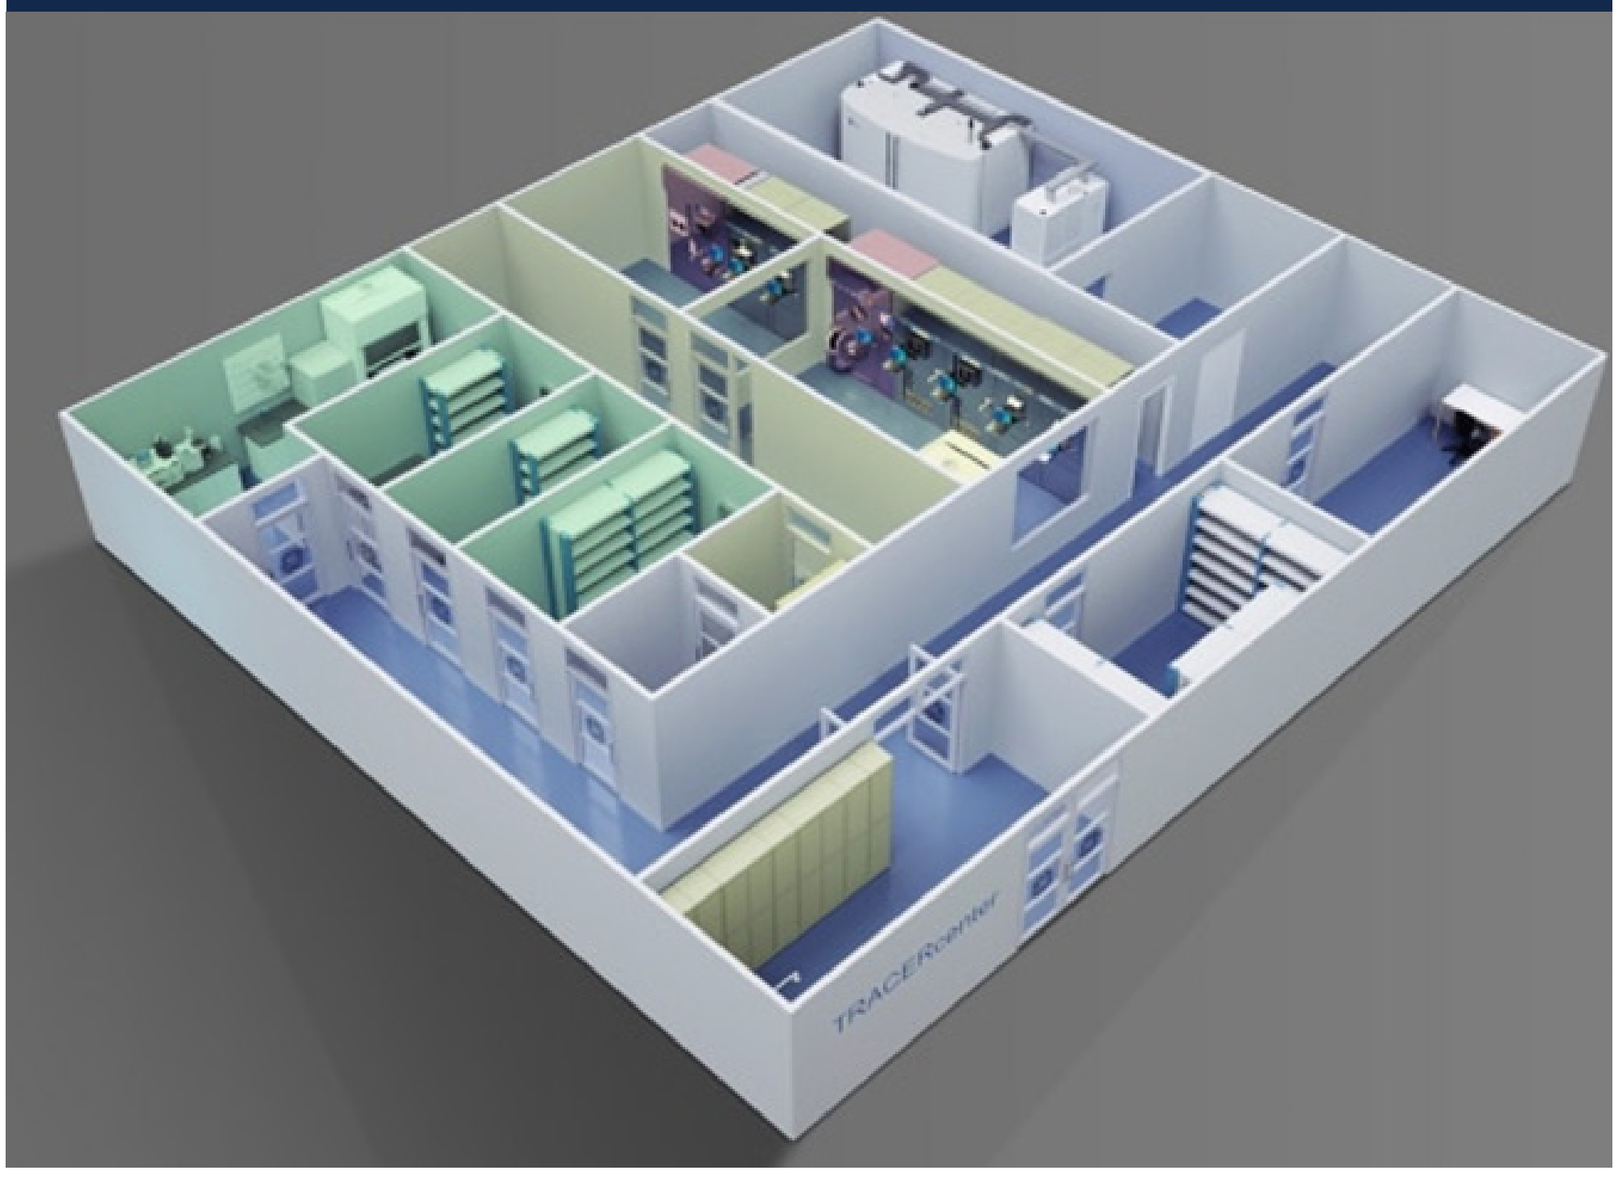
TRACERcenter



TRACERcenter brings all of the different silos of technology, service and equipment that make up a tracer production facility together in one comprehensive solution. For Theranostics, that means TRACERcenter enables a reliable supply of PET imaging tracers produced on demand, reducing your risk of scanning schedule disruption due to tracer delivery issues.

As a leader in the molecular imaging and radiopharmaceutical industry, GE Healthcare supports the continued discovery and production of new tracers and therapies with powerful tools to streamline their production. TRACERcenter enables customized solutions for research and clinical production of PET tracers.

The only turnkey PET solution in the industry, TRACERcenter gives you an easier way to take advantage of PET imaging.
