More confidence.  
It all starts here.**

**3M Direct Restorative Solutions**

- ✓ Performance
- ✓ Productivity
- ✓ Progress

# Partnering for success on the road to practice growth.

## A history of innovation. A legacy of trust.

Over the last 50 years, 3M Oral Care has focused on using material science to help overcome common challenges in each step of the direct restorative procedure. We've introduced groundbreaking industry "firsts" that help deliver an excellent patient experience while enhancing your productivity.

- 1964** » The first tooth-colored restorative material
- 1997** » The first dental company to win the coveted Malcom Baldrige National Quality Award
- 1998** » The first true nanocomposite – for beautiful, strong restorations that last
- 2009** » The first toothpaste with functional tri-calcium phosphate (fTCP)
- 2011** » The first universal adhesive
- 2013** » Polishing wheel introduced using patented radial bristle disc design
- 2016** » 1 billion restorations completed using 3M™ Filtek™ Dental Restoratives
- 2017** » Smart Contrast Ratio Management technology for improved opacity
- 2018** » First composite cleared by the FDA for warming
- 2020** » The first radiopaque universal adhesive, enabling more accurate X-ray diagnosis

## Meet our partners.

3M has teamed up with two industry leaders in techniques and technology for restorative dentistry:

# bluelight

Half of all dental income\* relies on the successful use of light-cured dental materials. Yet, it's hard to tell if a curing light is doing its job. Bluelight and 3M have teamed up to give you the evidence you need to be confident in the performance of your curing light – tailored for the restorative materials you use.

- » With **Bluelight CheckMARC® service**, a trained 3M representative will visit your clinic and evaluate your light-curing materials and protocols.

# BIOCLEAR

The Bioclear™ Method uses injection molding with warmed 3M™ Filtek™ Dental Restoratives to take the guesswork out of shaping, create natural contacts, preserve tooth structure – and achieve spectacular, transformative results.

- » Correct black triangles easily and beautifully
- » Predictably perform Class II restorations with better results for you and your patients
- » Give patients a minimally invasive option for restoring their smile

**Harness the combined power of these advanced materials and innovative method to put your practice on the path to restorative success.**

Tough procedure challenge?  
**Find your roadmap for success.**

# 3M Direct Restorative Solutions

For over 50 years, 3M Oral Care has supported you with industry-leading composites, adhesives, finishing and polishing systems, fluoride-based products and more.

Now, it all comes together – in a comprehensive portfolio of solutions designed to help you take your direct restorations to the next level.

- ✓ Streamline your procedures
- ✓ Overcome common challenges
- ✓ Deliver an excellent patient experience

## Shade selection

Make it easier to match your patients' dentition by choosing composites formulated to match the VITA® Classical Shade Guide – and with a range of shades and opacities to match your technique.

## Technique selection

3M Direct Restorative Solutions are designed to help you improve efficiency and meet patient expectations for natural-looking restorations.

- ✓ Single-shade
- ✓ Multi-shade
- ✓ Injection molding

Improve control and predictability at every step.

### Composite placement

### Adhesive application

### Light curing

#### 3M™ Filtek™ Dental Restoratives: Universals, Flowables and Bulk Fills

- ✓ Create strong, wear-resistant restorations
- ✓ Improve handling with composite warming
- ✓ Find the right balance of aesthetics and efficiency

#### 3M™ Scotchbond™ Universal Plus Adhesive

- ✓ Dentine-like radiopacity
- ✓ Virtually no post-op sensitivity
- ✓ High bond strength in one bottle system

#### 3M™ Elipar™ DeepCure-S LED Curing Light

- ✓ Delivers a deep, predictable uniform cure
- ✓ Comfortable, ergonomic, and efficient design

\*Clinpro™ 5000 is a fluoride toothpaste for use after recommendation and supply by a dentist or healthcare professional, in the prevention of dental caries in high risk patients. Dosage: Use once daily in place of conventional toothpaste. Method of use: Apply a thin ribbon or pea-sized amount of Clinpro™ 5000 to a soft-bristled toothbrush and brush the teeth for at least two minutes. After brushing, adults should expectorate. Children 6 to 16 years of age should expectorate and rinse mouth thoroughly with water. For best results, do not eat and drink for 30 minutes after use. Contraindications: Not recommended for use in children under 6 years of age. Do not use if known allergic reactions or hypersensitivity to any of the ingredients. Healthcare professionals should review the full Product Information/Data Sheet Document before prescribing. For complete prescribing information, and dosage and administration guidelines, please visit [www.3M.com.au/preventive](http://www.3M.com.au/preventive) or [www.3M.co.nz/preventive](http://www.3M.co.nz/preventive).
