

Cab Bracket for Workman PFL

Technical Brief FP-PC010

The MSA Cab Bracket part number 416003, which was originally designed for the Dynalock 20ft SRL, may be used with the MSA Workman PFL. The Workman PFL must be mounted in the cab bracket with the PFL tags remaining visible so that the nozzle of the PFL aligns best with the roller of the cab bracket. The bracket should be otherwise mounted according to the instructions provided. For additional questions, contact MSA customer service at 1.800.MSA.2222.
