

3M™ OMNI Gel™
0.4% Stannous Fluoride
Preventive Treatment Gel

Drug Facts

Active ingredient	Purpose
Stannous fluoride 0.4% (0.12% w/v fluoride ion)	Anticavity

Use aids in the prevention of dental decay

Warnings

Keep out of reach of children. If more than used for brushing is accidentally swallowed, seek medical attention or contact a Poison Control Center right away.

- this product may produce surface staining of the teeth
- adequate toothbrushing may prevent staining
- staining is not harmful or permanent and may be removed by your dental professional

Directions

adults and children 6 years of age and older:

- use a pea-sized (.25g) dose once a day after brushing your teeth with a toothpaste
- apply the gel to your teeth and brush thoroughly
- allow the gel to remain on your teeth for 1 minute and then spit out
- do not swallow the gel
- do not eat or drink for 30 minutes after brushing
- instruct children under 12 years of age in the use of this product (to minimize swallowing)
- supervise children as necessary until capable of using without supervision

children under 6 years of age:

- consult a dentist or doctor

Other information

- this is a fluoride preventive treatment gel, not a toothpaste
- read directions carefully before use
- do not freeze or expose to extreme heat
- do not use if tamper evident seal on top of box is broken or removed

Inactive ingredients glycerin, hydroxyethylcellulose, flavor

A Pain-Free Way To Fight Tooth Decay

3M™ OMNI Gel™
**0.4% Stannous
Fluoride Preventive
Treatment Gel**

Fight Cavities with 3M™ OMNI Gel™ 0.4% Stannous Fluoride Preventive Treatment Gel.

3M™ OMNI Gel™ 0.4% Stannous Fluoride Preventive Treatment Gel, the first stabilized stannous fluoride brush-on therapy available in America, has helped millions of people protect their teeth from decay.

Dental care has improved dramatically in the past few decades. Fluoride in toothpaste has helped reduce the incidence of cavities. Better treatment of gum disease is also helping people keep their teeth longer. However, many adults need the extra fluoride protection that OMNI Gel therapy provides because:

- High-sugar and -starch diets increase your risk of tooth decay
- Receding gums increase your risk of getting root cavities
- Hundreds of medications cause dry mouth, which increases your risk of getting cavities

To achieve optimum oral health, remember to:

- Use prescribed medications as directed
- Inform your dental professional if you are currently taking any medications
- Brush and floss daily
- Keep your regular dental appointments
- Follow all the instructions of your dental professional

Your Examination Has Revealed The Following:

Key:

- | | |
|----------------------------------|---------------------------|
| 1. Cavities | 5. Tooth Sensitivity |
| 2. Root Cavities | 6. Gum Disease/Gingivitis |
| 3. Plaque Build-Up | 7. Periodontal Disease |
| 4. "White Spots" Decalcification | |

Other:

- Oral Malodor Dry Mouth
- _____

Instructions:

Your dental professional will advise you on the appropriate course of treatment for your situation, which may include using 3M™ OMNI Gel™ 0.4% Stannous Fluoride Preventive Treatment Gel.
