

Compare before you prep.

Before you select a surgical patient skin preparation, consider which prep makes the most sense for the type of procedure you are doing.

**Chloraprep®
Patient Preoperative
Skin Preparation**
2% Chlorhexidine Gluconate
(CHG) & 70% Isopropyl
Alcohol (IPA)

**3M™ DuraPrep™
Surgical Solution**
(Iodine Povacrylex
[0.7% available iodine] and
Isopropyl Alcohol, 74% w/w)
Patient Preoperative Skin
Preparation

Product Cost

\$

_____ per 26 mL
applicator

sq. in.

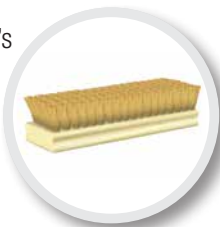

450
sq. in.

Required Application Technique for Surgical Procedures

You must scrub. Per manufacturer's instructions for use*: "Dry Site (such as abdomen or arm) Use repeated back-and-forth strokes of the sponge for approximately 30 seconds. Completely wet the treatment area with antiseptic."

"Moist Site (such as the inguinal fold). Use repeated back-and-forth strokes of the sponge for approximately 2 minutes. Completely wet the treatment area with antiseptic."

*Per NDA 21-555

You can paint. Per manufacturer's instructions for use: "Paint a single, uniform application and do not go back over areas already prepped."

Guidelines Met

Use a dual agent skin preparation containing alcohol
