Tegaderm™

Wound Care Solutions

3M™ Tegaderm™ High Performance Foam Dressings

3M™ Tegaderm™ High Performance Foam Dressings are designed to meet the challenges of low- to high-exuding wounds. Available with and without adhesion, the dressings integrate innovative features and technology to help maintain an optimal wound healing environment.

3M™ Tegaderm™ High Performance Foam Dressings

Key benefits

Innovative layer technology absorbs and evaporates moisture

Unique multi-layer design provides high absorbency with breathability to reduce the risk of maceration

Adapts to changing levels of exudate to maintain moisture balance for optimal wound healing

Film backing prevents strike-through and protects against external viruses*

Ideal for compression therapy

With adhesion

3M™ Tegaderm™ Silicone Foam Non-Bordered Dressings

With a gentle adhesive that keeps the dressing securely in place, and multiple layers that absorb moisture while providing extra padding, these dressings can easily be cut to a custom shape or size, or used under compression.

Without adhesion

3M™ Tegaderm™ High-Performance Foam Non-Adhesive Dressings

With multiple layers that absorb moisture while providing extra padding, these dressings can easily be cut to a custom shape or size, or used under compression when adhesion (even gentle adhesion) isn't needed.

Suggested applications

- ▶ Management of low- to high-exuding partial and full thickness wounds
- ▶ Venous leg ulcer management
- ▶ With compression therapy

**In vitro* testing shows that the transparent film provides a viral barrier from viruses 27 nm in diameter or larger, while the dressing remains intact without leakage.

HCPCS codes have been provided to assist you in the preparation of insurance claims. Please note, however, that the reimbursement information provided by 3M Health Care and its representatives is intended to provide general information relevant to coverage and coding for 3M products. Insurers' reimbursement policies can vary and the use of the codes discussed here does not guarantee that an insurer will cover or pay at any particular level. Health care providers should exercise independent clinical judgment in choosing the codes which most accurately describe the products provided.
