

**3M** Science.  
Applied to Life.™

**3M™ Impregum™  
Super Quick**  
Polyether Impression Material

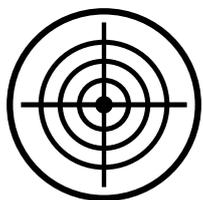

**Capture every  
detail in 2 minutes?  
Yes, it can.**

**Now also  
available in  
cartridge  
delivery!**

**Quicker set.**

With just a two minute setting time, Impregum Super Quick Material lives up to its name and allows for faster impressions in cases like single-unit crowns, implants, inlays/onlays and smaller bridges up to 3 units.

**100 % Polyether. Trusted precision.**

Impregum Super Quick Materials demonstrate excellent performance in moist situations and exhibit great flow behavior, leading to higher levels of accuracy and detailed, high-precision restorations.

The nature of polyether allows you to get the full 45 seconds of working time, avoiding inaccuracies associated with premature setting times of VPS materials.

**Make your patients  
feel comfortable.**

An improved fresh, minty taste together with a short time in the mouth increases your patients' comfort.

**3M™ Impregum™  
Super Quick Polyether  
Impression Material**

- For monophasic and 1-step impression techniques.
- Perfect for impressions for single-unit crowns, implants, inlays/onlays and smaller bridges up to 3 units.
- Available in heavy, medium, light and ultra light body consistencies.
- Impregum Super Quick Material is scannable with the current generation of scanners for a more efficient workflow.

# The fastest way to polyether precision for smaller cases.

	Order code	Dispensing system	Impression technique	Single-unit crown	Small implant (≤ 2 units)	Inlay/onlay (≤ 2 units)	Small bridge (≤ 3 units)	Recommended max. working time (min:sec)	Intra-oral setting time at 37°C (min:sec)
