

**3M** Science.  
Applied to Life.™

**3M™ Scotchbond™ Universal Plus**  
Adhesive

**More than just  
a strong bond.**

## From excellent...

Built on the clinically proven and world's most researched universal adhesive.

-  **All direct and indirect indications**  
light-curing, self-curing or dual-curing methacrylate-based composites / cements
-  **All etching techniques**  
total-etch, self-etch, and selective enamel etch
-  **Bonds to all restorative materials**  
without the need for separate primers
-  **Available in vial and unit dose**  
for efficient hygiene management
-  **Virtually no post-operative sensitivity**  
in field evaluation:

**99%** of dentists reported that **3M™ Scotchbond™ Universal Plus Adhesive** shows **virtually no post-operative sensitivity.\***

\* Field evaluation with 309 dentists and over 20,000 applications

3M™  
Scotchbond™  
Universal Plus  
Adhesive takes  
universal adhesives to  
the next level.

It keeps all the benefits of the original 3M™ Scotchbond™ Universal Adhesive, the first truly universal adhesive, while adding even greater control and predictability – because a good adhesive should provide more than just a strong bond.

## ...to exceptional

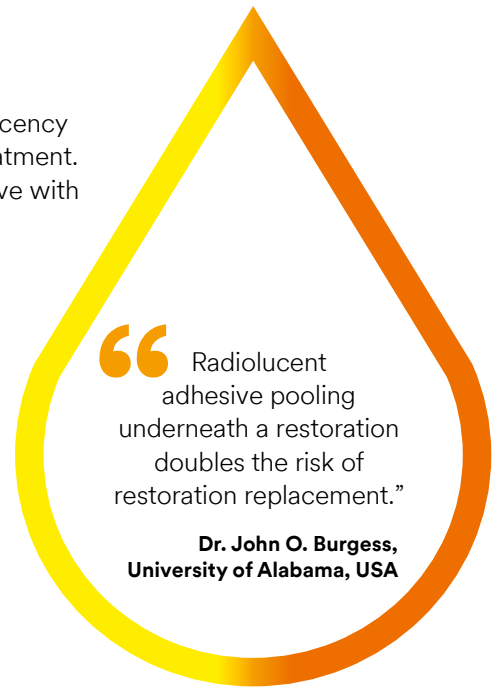

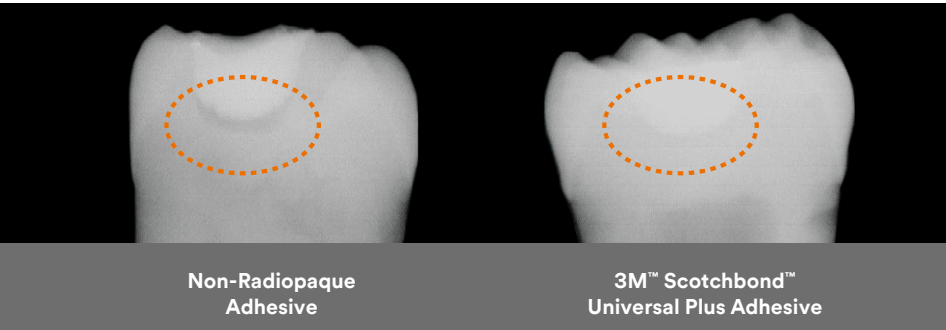

Formulation carefully optimized to achieve unique features.

-  **First radiopaque universal adhesive**  
reducing the risk of X-ray misdiagnosis and invasive overtreatment
-  **Bonds and seals caries-affected dentin**  
maximizing preservation of natural tooth structure, supporting minimally invasive preparation guidelines
-  **Gold standard adhesion to all dental substrates**  
including glass ceramics
-  **Full dual- and self-cure compatibility**  
no need for an additional dual-cure activator bottle
-  **BPA free formulation**  
free of BPA derivatives like BisGMA
-  **Fully aligned system with 3M™ RelyX™ Universal Resin Cement**  
excellent bond strength for virtually all resin cement indications. Adhesive cured by cement.

# Added radiopacity

On average, dentists see at least one hard to interpret X-ray per day due to radiolucency under an existing restoration. This could lead to misdiagnosis and invasive overtreatment. 3M™ Scotchbond™ Universal Plus Adhesive is the first radiopaque universal adhesive with dentin-like radiopacity, helping to overcome this issue.

“Radiolucent adhesive pooling underneath a restoration doubles the risk of restoration replacement.”

**Dr. John O. Burgess,**  
University of Alabama, USA

**Intentional adhesive pooling under Class I restorations** – X-rays of extracted human molars, filling material 3M™ Filtek™ One Bulk Fill Restorative. 3M internal data, H. Loll et al., J Dent Res 99 (Spec Iss A): No. 757, 2020

## Ordering information

### Item no. Product information

#### 3M™ Scotchbond™ Universal Plus Adhesive – Vial

<b>41293</b>	<b>Intro Kit Vial</b> 1 Vial 5ml, 50 Disposable Brushes, 1 Etchant Syringe 3ml, 25 Dispensing Tips
<b>41294</b>	<b>Refill Vial – 1 × 5ml</b>
<b>41295</b>	<b>Refill Vial – 3 × 5ml</b>
<b>41263</b>	<b>3M™ Scotchbond™ Universal Etchant Etching Gel</b> 2 Syringes x 3ml, 50 Dispensing Tips

#### Vial

with smooth and even surface – easy to wipe off excess

#### 3M™ Scotchbond™ Universal Plus Adhesive – Unit Dose

<b>41297</b>	<b>Intro Kit Unit Dose</b> 50 Unit Doses, 1 Etchant Syringe 3ml, 25 Dispensing Tips
<b>41298</b>	<b>Unit Dose 100</b> 100 Unit Doses, 1 Etchant Syringe 3ml, 25 Dispensing Tips
<b>41299</b>	<b>Unit Dose 200</b> 200 Unit Doses, 1 Etchant Syringe 3ml, 25 Dispensing Tips
<b>41304</b>	<b>Unit Dose 400</b> 400 Unit Doses, 1 Etchant Syringe 3ml, 25 Dispensing Tips

#### Unit Dose

for efficient hygiene management – reduces the risk of cross contamination
