Giraffe Incubator Carestation

Creating the path to positive growth and neurodevelopment

Small but mighty—empowering babies' NICU journey

For every precious baby welcomed into the world, it is everyone's mission to send them home as safe, healthy and fast as possible. At GE HealthCare, it's our job to help create controlled, protected neonatal environments for peaceful, fast healing.

GE HealthCare's Giraffe™ Incubator Carestation™ is designed to:

- Create a healing environment, combining innovative technology and design design with exceptional thermal performance to help newborns thrive
- Promote a healthy, nurturing connection between babies and their families, allowing parents comfortable, easy access to their babies and family-friendly information about the babies' progress
- Offer clinicians enhanced visibility, trending and interaction with their tiniest baby with integrated features, including the translating and rotating mattress, elevating base and the optional in-bed scale
- Provide continuous warmth during transport with the addition of the Giraffe Shuttle™

Stepping stones to babies' milestones

Part of GE HealthCare's renowned Giraffe family of innovative products, the Giraffe Incubator Carestation provides powerful technology to promote the growth and stability of the most fragile babies, every step of the way.

The warming touch of care

The Giraffe Incubator Carestation simplifies—and enhances—the care continuum by offering clinicians the intuitive and reliable neonatal solution they need, and parents the access and support they want to steer babies toward better health. Features include:

- Air boost protects the baby from heat loss when either panel is opened to support thermal stability
- Large color display (10.4") and touchscreen user interface helps clinicians streamline their workflow while monitoring and controlling the baby's environment
- Hands-free alarm silence allows clinicians to quickly silence the alarms while providing care and maintaining a quiet environment
- Patented Baby Susan™ rotating mattress enhances productivity by allowing the clinician to easily position the baby for clinical procedures, optimizing their efforts to get it right the first time and minimizing unnecessary baby stimulation
- Pressure diffusing mattress reacts to the impact of the baby's body, reducing pressure points while minimizing motion and disruption and maximizing comfort
- Connectivity capabilities allow communication with electronic healthcare records and hospital information systems; it is equipped for future updates and upgrades
- Customized screens contribute to the personalized, patient- and family friendly care environment while providing continued visual monitoring

Newborns in the NICU need extra special care from clinicians and their families. One of the most advanced, neurodevelopmentally supportive microenvironments, the Giraffe Incubator Carestation is specially designed to give babies the comfort and stability they need to grow, heal and go home healthy.

GE HealthCare

About GE HealthCare Technologies Inc.

GE HealthCare is a leading global medical technology, pharmaceutical diagnostics, and digital solutions innovator, dedicated to providing integrated solutions, services, and data analytics to make hospitals more efficient, clinicians more effective, therapies more precise, and patients healthier and happier. Serving patients and providers for more than 125 years, GE HealthCare is advancing personalized, connected, and compassionate care, while simplifying the patient's journey across the care pathway. Together our Imaging, Ultrasound, Patient Care Solutions, and Pharmaceutical Diagnostics businesses help improve patient care from diagnosis, to therapy, to monitoring. We are an $19.6 billion business with approximately 51,000 colleagues working to create a world where healthcare has no limits.
