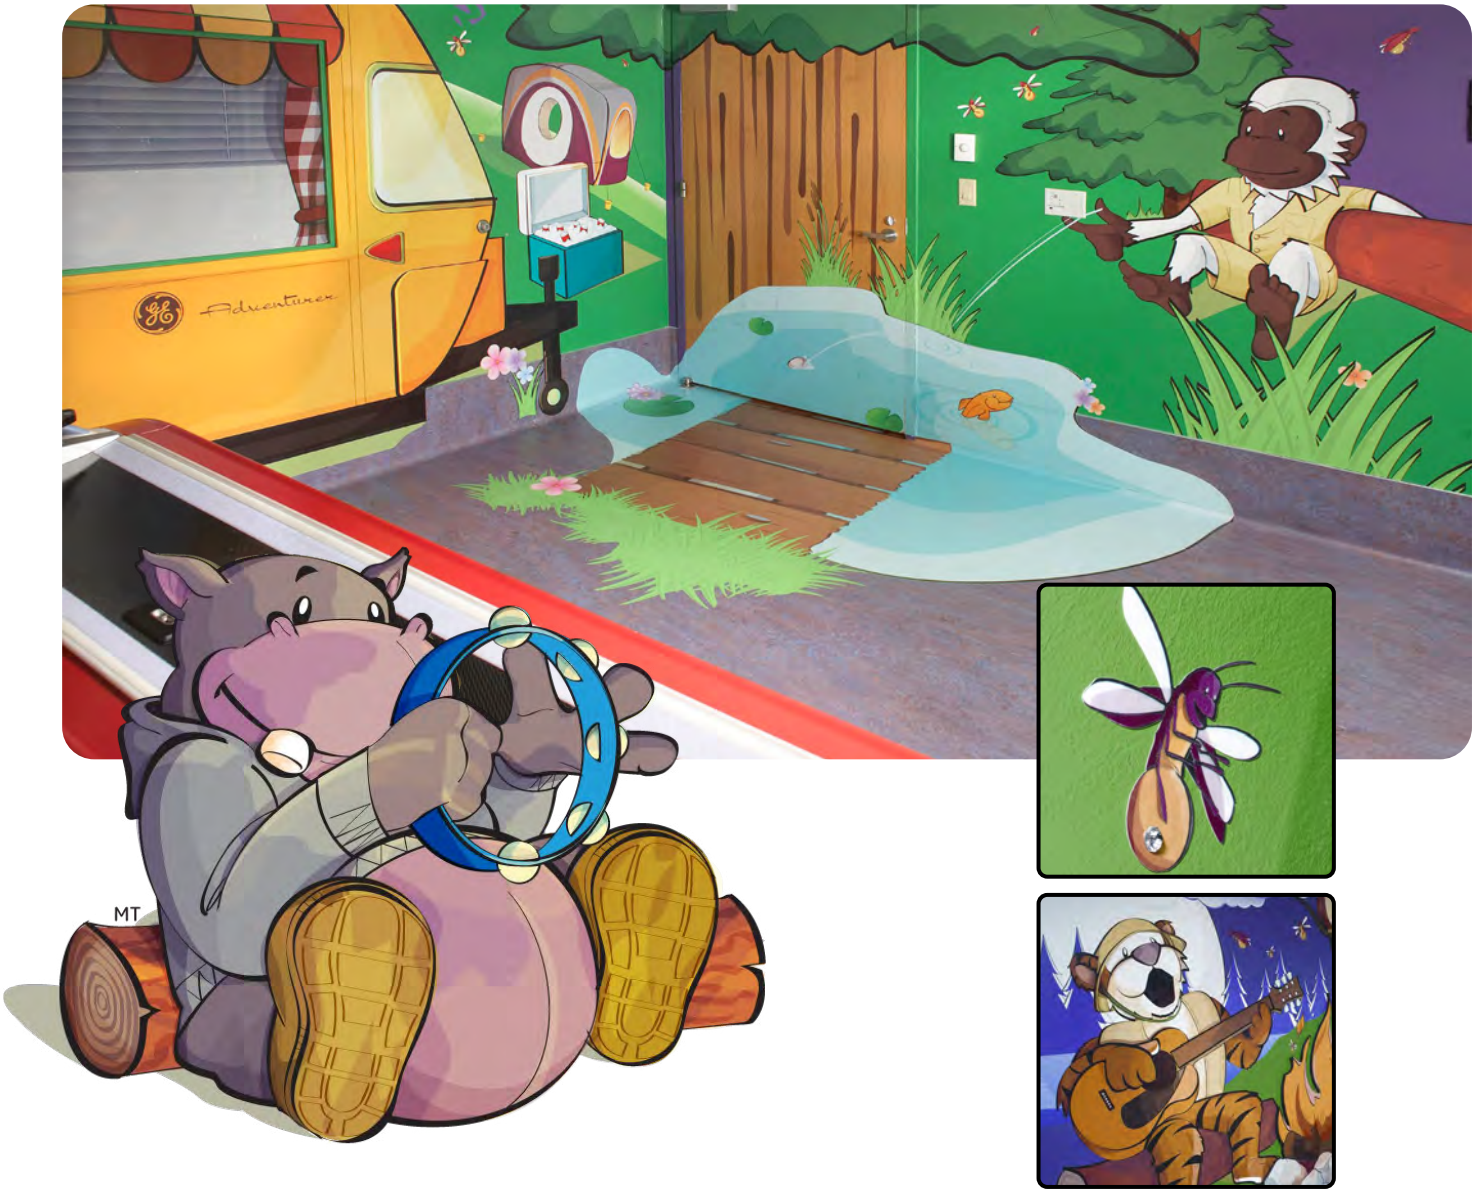

GE HealthCare Adventure Series for MR – Space Planetscape

Graphics are designed for use on smooth or textured/acoustic material walls

Please contact us for details. Our team can work with you to create an Adventure Series patient experience for your facility.

GE HealthCare Adventure Series for MR – Cub Camp

Graphics are designed for use on smooth or textured/acoustic material walls

Please contact us for details. Our team can work with you to create an Adventure Series patient experience for your facility.

Adventure Series
is also available for
CT, PET/CT,
Nuc Med & X-ray

Specifications

- All specifications are subject to change without notice
- The product and brand names herein are the trademarks or registered trademarks of their respective owners

Pricing

- Please call to obtain current pricing. All pricing and product availability is subject to change without notice
- Price invoiced will be the price in effect at the time of order entry
- Quotations available upon request

Blanket Purchase Orders

You can save time and money by ordering your consumable products with our Blanket Order program. Blanket orders must be scheduled for a year or more and a signed purchase order agreement must be on file. Contact us for additional details.

Restocking Fee

- Returns are subject to, but not limited to, a minimum 15% restocking fee
- Certain items, such as sterile and environmentally controlled products within this catalog, are non-returnable and nonrefundable unless defective and have been noted as such

Product Returns

- Immediately upon receipt, please inspect all deliveries for order accuracy and condition
- For products shipped in error, please obtain return authorization from the Accessories and Supplies Call Center within thirty (30) days of delivery
- Power Quality items are nonreturnable and nonrefundable

Medrad® Stellant FLEX® Injection System for Contrast Enhanced Mammography

The MEDRAD Stellant FLEX helps you meet your financial, clinical, and organizational goals, so that you can continue to deliver quality patient care while maintaining healthy business operations.

Stellant FLEX Injection System

- Compatible with GE HealthCare SenoBright HD Contrast Enhanced Spectral Mammography
- User-driven design and easy-to-use interface of MEDRAD Stellant FLEX guides efficient Mammography workflow
- Staff experience with FLEX Contrast Injection System drives satisfaction and standardization

Stellant FLEX Enhanced Benefits

- Accurate contrast dose administration for better visualization of abnormalities in breast tissue
- Consistent delivery of contrast for enhancement of tumor tissue
- Simple installation to minimize operational disruption
- Small, intuitive and easy to use design to maximize operability

Certegra® Workstation

From study set-up and preparation to study administration and results management, the Certegra Workstation serves as a workflow-centralized technologist interface to help users enhance efficiencies and patient care.

MEDRAD Stellant FLEX Configuration

Pedestal-mount configuration includes:

- Dual injector head on pedestal with integral IV pole
- Syringe heat maintainer
- Certegra Workstation with USB drive
- DualFlow software
- Base control unit
- 22.8 m (75 ft) head extension cable
- 7.6 m (25 ft) base to display cable
- Power cord
- Product information package
- Operations manuals
- Installation, customer's operational training at time of installation, and one year full on-site warranty in Bayer service countries

More Choices for Operational Efficiency

Options for Contrast Delivery

- 150 mL syringe option is offered in addition to the 200 mL syringe size for protocols that require higher volumes of contrast
- Syringe options offer you the flexibility to optimize contrast media use, reduce environmental impact, and cut the cost of waste disposal, all of which reduce operational costs
- **Colored beacon technology**
  A clear indication of the presence of fluid in the syringe with an orange colored identifier
- **MEDRAD FluiDots embedded on the syringe**
  Offers additional assurance of fluid in the syringe prior to injection
- **Ultra-clear barrel design**
  Further enhances the visualization of fluid to help prevent user error
- **2D barcodes**
  System uses barcodes to determine: syringe size, expiration date, if the syringe has already been used

Biopsy Solutions

Ultra DBI 3-in-1 Interventional Mammography Table

The Ultra DBI™ maximizes department space by incorporating upright and decubitus stereotactic breast biopsy, as well as mammography into one bariatric capable platform, increasing throughput and increasing continuity of care.

