

# Transforming health care through complete, compliant coding

See how the 3M™ 360 Encompass™ System can help your facility improve revenue and coder productivity.

## Auto-suggested codes

Auto-suggested codes reflect the latest regulations and guidelines for both inpatient and outpatient coding.

## Process and workflow

Within its intuitive, efficient coding workflow, 3M 360 Encompass helps coders quickly identify the documentation needed to support accurate coding.

## Automation through machine learning

3M 360 Encompass is powered by state of the art artificial intelligence (AI) and 3M coding technology to examine the text of a patient's record and assign accurate codes.

## Real clients. Real results.

98%

### coding accuracy

Fewer denials and reworks, saving you time, money and resources.

21%

### increase in coder productivity on average

Reduce the coding backlog and move records forward to billing.

19%

### increase in net revenue

Implement a streamlined process that can lead to an increase in net revenue.\*

\*Results vary from facility to facility.
