OVER 130 YEARS OF INNOVATION

Globe invented turnout gear over 130 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation’s most trusted manufacturer.

Our employees and our distributors all share a passion for building “Athletic Gear for Firefighters” in their choice of styles, materials, and options. And no matter what challenges tomorrow’s firefighters face, they can be sure that Globe will continue to be there to protect them.

- 1887 Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.
- 1918 Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining — the same system still used today by all manufacturers of turnout gear.
- 1953 Globe is the first to use 3M™ Scotchlite™ reflective trim to add visibility to its turnout gear.
- 1966 Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

- 1975 Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.
- 1985 Globe introduces two state-of-the-art performance fabrics: PBI® for outer shells and waterproof, breathable Gore-Tex® fabric for moisture barriers.
- 1991 Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.
- 1993 The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).
- 1994 Globe is the first manufacturer of turnouts to achieve ISO 9001 Certification.
- 1995 Globe acquires Cairns Protective Clothing.

- 2000 Recognizing that the rescue component of firefighters’ jobs continues to grow, Globe introduces Globe LifeLine — the right gear for the job. Globe implements Lean Manufacturing, dramatically improving efficiency and reducing delivery times.
- 2003 Globe launches G-XTREME® — the world’s most advanced turnout gear — designed to move the way the human body moves without restriction.
- 2005 REACTION® joins the Globe Cairns family, with its patented collar that attaches the liner to the outside of the jacket and adds length and fullness where the body bends.
- 2006 Globe introduces “Athletic Footwear for Firefighters,” with its remarkably flexible, cushioned, and contoured construction, to choruses of “Wow.”
- 2007 Globe launches IH™ Pants — integrating a Class 2 internal seat harness with floating, load-equalizing leg loops into turnout gear.
- 2008 Globe introduces G-XCEL® and RSX™ turnout gear styles — serious performance and great value.
- 2009 Another new Globe turnout style — CLASSIX®. Value-priced turnout gear with a nod to the traditional.
- 2012 G-XTREME® introduces a whole new dimension in fit — SHAPE. Now your gear can really fit your body — without extra bulk and without restriction — so that you can perform your job better.
- 2015 Globe introduces the evolution of Athletic Gear for Firefighters. The new G-XTREME® 3.0 is completely retailored from collar to cuff to provide even less restriction.
- 2016 Globe previews the future of turnout gear — ATHLETIX™. New material technology enables the all-new athletic design with stretch fabrics that allow closer, body-contoured fit to provide unprecedented range of motion with less bulk, more flexibility, and lighter weight.
- 2017 MSA acquires Globe Manufacturing Company to continue the Globe tradition of innovation.
- 2019 Globe revolutionizes turnout pants again with the new Globe Pant System — the only pants available in four fits: Slim, Regular, Relaxed, and Women’s.

TURNOUT GEAR

GLOBE GUARD™ EXPOSURE REDUCTION SYSTEM

GLOBE GUARD™ JACKET COMPONENT

Sewn into the thermal liner above the hemline and constructed of two layers – GORE® CROSSTECH® black moisture barrier and TECASAFE® PLUS for moisture management, high breathability, flame resistance, and active moisture wicking – to help reduce exposure at the jacket and pants interface. The Globe Guard™ Jacket Component is automatically engaged as part of the liner system when the jacket closures are secured.

GLOBE GUARD™ PANT CUFF COMPONENT

Constructed of two layers – GORE® CROSSTECH® black moisture barrier and TECASAFE® PLUS – and sewn to the liner system at the bottom hem of each leg to help reduce exposure at the pant cuff and boot interface.

GLOBE GUARD™ PANT FLY COMPONENT

Constructed of two layers – GORE® CROSSTECH® black moisture barrier and TECASAFE® PLUS for moisture management, high breathability, flame resistance, and active moisture wicking – and installed at the base of the fly to help reduce exposure.

GLOBE GUARD™ SYSTEM

The Globe Guard™ System, in combination with the most innovative turnout gear from Globe, provides firefighters the gold standard in helping reduce exposure to toxic substances without impeding performance. Globe and MSA are committed to delivering premium performance solutions and supporting scientific research to help address long-term firefighter health and safety. Continually improving turnout gear specifications is one of the many steps necessary for departments to help reduce exposure to toxic substances for their members.

OTHER CONSIDERATIONS

On the jacket, a front closure with a zipper inside and hook and loop outside is recommended to help reduce exposure when properly secured.

On the pants, the addition of the inside gusset helps to reduce exposure when the hook and loop fly closure is properly closed.

At the jacket and glove interface, elasticized, adjustable sleeve wells constructed of GORE® CROSSTECH® black moisture barrier with wristers sewn to the liner is recommended to help keep toxic substances from entering the sleeves when the arms are raised.

Components of the Globe Guard™ System are also available with Neoprene.