- Easy transition from chair to table provides an all-encompassing platform for varying patient population
- Accommodates both upright and decubitus positions for stereotactic breast biopsy, as well as mammography and breast ultrasound
- Can also be used as the IB contrast injection chair for CESM (Contrast Enhanced Spectral Mammography) or other interventional procedures
- Optional IV pole accessory for CESM exams
- Bariatric capable patient weight capacity of 500 lbs establishes continuity of care
- Reduce turnover time and increase throughput, even in small exam rooms, with interchangeable head and foot rests eliminating the need to reposition the table to accommodate each patient
- Optional battery for use when a plug-in outlet is not available

Mammography Biopsy Chair

The Hausted® Mammography/Biopsy Chair is designed for use as a procedural chair or treatment table during mammography/ biopsy procedures.

Versatility

- Self storing side rails allow the chair to maneuver into tight spaces
- Small footprint
- Can be used for per-induction, transport, treatment and recovery
- The pneumatic assisted back rest can adjust for supine to 90° for procedural positioning

E6315HD

Akrus Mobile Mammography examination chair

The Akrus chair is versatile and ergonomically designed for screening, diagnostic and biopsy imaging. It allows a variety of positioning options including upright and decubitus in all mammography projections including magnification views. The Akrus chair is a valuable addition to any facility.

Flexible positioning with minimal space impact.
Comfort and versatility

- Fully adjustable backrest to allow upright and decubitus positioning
- Adjustable shoulder segments, arm supports and headrest for support during decubitus imaging
- Lateral back support for decubitus positioning with additional patient comfort
- Trendelenburg position for vasovagal reactions

Functional design

- Electronic lift
- Three position braking system
- One rechargeable battery included for optimal mobility
- Small footprint perfect for any size suite

Cat#	Description
E10801PA	• Akrus Mobile Mammography examination chair (AK 5010 MBS) including Visco Elastic foam cushion padding, a laterally moveable head rest, fully adjustable backrest, footrest, battery and battery charger. • Standard color for this offering: Lilac (No other color option) • 1 Year warranty applies to the chair
E10801PC	Spare battery, rechargeable
E10801PD	Adapter for footrest

Rolling Table Cart

- May be used in a range of medical applications,including Mammography biopsy procedures
- Wheels allow the cart to be moved from room to room
- Locking casters offer stability when needed
- Height – 35.37 in / 898.5 mm
- Table Top Length – 18.6 in / 473.08 mm
- Table Top Width – 18.3 in / 464.18 mm
- Table Top Depth – 0.20 in / 5.08 mm
  (this is center/sides have more depth)
- Weight – 114.2 lb / 51.8 kg

E7058AC	Anti-Fatigue Floor Mat (Blue 2' x 3' x 5/8'') – 9 lb	H

Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and undervoltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.
- Configurations are available to support multi-modalities or even complete departments

Cat#	Description	Warranty length
Mammography UPS		
E4502JJ	Eaton 6 kVA, 208V, Single Phase UPS (Senographe Pristina only)	1 year from startup
E4502JV	Vertiv Liebert GXT5 10 kVA, 208VAC, 1 Phase, online double conversion UPS, with 3 years warranty	1 year from startup

Main Disconnect Panels

Main Disconnect Panels

• Main Disconnect Panels provide emergency shut down, undervoltage protection, overcurrent protection, OSHA lockout tag provisions, and serves as a local disconnect for the GE HealthCare Diagnostic Imaging System.

- Helps reduce installation time by providing a single-point power connection, eliminating the need to mount and wire a number of individual components
- Standardized design and testing helps ensure high product quality and system reliability
- UL and cUL listed for compliance with National Electric Code
- Surface or semi-flush mounting
- Please consult your GE HealthCare Field Engineer to determine if this is the appropriate product for your needs before purchasing

Cat#	Description	Warranty

Medrad™ Intego PET Infusion System

The Medrad™ Intego PET Infusion System is redefining PET by addressing the complexities of today and the challenges of tomorrow with operating a PET department. From providing personalized patient care, to reducing unnecessary radiation exposure to technologists, to driving improved practice economics. Utilizing a fully shielded, mobile design, the system infuses accurate, repeatable, patient-specific doses from a multi-dose vial, all managed through a simple touchscreen.

Improve Radiopharmaceutical Utilization

- Practical and precise weight-based dosing enables clinicians to prescribe a minimum acceptable dose for each unique patient
- Utilization of a multi-dose vial streamlines workflow, and creates opportunity for schedule compression and fewer radiopharmaceutical deliveries

Drive Operational Efficiency

- Automated dose preparation, administration, and documentation eliminates non-value added steps
- Mobile, with full battery operation streamlines processes and workflow

Enhance Practice Competitiveness

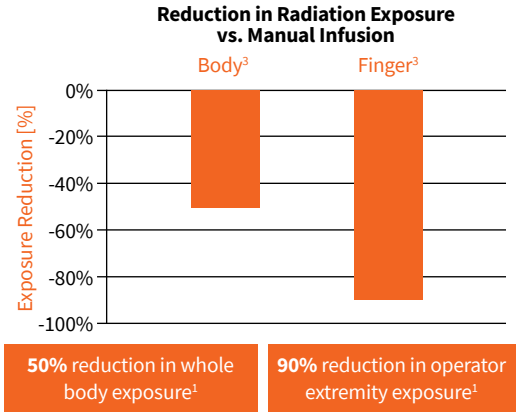

- Precise, personalized dosing differentiates Medrad Intego sites to the surrounding referral base
- Dose-on-demand functionality provides the flexibility to respond to late arriving patients or those with unmet prep conditions

Personalize Patient Care

- Automated weight-based dosing from a simple touchscreen enables clinicians to administer an accurate, personalized dose for each patient
- Variable flow rate (0.5 ml/sec or 1ml/sec) and saline test infusion support treatment for fragile veins

Cardiac Gating

IVY® 7800 Cardiac Trigger Monitor for CT, PET/CT and SPECT/CT

The Model 7800 is IVY Biomedical's fifth generation cardiac trigger monitor with the intended use primarily on patients in applications requiring precision R-wave synchronization. Incorporating a simple, easy to use touchscreen interface, the 7800 displays two simultaneous ECG vectors along with the patient's heart rate.

Intuitive Operation
Acquiring a trigger ECG can often be a challenging task, and selecting the right ECG vector can be problematic. The 7800's AUTO lead select feature (Trigger lead only) will determine which lead (I, II or III) provides for the best amplitude-to-noise ratio of the ECG signal and thus a more reliable cardiac trigger.

Patient Monitoring
When required, high and low heart rate alarm limits can be adjusted to bracket a patient's heart rate, so that a violation of these limits produces an audible and visual indication of the alarm.

Improved Communications
The Model 7800 has an electrically isolated Ethernet connector with 2 channels, enabling communication between the monitor and the external console, as well as the gantry display. An integrated USB drive allows users to store and retrieve ECG events for retrospective analysis.

Integrated Chart Recorder
Prints ECG strips on demand for manual review.

Precision Engineering
A color Trigger Mark clearly indicates the timing of each synch pulse with respect to the ECG, providing a visual reference for timing and synchronization.

ECG Viewer Software
Included on the USB drive is an easy to use ECG viewer specifically designed to enable detailed analysis of individual ECG.

Touch Screen Operation
Quickly adjust alarm limits, or make adjustments on the fly using the on-screen menus and buttons.

Configurations include everything you need to get started
The Kit includes:
7800 Cardiac Trigger Monitor, set of 4 RT (radiotranslucent) lead wires – 30 in, low noise patient cable – 4 lead, Ethernet Internet cables, ECG adult electrode (box of 40), cord-set hospital grade (12 ft), NuPrep Gel, USB Memory Stick, Recorder Paper, Roll Stand for model 7000 series and IPC cable.

IVY® 7600 Cardiac Trigger Monitor for Nuclear Medicine

The Model 7600 is IVY Biomedical's fifth generation cardiac trigger monitor with the intended use primarily on patients in applications requiring precision R-wave synchronization. Incorporating a simple, easy to use touchscreen interface, the 7600 displays two simultaneous ECG vectors along with the patient's heart rate.

