Globe invented turnout gear 130 years ago. Today we still deliver the most advanced, best-fitting, and longest-lasting protection by listening to our customers, creating breakthrough designs, and applying the engineering skills of the nation’s most trusted manufacturer.

Our owners, our employees, and our dealers all share a passion for building "Athletic Gear for Firefighters" in their choice of styles, materials, and options. And no matter what challenges tomorrow’s firefighters face, they can be sure that Globe will continue to be there to protect them.

Globe Manufacturing Company is founded in Lynn, MA. Courtland F.H. Freese buys the company and moves it to Pittsfield, NH, which remains its headquarters to this day.

Globe receives a patent for a waterproof coat using an outer shell, a waterproof barrier, and a thermal lining—the same system still used today by all manufacturers of turnout gear.

Globe is the first to use 3M® Scotchlite® reflective trim to add visibility to its turnout gear.

Globe introduces DuPont NOMEX® inherently flame-resistant fabric.

Globe is a charter member of the National Fire Protection Association, creating the first NFPA 1971 Standard for Protective Clothing for Structural Fire Fighting. Globe becomes the first to comply with this new standard for every turnout sold.

Globe brings ergonomic design to turnout gear by launching the revolutionary GX-7™, which rapidly becomes the most popular turnout gear in the fire service.

The fourth generation of the founding Freese family takes over the ownership and management of Globe. Gef (left), Rob (middle), and Don (right).

Globe acquires Cairns Protective Clothing.

ATHLETIX™ JACKET

New material technology enables all-new athletic design with stretch fabrics that allow closer, body-contoured fit to provide unprecedented range of motion with less bulk, more flexibility, and lighter weight.

MATERIALS

NEW KOMBAT® STRETCH PBI®/KEVLAR® fabric allows closer, less bulky fit with unprecedented range of motion and more flexibility, while providing premium thermal break open protection.

NEW NOMEX® NANO thermal barrier material is thinner, lighter, more flexible, more breathable, and quicker drying.

NEW 3M™ SCOTCHLITE™ COMFORT TRIM reflective material is segmented and heat sealed to be lighter, more flexible, and breathable without sacrificing visibility.

GORE® CROSSTECH® BLACK moisture barrier provides the highest breathability in the widest range of environmental conditions to reduce heat stress.

JACKET FEATURES

MORE STREAMLINED DESIGN with vertical seaming reduces oversize in front chest, bulk under SCBA, and stiffness in front closure.

YOCCO™ DRAG RESCUE DEVICE is easy to deploy when you need it, out of the way when you don’t.

EXTENDED BACK option allows you to choose to extend the back by 3” or 6” for additional overlap and lettering below the SCBA.

LINER ACCESS OPENING allows for easy access between the layers.

NEW, MORE FLEXIBLE SEAMS are safety-stitched and double-needle top-stitched for strength but are less bulky and lay flatter.

Because ATHLETIX™ is loaded with standard features and the nature of the stretch outer shell fabric, OPTIONS are limited. Please inquire.

MEN’S & WOMEN’S SIZES: Chest, Length, and Sleeve.

Certified to NFPA 1971 (Structural Fire Fighting).

A New Dimension in Fit: SHAPE

RELAIXED SHAPE
Many firefighters choose a relaxed shape for maximum mobility. That’s one reason why our G-XTREME® 3.0 Pants are so popular—added length in the knee and the seat and added fullness in the seat and thigh give it a less-restrictive, relaxed shape.

REGULAR SHAPE
Those who are trimmer may appreciate this new, closer-fitting, regular shape with added length in the knee and the seat but with less fullness in the seat and thigh.

Available in G-XTREME® 3.0 and IH™ READY

TAPERED SHAPE
An athletic, tapered shape fits firefighters with a larger chest and shoulders without adding bulk around the middle. Our most popular shape.

STRAIGHT SHAPE
Those with a broader build or who plan to wear a seat harness or other equipment around their waist under the jacket will appreciate the fuller, straight shape.
