3M™ Clarity™ Ultra  
Self-Ligating Braces

**See yourself.  
Be yourself.**

Your aspirations, your beliefs, your creativity, your attitude. That's what makes you unique. So why let wearing braces change the way people see you?

## Six reasons to smile confidently with 3M™ Clarity™ Ultra Self-Ligating Braces.

### Smiles designed by science.

The braces are made from a high-tech, translucent ceramic that naturally blends with your teeth.

### Convenient and easy care.

With no ligatures to trap food particles against the teeth, Clarity Ultra self-ligating brackets may be easier to keep clean and avoid plaque build up on the tooth enamel.

### Look great from start to finish.

Clarity Ultra clear braces resist staining, discoloration and do not require ligatures that may stain during treatment.

### You may spend less time in the orthodontist's chair.

With no ligatures to put on or take off, your appointments may not take as long—giving you more time to get out and enjoy life.

### Delivering excellent comfort.

Clarity Ultra clear braces feature smooth surfaces and rounded edges, reducing the rubbing and irritation typical of some braces.

### Always in and working.

Unlike clear aligners which must be removed for eating and drinking\*, Clarity Ultra clear braces stay in place so your treatment's always advancing.

*\*Except water*

## What are self-ligating braces?

Self-ligating simply means the braces work without ligatures—the bands that other styles of braces use to hold the archwire in place. Instead, Clarity Ultra self-ligating braces have small ligating doors which open, and snap closed over the archwire for a more natural look.

*Metal braces with ligatures*