Intuitive Operation
Acquiring a trigger ECG can often be challenging task, and selecting the right ECG vector can be problematic. The 7600's AUTO lead select feature (Trigger lead only) will determine which lead (I, II or III) provides for the best amplitude-to-noise ratio of the ECG signal and thus a more reliable cardiac trigger.

Patient Monitoring
When required, high and low heart rate alarm limits can be adjusted to bracket a patient's heart rate, so that a violation of these limits produces an audible and visual indication of the alarm.

Improved Connectivity
The Model 7600 has an electrically isolated RS-232 connector that provides two-way direct communications between the monitor and the external console for the transfer of ECG data. The Model 7600 is available with or without an integrated strip chart recorder.

Precision Engineering
A color Trigger Mark clearly indicates the timing of each synch pulse with respect to the ECG, providing a visual reference for timing and synchronization.

Integrated Chart Recorder
Optional recorder prints ECG strips on demand for manual review.

Touchscreen Operation
Quickly adjust alarm limits, or make adjustments on the fly using the on-screen menus and buttons.

Configurations include everything you need to get started
The Kit includes:
7600 Cardiac Trigger Monitor, set of 4 lead wires – 24 in, low noise patient cable – 4 lead, ECG adult electrode (box of 40), cord-set hospital grade (12 ft), Roll Stand for model 7000 series, BNC to BNC interconnect cable (12 ft) and phono to BNC interconnect cable.
(Cat# E8007DD includes 1 roll of paper loaded in the recorder).

Respiratory Gating

Varian RGSC 2.0 Respiratory Gating System

Respiratory Gating for Scanners (RGSC) from Varian Medical Systems is used to characterize the patient's respiratory patterns and monitor the patient position during diagnostic CT image acquisition. Using a single infrared camera and a reflector block, the system tracks the patient's respiration pattern, range of motion and provides recorded information to the scanner.

- Available in a couch-mount or wall/ceiling-mount configuration
- An integrated database with the ARIA® oncology information system and Eclipse™ treatment planning
- The software user interface is intuitive and helps simplify the image acquisition and treatment delivery process

Laser Systems

LAP Laser DORADOnova 3 Laser System

The DORADOnova® 3 laser system together with the LAP laser CARINAnav® control supports the crucial and important marking process and conforms to your department's workflow. You select the mounting version and the laser color. Offering various configurations and mounting options, the system is designed to meet any and all room requirements.

LAP Laser DORADOnova 3 Laser Control

DORADOnova laser systems are operated by CARINAnav®, consisting of hardware and software. With CARINAnav®, LAP provides you a control system to move the lasers and interact with your RT planning system. Once connected to your RT planning or virtual simulation system the data can be imported via LAP file format or DICOM.

CARINAnav® – Intuitive, Easy, Portable

CARINAnav's tablet PC is a portable wireless laser control system in a compact design. Patient data is imported via Bluetooth or Wi-Fi interface.

CARINAnav® has been designed to be the platform for future laser alignment tasks. Modular thinking and open design offer the base for developing solutions covering the requirements to come.

- Portable – Move to your preferred working location
- Flexible – Select patient data, enter this data or move the lasers manually
- Intuitive – Touchscreen navigation allows for quick startup and auto reconnect
- Secure – User login required and permanent laser position feedback

CARINAnav

Flat Table Tops

Elekta iBEAM evo CT Overlay

- Equivalent geometric and dosimetric configuration to iBEAM® evo Couchtop
- Integrated indexing system compatible with a wide range of existing surface mounted industry standard accessories
- Designed to help reduce image artifacts
- Quick and easy installation and removal of the iBEAM evo CT Overlay

The iBEAM® evo CT Overlay facilitates new potentials for treatment planning and simulation. The iBEAM evo CT Overlay is identical in design, geometry and dosimetric properties with the iBEAM evo Couchtop and offers the total departmental solution in combination with an iBEAM evo Couchtop (installed on the LINAC table).

The integrated indexing system:

- Optimizes patient positioning accuracy and reproducibility, reducing patient setup time, minimizing patient setup inaccuracies further in the treatment chain and maximizing the stability of positioning devices

E8819LA

Specifications	
Material	Carbon-fiber sandwich with foam core
Weight	11 kg (24 lb)
Dimensions (Length x Width)	2000 mm x 530 mm (79 in x 21 in –approx.)
Indexing	BodyFIX 14 indexing system
Estimated Useful Life	10 years
Non-Compatibility	Not compatible with Varian couch-mount respiratory gating systems

Cat#	Description	Warranty
E8819LA	Elekta iBEAM evo CT Overlay - includes iBEAM CT Overlay, iBEAM evo extension 415, and indexing bars (set of 3)	C
Compatibility: Discovery CT590 RT, Optima CT580 RT, Discovery RT, Discovery MI/MI DR, Discovery Max, Omni Legend		

CQ Medical® Couchtop™

CQ Medical (formerly CIVCO RT™ and Qfix®) couchtops are constructed of rigid carbon fiber and have indexing points running down the side.

These indexing points make it possible for facilities to offer accurate and reproducible patient positioning from imaging room to the cancer treatment room.

One-stop shop

Purchasing a CQ Medical Couchtop through GE HealthCare guarantees a verified product for a GE HealthCare system. From the simplified ordering process to coordinated delivery and install, we offer a onestop shop that makes it simple and easy for the customer.

Couchtop positioning

The CQ Medical Couchtops are designed to fit multiple GE HealthCare global tables and on most tables, it will be shorter than the cradle. Position the couchtop per the Users Manual.

3000 Series Overlays

- Economical radiation removable couchtop with 14 cm indexing
- Compatible with RGSC and RPM camera mount
- Not compatible with Varian VCD mount

Catalog # E8505MJ

Table compatibility: GT 1700, GT 2000, GT 2000X, NG table, GT PET

Dimensions (L x W x H): 2175 x 530 x 74 mm (85.63 x 20.87 x 2.93 in)

E8505MJ	CQ Medical CT Overlay for GE HealthCare CT & PET/CT systems, (2175 x 530 x 74 mm (85.63 x 20.87 x 2.93 in); features Prodigy indexing and includes Prodigy™ Lok-Bar (53 cm) and 1 year manufacturer warranty	L
E8505MF	CQ Medical CT Overlay for GE HealthCare PET/CT systems with H-Power table, (2661 x 530 x 72 mm (104.75 x 20.87 x 2.83 in)); features Interloc indexing and includes Interloc Lok-Bar (48 cm) and 1 year manufacturer warranty	L

Compatibility: See the Reference Table on page 18

6000 Series

The CQ Medical Universal Couchtop 1 Piece is an excellent IGRT and SBRT solution with a uniform design and no junctions. This couchtop offers a dosimetrically matched couchtop for most major CT and Linac models.

- No extension or seams
- Low attenuation and surface dose
- Economic option for facilities with multiple linear accelerators and CTs
- Allows for attachment of Body Pro-Lok ONE SBRT bridges and accessories for SBRT Immobilization
- No overlays required when using Body Pro-Lok ONE SBRT. Overlays required for thermoplastic devices
- Clear scanning area is 50.02 in (1270 mm) length portion of the couchtop

Catalog # E8516AA

Table compatibility: GT 1700

Dimensions (L x W x H): 2198 x 530 x 50 mm (86.53 x 20.87 x 1.97 in)

E8516AA	CQ Medical Universal Couchtop 1 Piece, for GT1700 table; (2198 x 530 x 50 mm (86.53 x 20.87 x 1.97 in); includes carbon fiber indexable couchtop, mounting hardware, Prodigy 2 Lok-Bar and 5-year manufacture warranty	ZZ
E8516AC	CQ Medical Universal Couchtop 1 Piece, for GT2000 table; (2452 x 530 x 50 mm (96.53 x 20.87 x 1.97 in); includes carbon fiber indexable couchtop, mounting hardware, Prodigy 2 Lok-Bar and 5-year manufacture warranty	ZZ
Compatibility: See the Reference Table on page 18		

6000 Series

The UCT LE (Universal Couchtop Long Extension) is a comprehensive solution for enabling advanced treatments in your clinic. Specifically designed to answer the demands of IGRT delivery, the CQ Medical LE contains no rails or junctions in the treatment area to help facilitate better dose delivery and target coverage. This couchtop is dosimetrically matched for most major CT and Linac models.

