Tec 850 Vaporizer

Deliver with confidence

The Tec 850 vaporizer from GE Healthcare combines clinical performance with ergonomic design to help you efficiently deliver anesthesia for every patient. Enhanced design delivers consistent, reliable operation while reducing overall total cost of ownership.

Efficient and effective anesthesia delivery

Designed for clinical confidence

The Tec 850 vaporizer is designed to deliver consistent performance with improved operating excellence throughout the product life so clinicians can focus on patients, not the vaporizer.

New design features include:

- An ergonomic dial release allows either left- or right-hand operation
- Wide, centered liquid level indicator provides a clear indication of the fill level of the vaporizer
- Easy-to-turn dial and fine graduations with a larger dial font for enhanced readability and easily control

Lower costs and flexible service

- The Tec 850 vaporizer requires an inspection once every five years and no planned factory maintenance reducing your total cost of ownership

Uncompromised anesthesia delivery

The only vaporizers validated by GE to integrate seamlessly with GE anesthesia machines.

They feature a non-spill system that limits the movement of liquid agent if the vaporizer is tilted or inverted, protecting internal components and helping maintain output within clinically acceptable limits. Plus, they can be mounted without tools on GE Healthcare anesthesia systems equipped with the Selectatec manifold and without taking the anesthesia system out of service.

Partner with an experienced leader

With 100 years of experience in anesthesia delivery, GE Healthcare has built a reputation for pioneering design and patient safety.
