

## **3M<sup>™</sup> PICC/CVC Securement** Device + Tegaderm<sup>™</sup> I.V. Advanced Dressing

With 3M's new PICC/CVC securement system, you don't have to sacrifice patient comfort to get reliable securement. The Tegaderm™ I.V. Advanced Dressing was specifically designed to enhance securement of the device, ensuring the best possible experience and outcomes. The system is designed to stay in place for up to 7 days, yet removes gently, delivering the securement and comfort your patients deserve.

# 3M<sup>™</sup> PICC/CVC Securement

Device + Tegaderm<sup>™</sup> I.V. Advanced Dressing

## Securement without Sacrifice

- Sutureless securement balances reliable adhesion with gentleness to skin.
- Designed to be worn for up to 7 days.
- Removes cleanly, without causing patients undue pain or distress.
- · Skin-friendly materials improve comfort and mobility.

## Makes Life Easier

- · Quick and easy to apply and remove.
- Accommodates the majority of PICC and short-term CVC catheters up to and including 12 French.
- Can be repositioned upon initial application without losing adhesion.
- Single package with device and dressing simplifies product selection.
- Supports OSHA and CDC Guidelines for sutureless securement.

## **Reduces Overall Cost of Care**

• Eliminates the risks and costs of suture-related needlestick injuries.

### Silicone adhesive

- Holds securely, yet removes gently
- Can be repositioned upon initial application
- Does not require alcohol to remove

#### Easy application securement base

- No mechanical doors or wings
- Visual cues to aid application

#### Comfortable, soft-cloth material

- Conformable and water-resistant
  Perforated for additional breathability

#### Documentation tape strip

- · Preprinted for documenting dressing changes
- · Provides additional securement

#### ہ Tegaderm<sup>™</sup> brand transparent film

- Provides continuous site observation
- Is a waterproof, sterile barrier to external contaminants\*

#### Reinforced stabilization border

- Maximizes securement, breathability and wear time
   Dreasing and tage string are under registeret
- Dressing and tape strips are water-resistant

#### Securement tape strip

- Enhances stabilization
  - Adhesive-free tab minimizes potential to stick to gloves or to itself
  - Allows for one-handed delivery
  - Waterproof film coating

 In vitro testing shows that the transparent film of 3M<sup>™</sup> Tegaderm<sup>™</sup> I.V. Advanced Dressing provides a viral barrier for viruses 27 mm in diameter or larger while the dressing remains intact without leakage.
