

3M™ Steri-Drape™
TUR Drape with Fluid Collection Pouch – 1081

Comprehensive Fluid Control for TUR Procedures

The 3M Steri-Drape TUR Drape is a unique, one-piece design featuring a large fluid collection pouch with integrated filter for effective fluid control and collection of resected tissue.

- The fabric absorbs spills and splatters, making multiple layers unnecessary and prevents strike-through
- Optional aperture for a suprapubic catheter that can stay fully covered by the liner during the TUR, and can easily be removed before catheter insertion
- Malleable metal wire keeps pouch open for optimal fluid collection
- Finger cot does not contain natural rubber latex and is for aseptic rectal palpation
