GE HealthCare

Imaging 360

Streamline your imaging operations with one holistic view

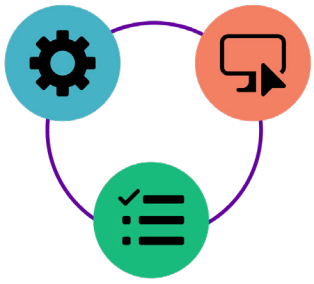

With Imaging 360, optimize your radiology fleet and staff with one holistic view.

Gain actionable insights, streamline productivity, and connect your staff remotely, helping to improve efficiency and provide consistent quality of care.

Operations

Actionable insights

Make operational adjustments based on department performance to optimize the day-to-day and inform long-term planning.

Protocols

Consistent quality

Organize your protocal management across multiple locations to drive efficiency, while helping to enable standardized protocal selection to help you achieve your goal of consistent image quality.

Remote*

Connected staff

Empower your radiology staff to access support through remote collaboration and scan assistance.

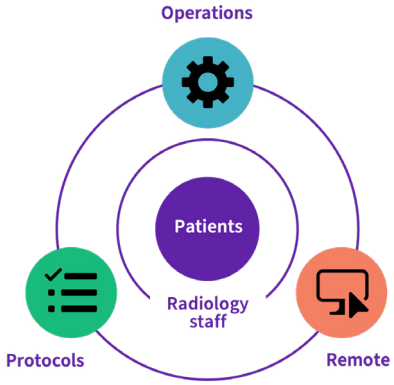

*Remote scanning, training, and collaboration can be fulfilled by either nCommand™ Lite by IONIC Health or Digital Expert Access with Remote Scanning for MR by GE HealthCare. Consult your sales representative for availabilities in your region.

One holistic view for optimized productivity with Imaging 360

Get operations under control with a quick and easy-to-use tool

Achieve daily oversight and effective long-term capital planning. Easily identify areas for optimization, including machine utilization, throughput, scheduling, and referral volume.

Optimize protocol management centrally to ensure consistent quality and standardization. Connect your staff remotely* when they need scan assistance.

From reactive to proactive with ease

Actionable insights

- ✓ See actionable insights in one centralized, customizable dashboard view, including data from the scanners and RIS
- ✓ View unified fleet data across multiple locations, devices, and vendors on one cloud-based dashboard
- ✓ Optimize exam scheduling for greater patient and staff satisfaction

Consistent quality

- ✓ Track, manage and edit protocols remotely
- ✓ Distribute protocols across your GE HealthCare fleet and visualize multi-vendor protocols in one place
- ✓ Leverage the protocol project management board for an efficient workflow

Connected staff*

- ✓ Balance resources for streamlined training and remote knowledge sharing
- ✓ Plug in experts where needed for remote collaboration and scan assistance
- ✓ Empower your radiology staff to focus on patient care while accessing the support needed

Hear from your peers

One holistic view

"The dashboard is like a lighthouse that delivers a live view of the imaging department, so we can improve performance, optimize system utilization and reduce variability, all of which impacts the patient experience."

Paolo Sana | Radiology Manager, Hôpitaux Robert Schuman

Balance and expand expertise

"To avoid rescheduling the whole day, I needed to be there in any way, and it was the remote way. It was the first time we clinically used Imaging 360 remote. I followed exams, I reviewed the possible pathologies and I interacted with the team in order to scan the optimum protocols."

Dr. Christopher Ahlers | Radiologist, Co-owner and CEO, Radiomed, Wiesbaden, Germany

*Remote scanning, training, and collaboration can be fulfilled by either nCommand™ Lite by IONIC Health or Digital Expert Access with Remote Scanning for MR by GE HealthCare. Consult your sales representative for availabilities in your region.

It's time you had one holistic view to streamline your imaging operations.
