

MSA Cairns® Fire Helmet Training Cover

Modern Fire Helmet P/N 10207280

Traditional Fire Helmet P/N 10207281

This product is designed to help prevent damage to your MSA Cairns Fire Helmet during testing and training exercises (e.g. flashover simulations, live burns, high heat training). To prevent voiding your MSA Cairns Fire Helmet warranty, wear the training cover during such exercises where you would be exposed to heat. To prevent damage to eye protection during testing and training exercises that involve heat exposure, it is recommended to remove them from the helmet provided that removing the eye protection does not expose the user to eye hand hazards.

Installation Instructions

WARNING

Read all instructions and warnings before wearing this helmet training cover.

After removal from the wearer, the helmet should be inspected for damage and soiling after each use.

The helmet should be adjusted by means of the adjustment points provided to permit a proper fit that does not interfere with the SCBA while in use. These adjustments should be done prior to actual fire fighting activities.

Failure to follow these instructions could result in serious injury or death.

1.1. APPLICATION

Cover (P/N 10207280) can only be used with the 660C Metro, Invader 664, Structural 360 or HP3 Helmets.

Cover (P/N 10207281) can only be used with the Cairns 1010, Cairns 1044, 880 Tradition or Leather Helmets.

1.2. COVER INSTALLATION

- Insert helmet D-ring through slot in cover.
- Beginning at D-ring, pull cover over helmet shell and over the outside of the helmet shell.
- Secure hook and loop tabs around faceshield mounting brackets.

1.3. INSPECTION

Ensure cover is properly attached to helmet before and after each use.

1.4. CLEANING

Remove the cover.

Clean the cover with mild soap or detergent.

NOTE: Users should not wear helmets that are not thoroughly cleaned and dried.
