3M Science.
Applied to Life.™

Let's get to the core of securement.

We're changing the look of our medical securement solutions to make it easier for you to select the right securement product for each of your clinical applications.

Most facilities have four types of securement needs based on clinical application, so we've updated the color of our product cores and packaging to align with these securement classes:

Skin performance
The feather designates products that deliver the securement power you need while minimizing damage to skin.

Individually packaged single-patient-use rolls can help protect patients by reducing the risk of cross-contamination.**

Non-adhesive

3M™ Coban™ NL
Non-Latex Self-Adherent Wrap

Clinical Applications such as:
- Blood draws
- Dressings
- Immobilization
- Compression*

3M™ Coban™

3M medical securement products are intended for use on intact skin.
*May use as a component in a compression wrap system support only under supervision of a wound care specialist.
**Individually packaged, single-patient-use rolls help prevent tape from being exposed to environmental contaminates, minimizes contact with hospital surfaces and equipment, and exposure to healthcare worker hands.
