

Centricity™ Opera solution

Enhancing operating room management, planning, and communication

Surgical procedures can account for more than 60%¹ of hospital admissions, so OR planning and management is crucial to ensure efficient allocation of resources and to reduce communication gaps.

With Centricity Opera, your OR staff gains intelligent scheduling, effective team and material coordination, and actionable insights from data.

“Opera has allowed us to see where lists are finishing early or overrunning so that we can move things around to prevent cancellations.”

Consultant Anaesthetist,
NHS Scotland

1. Amin, Md Al, et al. “A Comprehensive Review on Operating Room Scheduling and Optimization.” *Operational Research*, vol. 25, no. 1, Dec. 2024, <https://doi.org/10.1007/s12351-024-00884-z>

Orchestrate the team

Centricity Opera can help you manage the operating rooms more efficiently

1

Help staff focus on critical priorities

- **Monitor**
Provides visibility to all Centricity Opera users into OR activity in real-time. Native analytics tool offers insights to guide ad hoc changes, helping to optimize efficiency and resource utilization.
- **Emergency case management**
Quickly identify high-priority cases, allocate the necessary staff and equipment, and coordinate with other departments to ensure that urgent surgeries are performed without unnecessary delays.

2

Helps enhance awareness on patients

- **Family view**
Keeps families continuously updated on the surgery progress, minimizing the need for phone inquiries to the department.
- **Material traceability**
Enhances patient safety by tracking serial numbers and expiry dates linked to the patient, helps decrease adverse events, and facilitates efficient inventory and consignment management.

3

Improve daily workflows

- **Scheduling management**
Provides planning and scheduling capabilities to accommodate surgical requests. Advanced features, such as conflict management tool, ensure that scheduling conflicts can be identified and resolved.
- **Analytics framework**
Provides meaningful data about procedure costing, resource utilization, unit throughput, and performed surgeries—information that is easily accessible via standard or custom dashboard solutions.
