

## Latchways Mansafe Freestanding Constant Force Post

---

### **Capacity when used with MSA Horizontal Lifelines for restraint**

The Latchways Mansafe Freestanding Constant Force Posts may be used with any MSA Sure-Line or Dyna-Line horizontal lifeline system with a span of 60 feet or less between end anchors. Such a system may be used for restraint for two workers with a total individual worker weight, including clothing and tools, of no more than 310 lbs.

This Technical Brief is provided as a supplement to the user instructions provided with the Latchways product as well as those available on [msasafety.com](http://msasafety.com) located under “Product Literature & User Information” by following the path Products>Fall Protection Equipment>Anchorage Connectors & Hardware>Anchorage Connector Components. All other instructions must be heeded.
