

Vizamyl PET imaging enables the early detection of beta-amyloid plaques, even before noticeable cognitive symptoms arise. When preparing for your Vizamyl appointment, remember these key considerations:

- ✓ Wear loose, comfortable clothing

- ✓ Drink a lot of fluids and go to the bathroom frequently before your Vizamyl imaging and for one day afterward

- ✓ Call your doctor if you have any questions or concerns about Vizamyl imaging

Please consult your doctor if you have any questions or concerns about Vizamyl imaging
