I RISE TO EVERY CHALLENGE.

ATHLETE

Nomex. Kevlar.

An unstoppable combination of strength and inherent flame resistance.

130 YEARS OF INNOVATION

Globe invented turnout gear 130 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation's most trusted manufacturer.

Our owners, our employees, and our dealers all share a passion for building "Athletic Gear for Firefighters" in their choice of styles, materials, and options. And no matter what challenges tomorrow's firefighters face, they can be sure that Globe will continue to be there to protect them.

1887

Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.

1918

Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining—the same system still used today by all manufacturers of turnout gear.

1953

Globe is the first to use 3M™ Scotchlite™ reflective trim to add visibility to its turnout gear.

1966

Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

1975

Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.

1985

Globe introduces two state-of-the-art performance fabrics: PBI® for outer shells and waterproof, breathable Gore-Tex® fabric for moisture barriers.

1991

Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.

1993

The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).

1994

Globe is the first manufacturer of turnouts to achieve ISO 9001 Certification.

1995

Globe acquires Cairns Protective Clothing.

2000

Recognizing that the rescue component of firefighters' jobs continues to grow, Globe introduces Globe LifeLine—the right gear for the job. Globe implements Lean Manufacturing, dramatically improving efficiency and reducing delivery times.

2003

Globe launches G-XTREME®—the world's most advanced turnout gear—designed to move the way the human body moves without restriction.

2005

REACTION® joins the Globe Cairns family, with its patented collar that attaches the liner to the outside of the jacket and adds length and fullness where the body bends.

2006

Globe introduces "Athletic Footwear for Firefighters," with its remarkably flexible, cushioned, and contoured construction, to choruses of "Wow."

2007

Globe launches IH™ Pants—integrating a Class 2 internal seat harness with floating, load-equalizing leg loops into turnout gear.

2008

Globe introduces G-XCEL® and RSX™ turnout gear styles—serious performance and great value.

2009

Another new Globe turnout style—CLASSIX®. Value-priced turnout gear with a nod to the traditional.

2012

G-XTREME® introduces a whole new dimension in fit—SHAPE. Now your gear can really fit your body—without extra bulk and without restriction—so that you can perform your job better.

2015

Globe introduces the evolution of Athletic Gear for Firefighters. The new G-XTREME® 3.0 is completely retailored from collar to cuff to provide even less restriction.

2016

Globe previews the future of turnout gear—ATHLETIX™. New material technology enables the all-new athletic design with stretch fabrics that allow closer, body-contoured fit to provide unprecedented range of motion with less bulk, more flexibility, and lighter weight.

2017

MSA acquires Globe Manufacturing Company to continue the Globe tradition of innovation.

GLOBE BOOTS: ATHLETIC FOOTWEAR FOR FIREFIGHTERS

With a unique cushioned and contoured sole and athletic footwear construction, Globe boots are flexible like your feet, grip like no other, and feel broken in right out of the box. We even changed out all the heavy and conductive steel components to lighter, stronger, and insulating advanced composites. And they fit so securely, you can even run in them.

All Globe boots share the same foundation but have uppers designed to meet your specific needs and the differing requirements of Structural, Proximity, Technical, Wildland, Liquid Splash, and Emergency Medical NFPA Standards. Just put your feet in a pair, and you'll say, "Wow!"
