SL280UHNV and EL180UHNE NAMEPLATE

Lennox has discovered that the manifold gas pressure and the gas orifice size shown on the nameplate of some EL180UHNE and SL280UHNV model furnaces were printed with incorrect information. The gas valve and orifice are correct however the information on the nameplate is incorrect. The serial number range is 5919EXXXXX through 5919HXXXX. The following table shows the correct manifold pressure setting by model and the correct gas orifice size.
