

MSA G1 AirHawk® II SCBA Upgrade Kits

Tens of thousands of SCBA users have trusted the AirHawk II SCBA for their industrial respiratory needs. The G1 SCBA has revolutionized the Fire Service, and now the G1 Industrial SCBA is taking industrial users to the next level.

Loyal customers who rely on the AirHawk II SCBA for their safety can now begin their transition to the new platform with the G1 Industrial Upgrade Kit. Upgrade kits allow users to incorporate the lightweight G1 facepiece while retaining the value of their current AirHawk II SCBA fleet.

Upgrade kits include a new G1 regulator, keeper and labeling. Upgrades must be performed by an MSA C.A.R.E. certified technician or authorized repair center.

G1 Facepiece

Lightweight & Low-Profile

- 1 Enhance situational awareness and visibility through a wide field of view.
- 2 Prevent potential cross-contamination when units are shared through unique mask design, which restricts exhaled air from entering the mask-mounted regulator.
- 3 Open port design allows for lower breathing resistance both on and off air with the goal of reducing fatigue.
- 4 Enable short-range communication with mechanical speaking diaphragm.
- 5 Meet a variety of user needs with head harness options available in Kevlar, rubber, or polyester.