- Self-locking extension seam located outside of treatment field • Low attenuation and surface dose
- Allows for attachment of Body Pro-Lok ONESBRT bridges and accessories for SBRT Immobilization
- No overlays required when using Body Pro-Lok ONE SBRT or thermoplastic devices
- Clear scanning area is 47.14 in (1197 mm) length portion of the couchtop

Catalog # E8516AB

Table compatibility: GT 1700

Dimensions (L x W x H): 2198 x 530 x 50 mm (86.25 x 20.87 x 1.97 in)

Catalog # E8516AD

Table compatibility: GT 2000

Cat#	Description	Warranty
E8516AB	CQ Medical UCT LE (Universal Couchtop Long Extension), for GT1700 table; (2198 x 530 x 50 mm (86.25 x 20.87 x 1.97 in); includes carbon fiber base with carbon fiber rectangle extension, mounting hardware, Prodigy 2 Lok-Bar, Storage Rack and 5-year manufacture warranty	ZZ
E8516AD	CQ Medical UCT LE (Universal Couchtop Long Extension), for GT2000 table; (2452 x 530 x 50 mm (96.25 x 20.87 x 1.97 in); includes carbon fiber base with carbon fiber rectangle extension, mounting hardware, Prodigy 2 Lok-Bar, Storage Rack and 5-year manufacture warranty	ZZ
Compatibility: See the Reference Table on page 18		

See page MI 17 for optional extensions available.

CQ Medical® UCT LE Optional Extensions

Full flexibility with many extension options to help facilitate patient imaging, simulation and treatment. These extensions feature a unique profile allowing for direct attachment of all CIVCO Body Pro-Lok SBRT bridges, Solstice™ and trUpoint ARCH™ SRS/SRT Systems, and head & neck thermoplastics.

Wired Rectangular

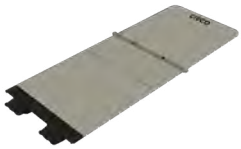

- An embedded wire rectangular extension option is available to assist with patient alignment. The standard rectangular extension is provided in the GE HealthCare offering

Red lines in image shows wire location.

Kevlar

- Compatible with Varian's Calypso® System

Type-S™

- Compatible with Solstice™ SRS System and Type-S Thermoplastics including ClearVision™ open face masks designed for use with vision/ camera systems

Grid

- Helps minimize surface dose and skin reactions

Posifix®

- Compatible with Solstice and trUpoint ARCH SRS/SRT Systems and Posifix Thermoplastics

UCT Head

- Extends the patient an additional 17 cm

ProForm™

- Unique head & neck patient immobilization solution for proton therapy

End Plates for Varian

- Allow the use of various QA devices

To order the Optional Extensions contact CQ Medical at:
Phone: 800-842-8688 (US/Canada) **Email:** info@CivcoRT.com

Diacor Flat Tabletop

- The Flat Tabletop, or “CT Overlay,” provides a secure, flat surface for CT Simulation applications, consistent with the treatment couch, for accurate and reproducible patient positioning
- Varian Exact technology and indexing immobilization patient positioning system along entire length of the overlay
- Carbon fiber construction with foam core provides a durable, lightweight device with outstanding imaging properties
- Easily locks and unlocks from the CT Table, providing easy transition between therapy and diagnostic procedures
- Measures 85.25 in (L) × 20.87 in (W) × 1.62 in (H)

Software

MIM Software

We offer a wide variety of MIM software.

- Radiation Oncology – Maestro, Contour Protege AI+, Symphony LDR, MIM Assistant and RT PACS
- Nuclear Medicine – Encore, SurePlan Liver Y90, SurePlan Liver Y90 with ReCon, SurePlan MRT, Lesion ID Pro, Neuro
- Storage Server and Camera Fee – Storage Server with Assistant Camera Fee
- Support – Onsite installations and training

Implementation Services Include (as required): • Consultations with clinical staff to create implementation requirements • Workflow customization and deployment • MIM Assistant configuration for automatic study processing • Contour nomenclature standardization • Report template customization • LDAP user authentication, account creation, and deployment of default user configurations	E85101MM	IMP-NM	MIM Software – Implementation Services (IMP)	n/a	Qty = variable	n/a	Multiples of $5000

INVIA 4DM Software

Quantifies perfusion and function

In simplified terms, 4DM assigns values to parts of the heart based on how much blood the heart muscle retains at rest vs stress – perfusion – and how well the heart expands and contracts at rest vs stress – function.

This quantification enables physicians to assess a patient's cardiac health by reviewing patient images and 4DM values all in a single, convenient, and configurable application. Integrated reporting – within 4DM or with your PACS platform – further streamlines the workflow.

4DM fits seamlessly into your current nuclear imaging workflow, receiving data from PET and SPECT cameras and exporting to PACS and EMRs.

- 1-day onsite training
- Training available in English and French language only

CCTV System

Closed Circuit TV System

This closed-circuit TV camera package allows for visual monitoring of your patients during their scans and now features an optional integrated recording feature for high-risk patients and for security purposes. Ceiling or wall mounted fixed camera is unobtrusive and transmits high-quality color images in real time to the operator's console where a 17 in TFT LCD monitor is located. A dual camera system is also available allowing split-screen viewing by the technologists to see both the front and back sides of the bore simultaneously.

CCTV System includes:

- 17 in TFT LCD color monitor
- Compact color camera(s) with lens
- Signal interface box
- Exterior-mount power supply
- Mounting brackets for camera(s)
- Set of 3 cables: 10 ft, 40 ft, 100 ft
- Remote control

Phantoms

PET Annulus DQA (Daily Quality Assurance) Imaging Phantom

Designed exclusively for the Discovery™ MI, Discovery IQ PET and SIGNA™ PET/MR systems

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

E8008PN

Cat#	Description	Warranty
E8008PN	Daily Quality Assurance (DQA) Phantom for use with Omni Legend, Discovery Max, Discovery MI/MI DR, Discovery IQ PET and SIGNA PET/MR systems	W
E8008PV	Daily Quality Assurance Phantom for Omni Legend, Omni Total Body, Discovery Max and Discovery MI system Gen2 6 ring (30 cm)	W

Note: When not in use, secure this sealed source in a protected shielded area. Should cleaning become necessary, use a cloth moist with mild soap and water. Do not use strong organic solvents for cleaning plastic sources. Leak test annually.

VQC (Volumetric Quality Control) Imaging Phantoms

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET or CT detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

E8008PC/E8008P

Cat#	Description	Warranty
E8008PC	Volumetric Quality Control Phantom for use with Omni Legend, Omni Total Body, Discovery Max and Discovery IQ PET system 2 ring (10 cm) detector	W
E8008P	Volumetric Quality Control Phantom for use with Omni Legend, Omni Total Body, Discovery Max, Discovery MI/MI DR and Discovery IQ PET system 3, 4, 5 Gen2 6 ring (15 cm, 20 cm, 25 cm, 30 cm) detectors and Discovery 710, 690, 610, 600 and Optima 560	W

VQC (Volumetric Quality Control) Imaging Phantom

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET/MR detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

E8008PM

Cat#	Description	Warranty
E8008PM	Volumetric Quality Control (VQC) Phantom for use with the SIGNA PET/MR system	W
Compatibility: SIGNA PET/MR system		

Volumetric Quality Control (VQC) Modules

- Make sure you're getting the most from your GE HealthCare system by checking it with our custom designed imaging phantoms
- Recommended for accurate calibration of your PET/MR detector and easier quality control
- Designed to be held in place during use by standard source holders provided with scanning equipment
- No mechanical maintenance is required

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

E8008PE

Cat#	Description	Warranty
E8008PE	SIGNA PET/MR Volumetric Quality Control (VQC) modules – Germanium-68, 3/set PET spheres	W
Compatibility: SIGNA PET/MR system		

PET Annulus Phantom Shield Containers

Catalog # E8008PS/E8008PT/E8008PW

- Lid features a handle for easier opening
- Spring loaded covered hinge assists when lifting the lid
- Container latch seals the phantom inside to ensure radiation gaps are eliminated
- Latch includes option to use a padlock to secure the phantom in the container
- Gusset holes allow the facility to secure the shield to the site with a chain or cable
- The container's interior walls feature a soft plastic for easier insertion and removal of the phantom
- Weight — approximately 300 lb/136 kg

WARNING: The PET Annulus Phantom Shield Container should not be taken into an MRI environment.

