

# 3M™ Bair Paws™ Pediatric Warming Gown

The 3M™ Bair Paws™ system is revolutionizing forced-air warming by providing clinicians options for comfort and clinical warming throughout the perioperative process in one convenient gown. The Bair Paws system offers a pediatric size, providing a way to warm and comfort some of the smallest surgical patients.

The Bair Paws pediatric gown accommodates children over 40 inches tall and is designed to be used in the pre-op, OR\* and PACU.

## Warming Gown Features:

- Refastenable strips provide quick access to the arms and chest.
- Side ties ensure full, secure coverage, even in the back.
- Dual air-channel inserts and hose ports enable prewarming and comfort warming with a Bair Paws 800 series warming unit, or clinical warming with a 3M™ Bair Hugger™ 500 or 700 series temperature management unit. (The Bair Paws hose port is on the lower right side; the Bair Hugger hose port is on the upper left shoulder.)
- Soft material means greater personal comfort.

These staff-friendly, convenient, patient satisfying, perioperative warming gowns offer patient gowning and clinical and comfort warming in one easy step.
