## Lennox 90% Furnace Cabinet Plugs and Grommets

Lennox Technical Support has been getting calls regarding grommets or plugs in the cabinet of some 90% furnace models. All 90% gas furnaces with Constant Torque and Variable Speed blower motors have a sealed burner design and do not require plugs or grommets to seal the cabinet.

The motor type is denoted by either “E” or “V” in the model number as shown in the below example:

If you have any questions, please contact Lennox Technical Support at (800)453-6669.

Product Series	Stages of Gas	AFUE	Configuration	Nominal Heat Input	Blower	Cooling Capacity	Cabinet Width
SL = Signature Lennox	1 = One-Stage	80=80%	UH = Upflow/Horizontal	030=33k Btuh	V = Variable Speed	36 = 2-3.5 tons	A = 14 ½ in
EL = Elite Lennox	2 = Two-Stage	93=93%	DF = Downflow	045=44k Btuh	E = High Efficiency/ Constant Torque	48 = 3-4 tons	B = 17 ½ in
ML = Merit Lennox	P = Precise Comfort	95=95%		070=66k Btuh	P = PSC Multi Speed	60 = 4-5 tons	C = 21 in
		96=96%		110=110k Btuh			D = 24 ½ in
		99=99%		135=132k Btuh