E8008PT

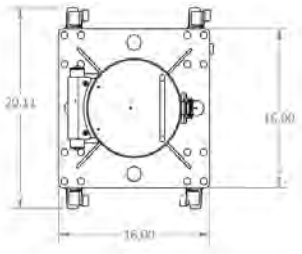

E8008PS

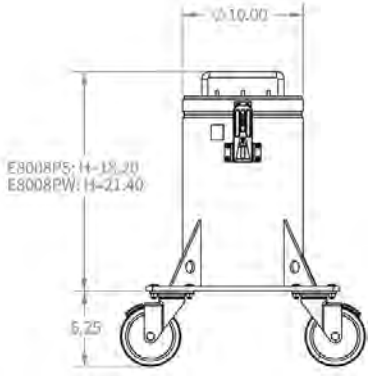

Phantom Shield Container without wheels (Cat # E8008PT)

- Mobile applications phantom shield does not have wheels so it can be bolted directly to the MMU (Mobile Medical Unit) floor
- Shield features foam cushioning on the lid's top and container's bottom as required for mobile applications
- Lid may be secured in the closed position for mobile transportation using the integrated knob

Phantom Shield Container with wheels (Cat # E8008PS/E8008PW)

- Wheels feature swivel castors for easy mobility and wheel locks for added stability

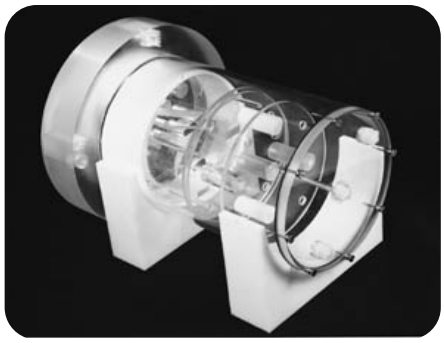

Cat#	Description	DQA Phantom Compatibility	System Compatibility	Warranty
E8008PS	PET Annulus Phantom Shield Container, with wheels (use with E8008PN)	E8008PN	SIGNA™ PET/MR, Omni Legend, Discovery Max Discovery™ MI/MI DR and Discovery IQ PET	K
E8008PT	PET Annulus Phantom Shield Container, without wheels (use with E8008PN)	E8008PN	SIGNA PET/MR, Discovery MI/MI DR and Discovery IQ PET	K
E8008PW	PET Annulus Phantom Shield Container, with wheels (use with E8008PV)	E8008PV	Omni Total Body, Omni Legend (32 cm), Discovery Max and Discovery MI Gen2 6-ring (30 cm)	K

NOTE: Lead shielding thickness to maintain and not exceed 2.0 mRem/hr. radiation dose on any external surface using maximum source activity of 66 MBq.

CT Performance Phantom

- Measures 9 separate performance parameters with just 1 device
- Permits the routine standardization of alignment, beam width, special uniformity, linearity/contrast, spatial resolution, linespread, noise, size independence and absorbed dose
- All components of the phantom are housed in a compact, transparent tank which holds the system together in the correct orientation
- Measures 15 in (L) x 8.5 in (W)

E8008D

Cat#	Description	Warranty
E8008D	CT Performance Phantom	H

StarGuide™ QC/Calibration Source

- The source was created specifically for StarGuide to be used during installation, calibration and as the daily quality control
- The source is encapsulated into a concentric plastic tube interfacing with a mounting jig to the system table. The source's mounting jig is supplied with the system

E8690AG / E8690AS

StarGuide™ Storage Case

- The lead shielded storage case is customized for the Star Guide Co57 QC/ Calibration source (catalog# E8690AG) and jig
- Dimensions: Approx 26 in (L) x 16 in (W) x 4.5 in (D)
- Weight: 29 lbs (13 kg)
- Lead Lining thickness: nominal 1/8 in (0.13 in)

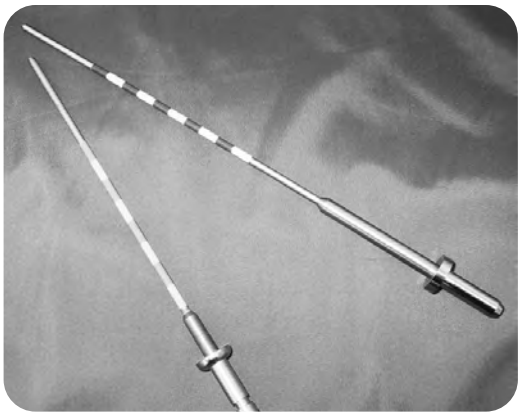

E8690AH

Cat#	Description	Warranty
E8690AG	StarGuide QC/Calibration Co57 source and an encapsulating plastic tub	H
E8690AS	20mCi Co57 Line Source and an Encapsulating Plastic Tube for StarGuide GX SPECT/CT	
E8690AH	Lead shielded storage case for StarGuide Co57 Calibration/QC source and holding jig	K

PET Pin Sources

Isotope Products Laboratories Ge-68 Pin Sources

- Utilized to calibrate PET scanner systems
- Used as a transmission standard to provide a tissue density correction to permit accurate diagnostic scanning of patients
- Ge-68 uniformly dispersed in a ceramic medium with an outer stainless tube and permanently sealed end caps

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

Cat#	Description	Warranty
E8690AA	Advance Transmission Pin Source	H
E8690AB	PET Advance/Discovery LS Normalization Pin Source	H
E8690AD	Discovery ST Pin Source	H
E8690AE	Discovery 690 Pin Source	H
E8690AF	Discovery 600 Pin Source	H
Reference: See Pin Sources & Phantoms Reference Guide on page 31		

Flood and Pin Sources

Co-57 Cobalt Flood Sources

- Recommended for accurate calibration of your camera and easier quality control
- Isotope Products Laboratories (IPL) Co-57 flood sources are manufactured and 100% tested to have a coefficient variation of less than or equal to Â±0.7%, and integral uniformity of less than or equal to Â±1.7%. NOTE: Gamma imaging procedures require less than or equal to Â±1% coefficient variation
- Co-57 photon energies simulate Tc-99m
- Used to test uniformity of gamma cameras
- Co-57 flood sources contain Cobalt-57 uniformly dispersed in an epoxy medium fully sealed in a high-integrity polymer encapsulation
- Radio nuclide purity is greater than 99.9% (exclusive of Cobalt-56 and Cobalt-58, < 0.15% combined)
- Shielded carrying case for easy storage; cases have casters that allow opening and source access without lifting. Lead shielding minimizes personnel exposure and reduces background radiation levels

Note: All pin, flood and phantom sources are non-returnable and non-refundable.
Copy of site license must be provided before order can be filled.

Slickers and Equipment Covers

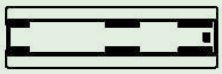

MI Table and Footswitch Slickers

- A slicker cushion is foam material (2.54 cm/1 in thick) fully encased in a protective vinyl slicker cover
- Easy to install and comfortable for patients
- Will not interfere with normal operation of the table
- Clear PVC plastic facilitates faster cleanup of blood and fluids
- Prevents contaminate buildup in hard to clean areas
- Thermosealed seams and flaps
- Footswitch slickers and table skirts help protect electronics
- Footswitch slicker includes Velcro® for secure fit

Table Pads and Straps

Table Pads – GE HealthCare Nuclear Medicine Systems

- Quality replacement table pads for your GE HealthCare Nuclear systems, covered in durable gray Naugahyde® material to match originals
- Table pad set (E8500JN), covered in gray Naugahyde material, includes:
  - (1) Table Pad (E8500JK), measures 0.5 × 17 × 66 in
  - (1) Extender Pad (E8500JL), measures 0.5 × 17 × 19 in
  - (2) Piece Naugahyde Strap Set (E8500JM), measures 3 × 74 in and 5 × 74 in with Velcro hook closures
- Replacement pieces also sold separately

Arm and Leg Rests for Nuclear Systems

Patient Arm Support

- Comfortably supports a patient's arms during various diagnostic and therapeutic medical procedures
- Engineered with flexibility to fit most imaging tables
- Helps improve productibity and increase technician's efficiency
- Includes (2) disposable pillows, (2) mounting straps and (1) hand held strap
- Dimensions – 21 in (W) x 13 in (D) x 9 in (H)

E8500NA

Cat#	Description	Warranty
E8500NA	Patient Arm Support	H

Patient Arm and Leg Rests

Catalog #E8500NB – Patient Armrest

- Suited for applications or imaging systems that demand narrow supports
- Hand strap included for patient comfort
- Black coating
- Flat base
- Includes (2) disposable pillows with cases
- Dimensions – 18.5 in (W) x 15 in (D) x 8 in (H)

Catalog #E8500NC – Contoured Leg Rest

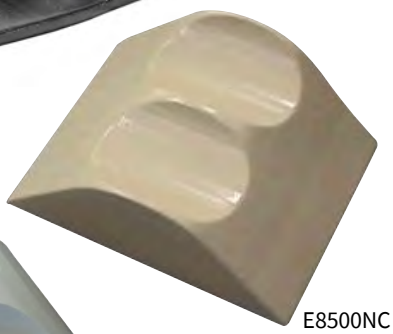

- Designed to accommodate many patients
- Contoured Leg Rest helps prevent low back stress and pain that occurs during supine imaging and treatment
- Compatible with most Nuclear Imaging systems and may also be used in CT and PET applications
- Constructed with a comfortable, full support polyfoam with a seamless coated finish
- Dimensions – 13 (W) x 17 (D) x 7 (H) in

Catalog #E8500PC – Patient Leg Rests (3/set)

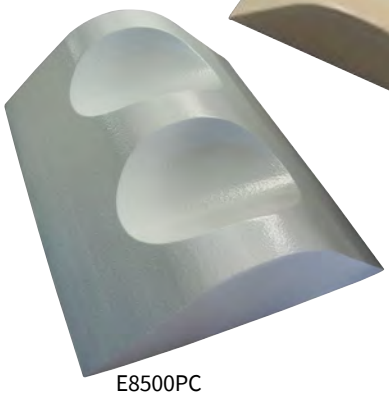

- 3 piece set of patient leg rests – 5, 7 and 10 in (H)
- Constructed with a comfortable, full support polyfoam with a seamless coated finish

