

**3M**

**Filtek™**

**Z350 XT  
Universal Restorative**

**Dentists everywhere  
love using it  
anywhere.**

# 600 million reasons you can be confident using it anywhere.

Bring unsurpassed esthetics and outstanding strength to every restoration—anterior or posterior—with 3M™ Filtek™ Z350 XT Universal Restorative.

As you'd expect from the global leader in esthetic and restorative technologies, 3M's TRUE nanotechnology provides superior wear resistance and gloss retention ... so your restorations will last and look beautiful, too.

That's why dentists around the world have made it their composite of choice for **more than 600 million restorations\*** ... and counting.

## 3M™ Filtek™ Z350 XT Universal Restorative

## Simplify your practice with the composite that does it all.

Any place: anterior or posterior. Any class.

## A versatile choice is a smart choice.

### Unsurpassed esthetics

- Excellent polish retention
- Wide range of shades and opacities
- Natural-looking fluorescence

### Simple to use

- Exceptional handling
- Natural-looking body shades for a simple, single-shade technique
- Capsules and syringes are color coded by opacity

### Durable in anterior and posterior use

- Excellent wear resistance
- Outstanding strength
- High radiopacity

\*3M™ Filtek™ Supreme Universal Restorative line

# Always beautiful

## When you want to elevate your artistry, here's your dream palette.

When it comes to beautiful, natural-looking results, there's nothing like 3M™ Filtek™ Z350 XT Universal Restorative. Whether you specialize in esthetic dentistry or create esthetic restorations in specific cases, we have your dream palette.

Our **36 beautiful shades and 4 opacities** allow you to match any patient's dentition and create restorations that are virtually undetectable using a multi-shade layering technique.

Anterior restoration created using three shades (A3D, A3.5B, A1E) of 3M™ Filtek™ Z350 XT Universal Restorative.

Photo courtesy of Dr. Gabriel Krastl, Department of Periodontology, Endodontics and Cariology, University of Basel, Switzerland.

## Four Opacities

Translucent, Enamel, Body and Dentin designations refer to differences in opacity.

Syringes and capsules are color coded by opacity—Translucent, Enamel, Body and Dentin—and bold lettering makes shades easy to identify.

## Unsurpassed polish retention—a difference you can see.

The initial gloss of most restoratives can be very impressive, but you want a polish that lasts. Thanks to 3M's TRUE nanofiller technology, Filtek Z350 XT restorative polishes easily and retains its natural gloss better than other composites—even a microfill.

Polish you can see. Side-by-side photos compare the polish retention of leading restoratives to that of 3M™ Filtek™ Z350 XT Universal Restorative after 6,000 cycles of simulated toothbrushing.

# Beautifully simple

## When you want a simple solution, you'll love this.

Most restorations are made with just one of eight Body shades. By using 3M™ Filtek™ Z350 XT Universal Restorative, it's truly possible to create natural-looking restorations using a simple, single-shade technique.

Dentists say they love the way Filtek™ shades blend with surrounding dentition. Add to that the high gloss provided by 3M's TRUE nanotechnology, and you'll find it really easy to satisfy patient expectations.

### 8 “Go-to” Body Shades

Filtek™ shades match the VITA classical Shade Guide. An A2 is an A2, so esthetics are beautifully predictable.

## Dentists rate the handling as “ideal.”

It's easier to achieve the restorative result you want when the composite handles well. For example, the improved handling of our Translucent shades makes it easier to create lifelike incisal edges.

All of our shades offer excellent handling. In fact, in a field study,\* dentists rated Filtek Z350 XT restorative as “ideal” on viscosity, stickiness, flow and ability to hold its shape.

\*3M internal data

# Simply durable ... anywhere

## Beautiful ... yes. And it's strong enough to use anywhere.

Think how much more efficient your day would be if you didn't have to decide which composite to use in each clinical situation. Our TRUE nanotechnology gives 3M™ Filtek™ Z350 XT Universal Restorative remarkable strength for anterior and posterior use.

Amalgam filling replaced by 3M™ Filtek™ Z350 XT Universal Restorative in a posterior restoration.

## Excellent wear resistance

The lower the wear rate of a composite material, the better its wear resistance. In an in vitro 3-body wear test, Filtek Z350 XT restorative had the lowest wear rate of all leading composites tested.

3-Body Wear

## Normalized wear rate

<b>3M™ Filtek™ Z350 XT Universal Restorative</b>	<b>1.0</b>
Grandio®SO	1.4
EsthetX® HD	1.6
TPH Spectra® HV	2.6
Tetric EvoCeram®	3.4
Herculite™ Ultra	2.5

Over 200,000 cycles

## Outstanding strength

In a test comparing leading dental composites, the flexural strength of Filtek Z350 XT restorative proved better than that of EsthetX® HD, Herculite™ Ultra and Tetric EvoCeram®, and comparable to other composites tested.

Flexural Strength

## 3M's TRUE nanofiller technology leads to outstanding polish and strength.

The significant distinction between 3M™ Filtek™ Z350 XT Universal Restorative and micro- and nanohybrids is that our nanoparticles are uniquely formed in the nano size range and are not the result of a grinding process. Some nanoparticles are fused into nanoclusters, which shear at a rate similar to the wear of the surrounding resin matrix during abrasion, such as toothbrush abrasion. That's why restorations made from Filtek Z350 XT restorative maintain a smooth surface gloss for superb esthetics.

The nanoclusters have a similar size range as fillers found in the hybrid composites and provide for high filler loading. This results in excellent physical properties and wear resistance that are ideal for posterior restorations.

You may already know the benefits of working with 3M™ Filtek™ Z350 XT Universal Restorative. What you may not know is how easy it is to move from a single-shade to a dual-shade technique. The 3M™ Shade Selector Wheel simplifies the selection process and serves as a guide for placing one to four shades of composite. It is included in every dual-shade kit and professional kit.

## Ordering Information

Although Filtek Z350 XT restorative is available in 36 shades and opacities, the **8 Body shades** highlighted below will meet the majority of your needs for creating natural-looking, single-shade restorations.

Item #	Product Information
7018S	<b>3M™ Filtek™ Z350 XT Universal Restorative Single Shade Intro Kit—Syringe</b> Kit includes: 4 – 4g syringe; 2 each of Body shades A2, A3; Technique Guide; Instructions for Use
7018D	<b>3M™ Filtek™ Z350 XT Universal Restorative Dual Shade Intro Kit—Syringe</b> Kit includes: 4 – 4g syringes; 1 each of Dentin shades A3, A4 and Enamel shades A2, A3; 1 Shade Selector Wheel; Technique Guide; Instructions for Use