Patient Transfer and Transport

Patient Transfer Boards

- Flexible patient transfer board – $^{3}/_{16}$ in high density polyethylene
- Narrow transfer board 18.25 in (W) × 73 in (L) × 0.5 in (H), includes four 1.5 × 16 in security straps
- Wide transfer board 23 in (W) × 73 in (L) × 0.5 in (H), includes four 1.5 × 16 in security straps
- Transfer board hanger can hold up to 5 patient transfer boards, either wide or narrow or both; includes mounting hardware

Cat#	Description	Warranty
E6328BF	Transfer Board Hanger	H
E6328BG	Transfer Board – Narrow	H
E6328BH	Transfer Board – Wide	H

Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and under voltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.
- Configurations are available to support multi-modalities or even complete departments

Dynamic Sag Corrector

Dynamic Sag Corrector (DySC)

- Corrects for voltage sags at the system, department or facility level
- DySC is optimized for fast sag detection and response time (voltage detect time of 1 ms; sags are corrected with a peak voltage response time of 1.5 ms)
- A green power solution at > 99% energy efficiency, the DySC has no batteries and over time can offer lower cost of maintenance
- Smaller footprint and lighter weight than comparable (kVA) UPS systems
- Service Contracts offered by GE HealthCare

E4505SJ

Cat#	Description	Warranty

Main Disconnect Panels

Main Disconnect Panels

- Main Disconnect Panels provide emergency shut down, undervoltage protection, overcurrent protection, OSHA lockout tag provisions, and serves as a local disconnect for the GE HealthCare Diagnostic Imaging System.
- Helps reduce installation time by providing a single-point power connection, eliminating the need to mount and wire a number of individual components
- Standardized design and testing helps ensure high product quality and system reliability
- UL and cUL listed for compliance with National Electric Code
- Surface or semi-flush mounting
- Please consult your GE HealthCare Field Engineer to determine if this is the appropriate product for your needs before purchasing

AC Lighting Controllers

AC Lighting Controllers

- "X-ray in Use" warning and room lighting control panel provides a low voltage interface between the "X-ray in Use" warning lights, interior room general lighting systems and the system
- Convenient, push on/off pre-wired footswitch for control of room general lighting
- Enhances servicing safety by the use of a low voltage interface circuit between the imaging system and the line voltage lighting system

GE HealthCare Adventure Series – Customized Rooms

The GE HealthCare Design team will work with a small group of your hospital staff to create a custom layout and select themed graphics from the existing catalogs, or at times, create new appliques that fit the space and flow of each room.

In today's crowded markets, standing out and creating a unique patient experience can be a key to success. While Adventure Series provides a range of creative options to choose from, GE HealthCare understands that some discerning facilities desire something even more unique.

For those of you seeking a product experience custom tailored to you and your facility, we are pleased to offer you the ability to customize your Adventure Series room. GE HealthCare will work with you through the custom design process to create the experience you envision.

Adventure Series can be customized for the following spaces:

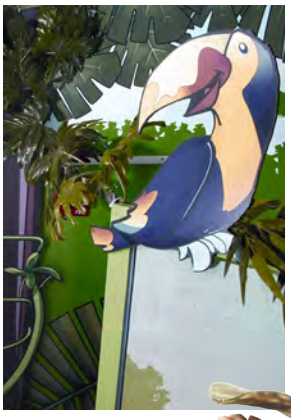

- Scan rooms
- Hallways
- Waiting rooms
- Uptake rooms
- Cafeterias
- Stress Lab
- Exam rooms

GE HealthCare Adventure Series for PET/CT – Cozy Camp

Cat#	Description	Warranty
E1500PA	PET/CT Cozy Camp for Discovery 600/690 & Discovery IQ systems	Y

ABUS System Consumables

ABUS Membranes

The ABUS disposable scan membrane provides comfort to the patient during the 3D image acquisition. The flexible, polyester, mesh fabric stabilizes the breast tissue and enables better image quality during the scan. The membrane is single-use-only which eliminates the risk of cross-contamination and the need for sterilization.

ABUS Single-Use Stabilization Membrane for Invenia™ ABUS 2.0, Invenia™ ABUS and somo•v™ ABUS Platinum

Catalog #E8340AB
Curved membrane dimensions:
229 mm (L) x 213 mm (W) x 19 mm (D)

Polysonic® Ultrasound Lotion and Protex™ Ultrasound Disinfectant Wipes

See details on page U/S 18

General Purpose Transducer Covers

PullUp™ Sterile Latex-Free General Purpose Transducer Covers

- Minimizes cross-contamination
- Protects equipment and reduces post-procedure clean-up
- PullUp™ allows cover to be easily propped open for convenient placement of gel and probe
- PullUp™ handle allows for quick application while maintaining a sterile field
- Made of soft polyurethane
- 3D end for seamless scanning
- Sterile, intended for single-use
- Available in lengths of 24 and 48 in
- Packaged 24 Covers per box, sold per box

E8013AD/AV

Intraoperative Transducer Covers

Protek™ Medical Sterile Latex-Free Polyethylene Intraoperative Transducer Covers

- Minimizes cross-contamination
- Protects and extends equipment life
- Reduces post-procedure clean-up
- Accordion-folded for easy application
- Clear polyethylene (not made with natural rubber latex)
- Sterile, intended for single-use
- Intraoperative transducer cover for a sterile environment
- Extends up the length of the transducer cord, allowing up to 8 ft (2.4 m) of sterile protection
- Catalog #E8013AL includes sterile gel packets and bands
- Packaged 12 Covers per box, sold per box

Ultrasound Gels

Parker Labs Aquasonic® 100 Gel

- Original gel for diagnostic and therapeutic applications
- Tested and approved for use with GE HealthCare transducers
- Blue colored aqueous gel formula is non-staining, non-sensitizing, and non-irritating
- Hypoallergenic, bacteriostatic
- No salt or formaldehyde; not a spermicide
- 5 liter jug with dispenser, 250 ml bottles, or 20 g sterile overwrapped foil pouches

E8365BA

E8365AF E8365BJ

Cat#	Description	Packaging	Warranty
E8365BA	Aquasonic 100 Gel (250 ml bottles)	12/case	H
E8365AF	Aquasonic 100 Gel (5 L jug – includes dispenser)	1/case	H
E8365BJ	Aquasonic 100 Gel (20 g pouches – single-use)	48/box	H

Parker Labs Aquasonic Clear Gel

- Same formula as original Aquasonic 100 Gel, but without the perfume or color
- Clear, non-scented aqueous, water-soluble gel formula is non-staining, non-sensitizing and non-irritating
- Hypoallergenic, bacteriostatic
- Offered in 250 ml bottles or 5 liter jug with dispenser

E8365CB E8365CA

Cat#	Description	Packaging	Warranty
E8365CA	Aquasonic Clear Gel (250 ml bottles)	12/case	H
E8365CB	Aquasonic Clear Gel (5 L jug – includes dispenser)	1/case	H

Parker Labs SCAN® Gel

- Dual viscosity formula allows SCAN gel to be applied as a gel and scan as a fluid
- Less viscous than Aquasonic 100 for ultrasound procedures where a less viscous gel is desired
- Green colored gel is completely water-soluble, will not stain clothing, damage equipment, or irritate skin
- Hypoallergenic, bacteriostatic
- Offered in 250 ml bottles, 1 gallon jug with dispenser

E8365BC E8365BD/BK

E8365BC	SCAN Ultrasound Gel (8 oz. bottles)	12/case	H
E8365BD	SCAN Ultrasound Gel (1 gal. jug)	1/case	H

Standoff Pads

Parker Labs Aquaflex® Standoff Pads

- Aqueous, flexible, disposable ultrasound standoff pad for use in difficult to visualize and near field areas
- Requires no gel, except in prolonged procedures
- Cushions sensitive areas for comfortable scanning
- Hypoallergenic, bacteriostatic
- Pads are disposable, which helps to prevent cross-contamination
- Each pad measures 2 × 9 cm
- Packaged 6 pads per box, sold per box

E8317C

Cat#	Description	Packaging	Warranty
E8317C	Aquaflex Standoff Pads – 2 × 9 cm	6/box	H

Endocavity Needle Guides

Protek™ Disposable Endocavity Needle Guide (Single Piece)

- For precise needle placement during ultrasound-guided procedures
- Directs instruments according to on-screen biopsy guidelines
- Easily snaps onto probe
- Disposable design of guide helps to reduce the risk associated with cross-contamination
- Smooth profile ensures patient comfort
- Wide funnel for optimal needle entry
- Requires no disinfecting
- Fits needle gauges 16 or thinner
- Sterile, intended for single-use
- 24 disposable procedure kits

Protek™ Disposable Endocavity Needle Guides

- For precise needle placement during ultrasound-guided procedures
- Directs instruments according to on-screen biopsy guidelines
- Easily snaps onto probe
- Smooth profile ensures patient comfort
- Wide funnel for optimal needle entry
- Requires no disinfecting
- Fits needle gauges 16 or thinner
- Sterile, intended for single-use
- Each Disposable Biopsy Needle Guide Starter Kit (E8013AW) includes 24 sterile kits:
  - Sterile 16Ga needle guide, 5 in tapered to 2 in x 24 in soft cover, 2.0cm x 20cm latex cover, and bands

E8013AW

Protek™ Reusable Endocavity Needle Guide

- For precise needle placement during ultrasound-guided procedures
- Directs instruments according to on-screen biopsy guideline
- Attaches securely to probe with ease (style varies)
- High-quality, stainless steel
- Safe for sterilization (steam sterilize/autoclave)
- Non-sterile, reusable

Adventure Series for Mobile X-ray

Star Catcher Patient Experience for the Navigate Mobile X-ray System

When young patients feel anxious, they often have difficulty lying still during imaging procedures, which can affect the completion of the scan.

With the Adventure Series program, we can engage children to help improve their coping skills and reduce anxiety levels, leading to much better cooperation during the procedure.

Put children first with the GE HealthCare Adventure Series, an experience designed to make imaging more inviting for pediatric patients. See pg. 18-24 for more information.

E1500RS

Cat#	Description	Warranty
E1500RS	GE HealthCare Adventure Series, Starcatcher for AMX™ Navigate Mobile X-ray	Y

Mobile X-ray Accessories

Mobile Detector Holder for Flashpad HD Detector

- Compatible with the GE HealthCare FlashPad® HD detector
- A stable platform enabling images to be taken at any angle
- Counterbalanced vertical movement from floor level to 50.8” (129 cm) high
- FlashPad HD (or a cassette) can overhang the table or trolley up to 24.4” (62 cm)
- Strong and compact design
- Large, quick-locking castor wheels
- Size: 70.5 in (H) x 26.4 in (D) x 24 in (W) (179 cm (H) x 67 cm (D) x 61 cm (W))
- Weight: 121 lbs (55 kg)

E06731BL

Cat#	Description	Warranty
E06731BL	Mobile Detector Holder for Flashpad HD Detector	C
Compatibility: Flashpad HD		

Mobile Adjustable Detector Holder

The height-adjustable mobile detector stand is used in applications with a digital radiography (DR) detector.†

A removable clear acrylic panel and securing straps maximize patient positioning during the procedure.

- Electric height adjustment accommodates patients of various sizes
- Straps and a removable clear acrylic panel improve the accuracy of patient positioning
- Independent detector and grid holders allow for insertion and removal of detector without removing the grid
- Detector and grid can be rotated 90° in either portrait or landscape
- Small footprint with large 4'' wheels provides for easy movement from room to room with detector and grid in place
- Four locking casters secure placement of the stand
- Constructed using high-grade steel and aluminum allowing the unit to be cleaned and disinfected using standard medical cleaning agents

† Detector and grids not included.

E6313DA

Cat#	Description	Warranty
E6313DA	Mobile Vertical Detector Holder for Flashpad Digital Detector (120V, 60Hz) – not compatible with Flashpad HD	Y
Compatibility: Flashpad		

Uninterruptible Power Supplies

Uninterruptible Power Supplies (UPS)

- Helps provide reliable, clean, consistent power for Diagnostic Imaging and PACS systems
- Helps to eliminate power anomalies (noise, transients, over and undervoltage), which could damage the system's sensitive computer components
- Enables the DI system to complete scanning after the loss of supply power and allows for the saving of valuable data and orderly system shutdown
- GE HealthCare tests and approves the UPSs listed in this catalog for compatibility with GE HealthCare Diagnostic imaging systems. All solutions are On-Line Double Conversion UPS.

E4582AG

See Power Quality Compatibility Guide on page XR 11

Dynamic Sag Corrector

Dynamic Sag Corrector (DySC)

- Corrects for voltage sags at the system, department or facility level
- DySC is optimized for fast sag detection and response time (voltage detect time of 1 ms; sags are corrected with a peak voltage response time of 1.5 ms)
- A green power solution at > 99% energy efficiency, the DySC has no batteries and over time can offer lower cost of maintenance
- Smaller footprint and lighter weight than comparable (kVA) UPS systems

E4505SJ

Cat#	Description	Warranty
E4505SJ	200 Amp (166 kVA) ProDySC Dynamic Sag Corrector (without installation)	Y
E4505SM	200 Amp GT (166 kVA) ProDySC Dynamic Sag Corrector (without installation)	Y

Main Disconnect Panels

Main Disconnect Panels

- Main Disconnect Panels provide emergency shut down, undervoltage protection, overcurrent protection, OSHA lockout tag provisions, and serves as a local disconnect for the GE HealthCare Diagnostic Imaging System.
- Helps reduce installation time by providing a single-point power connection, eliminating the need to mount and wire a number of individual components
- Standardized design and testing helps ensure high product quality and system reliability
- UL and cUL listed for compliance with National Electric Code
- Surface or semi-flush mounting
- Please consult your GE HealthCare Field Engineer to determine if this is the appropriate product for your needs before purchasing

E46001BA

AC Lighting Controllers

AC Lighting Controllers

- "X-ray in Use" warning and room lighting control panel provide a low voltage interface between the "X-ray in Use" warning lights, interior room general lighting systems and the X-ray system
- Convenient, push on/off pre-wired footswitch for control of room general lighting
- Enhances servicing safety by the use of a low voltage interface circuit between the imaging system and the line voltage lighting system

GE HealthCare Adventure Series – Customized Rooms

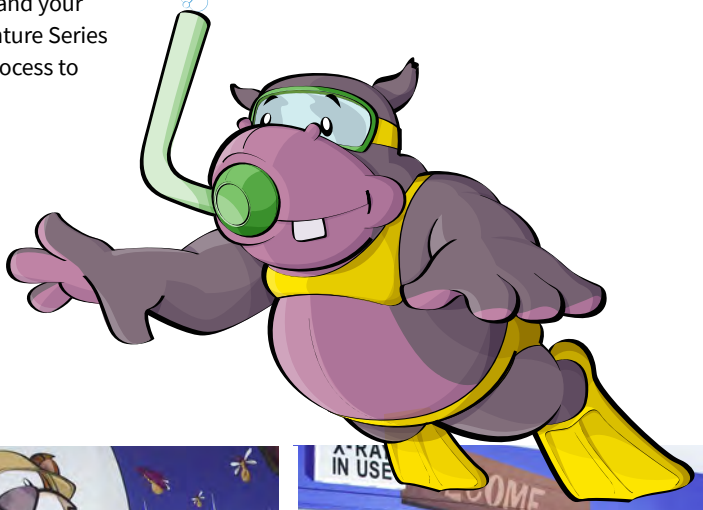

The GE HealthCare Design team will work with a small group of your hospital staff to create a custom layout and select themed graphics from the existing catalogs, or at times, create new appliques that fit the space and flow of each room.

In today's crowded markets, standing out and creating a unique patient experience can be a key to success. While Adventure Series provides a range of creative options to choose from, GE HealthCare understands that some discerning facilities desire something even more unique.

For those of you seeking a product experience custom tailored to you and your facility, we are pleased to offer you the ability to customize your Adventure Series room. GE HealthCare will work with you through the custom design process to create the experience you envision.

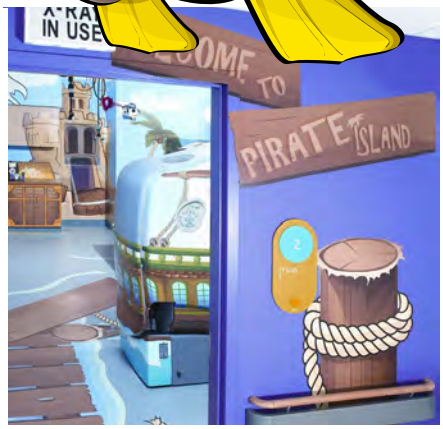

Adventure Series can be customized for the following spaces:

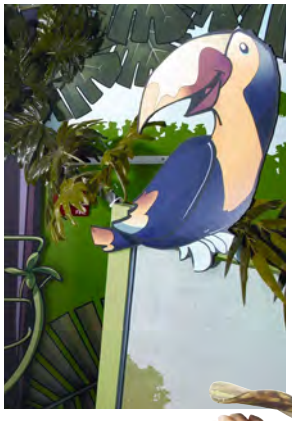

- Scan rooms
- Hallways
- Waiting rooms
- Uptake rooms
- Cafeterias
- Stress Lab
- Exam rooms

When young patients feel anxious, they often have difficulty lying still during imaging procedures, which can affect the completion of the scan.

With the Adventure Series program, we can engage children to help improve their coping skills and reduce anxiety levels, leading to much better cooperation during the procedure.

This, in turn, may reduce the need for sedation, increase the chances of a successful scan and help reduce the need to rescan the child or reschedule the appointment.†

Now children can experience a thrilling adventure while they get their exam!

Put children first with the GE HealthCare Adventure Series, an experience designed to make imaging more inviting for pediatric patients. Through themed imaging rooms, GE HealthCare leverages captivating characters, lush visuals, and hands-on activities to enhance the imaging experience for the children, their families and the hospital staff.

"Watching my daughter come out of sedation after her scan was awful. I wish we could have avoided that."

– Parent of a young child who needed a CT scan

"I realized that we needed to help children have less anxiety when experiencing an imaging scan and decrease their need for sedation. Our goal in creating Adventure Series was to harness the power of children's imaginations for the better so they could feel less worried for the entire scan experience."

– Doug Dietz, GE HealthCare Adventure Series Designer

† Statement based on anecdotal information gathered from facilities who have utilized the Adventure Series product at their facilities. Substantive clinical data not available.

The big impact for Children's Hospital has been for patient sedation rates, down to less than 1 every 2 months.†† "We have one of our MIBG patients that we do quite routinely and had to be sedated previously. Now he thinks he is going on a boat ride. He gets right up on the table and lies there and falls asleep now. For this particular patient, we have been able to do his whole scan, including the CT, without sedation" adds Ms. Talley. "We are the envy of radiology, everyone wants what we have."[1]

– Katie Talley,
Children's Hospital OU Medical Center

"The biggest change has been decreasing anxiety levels to the point where children are excited to go to the exam room and get their imaging scan."

– Kathleen Kaspin, R.T., M.S.,
Children's Hospital of Pittsburgh UPMC

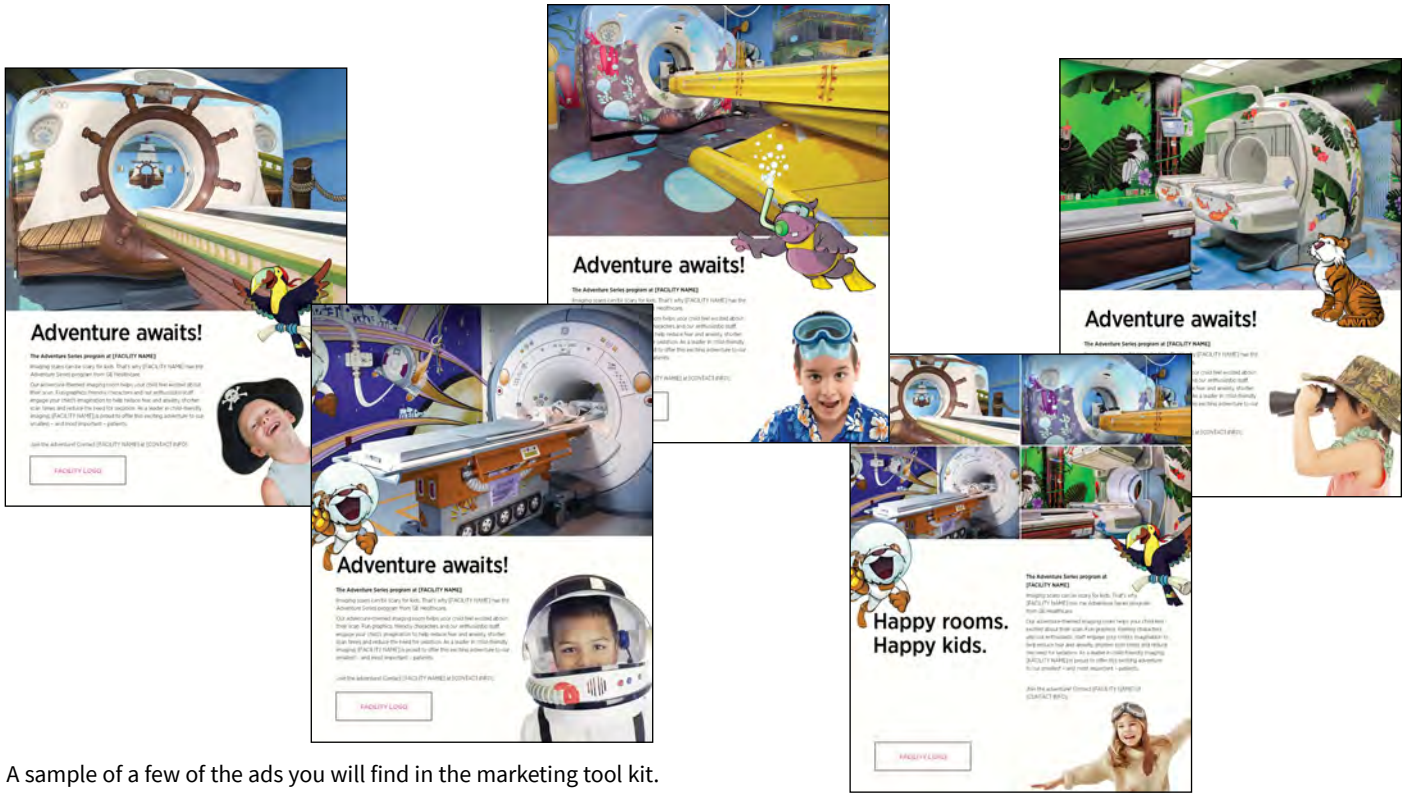

"The success of the Adventure Series program really speaks for itself. Almost half of the facilities install multiple rooms immediately and 30% of our facilities have chosen to add more after the initial adventure is installed."

– Marcia Taylor,
MICT Accessories Product Manager

†† Sedation rate results may vary. Not every hospital will see a decrease in sedation rates, particularly to this level, but three customers have reported a decrease in the level of sedation rates occurring at their facility when utilizing the Adventure Series. Many factors beyond the use of Adventure Series can impact whether a reduction of sedation rates will occur at your facility.

Stand out in the crowd

Advertise and promote your Adventure Series to families and referring physicians in your area with our marketing tool kit of promotional materials.

A sample of a few of the ads you will find in the marketing tool kit.

Patient pamphlet

Create the experience

The GE HealthCare Adventure Series provides the setting for a great story to help ease the patient through the scan procedure. As part of the product offering we include the Explorer's Handbook. On this CD, you'll find a set of tools for you to use to guide your young patients on a wide array of adventures, which may help you get the scan you need. For example, in the Field Guides, we have provided some tips and suggestions on how to create a narrative that can enrich the experience and may help ease patient anxiety. We encourage you to take a moment to explore the room from a child's perspective and create roles that you both can play.

Your imagination is the final component. With it, the possibilities could be endless.

The Adventure Series Explorer's Handbook includes the artwork for:

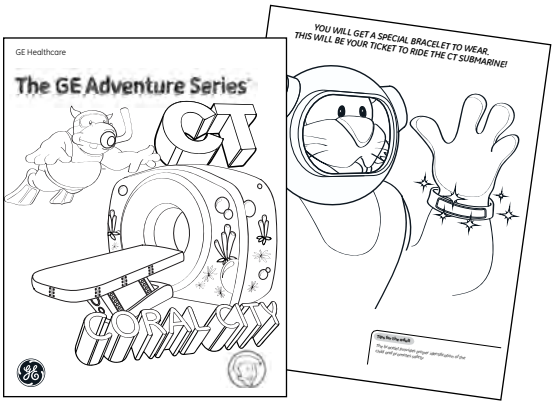

Field Guides that offer tips and tricks for creating the adventure stories to help patients feel more comfortable during the scan.

Posters to decorate the department to encourage the entire staff to help improve the scan experience.

Coloring Books that engage young patient's creativity while educating them on what to expect from the scan procedure.

Reward Stickers for patients for a job well done.

Start your own adventure today

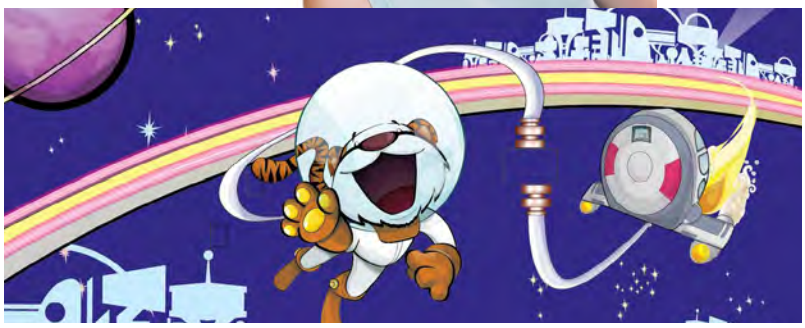

There is a story ready to be written. It's the story of your facility taking steps to become a leader in child-friendly imaging. And GE HealthCare is here to help you get started. We'll show you how you may use Adventure Series themes to enhance the imaging experience for patients, families, and your hospital staff as well.
