3M Oral Care

**3M post and core solution.
Complexity simplified.**

3M post and core solution. Featuring 3M™ RelyX™ Fiber Post 3D.

For predictable results – in less time.

We know: The endodontic procedure is very complex. So the simpler and more reliable the endodontic restorative procedure is, the better – for both the dentist and the patient. The excellent 3M post and core solution is a big step forward in this regard: With significantly fewer clinical steps and fewer products, it lets you work faster, easier and more efficiently.

All you need to do is take four steps.

The 3M post and core solution not only simplifies your work but also helps you deliver predictable, robust outcomes – from root to core. All you need is the 3M™ RelyX™ Fiber Post 3D Glass Fiber Post plus three other easy-to-use products from 3M Oral Care: 3M™ RelyX™ Unicem 2 Automix Cement, 3M™ Scotchbond™ Universal Adhesive, and 3M™ Filtek™ One Bulk Fill Restorative.

These four products – each of them proven to make your work more reliable and efficient – have one common objective: Simplify the complex!

Fewer clinical steps, fewer products.

Post

3M™ RelyX™ Fiber Post 3D Glass Fiber Post – With a unique 3D design for more confidence

RelyX Fiber Post 3D builds on the 8 years of clinical success of the proven product RelyX Fiber Post. Now, we have further improved it to enhance your peace of mind:

- High mechanical retention to the core build-up material thanks to coronal 3D macro retention.
- Strong bond in the root canal due to its microporous surface without a silanating step.
- Better post position control thanks to excellent radiopacity.
- Low risk of root fracture due to dentin-like elasticity.
- More esthetic option than a metal post.

Cement

3M™ RelyX™ Unicem 2 Automix Self-Adhesive Universal Resin Cement

RelyX Unicem 2 Automix Cement not only offers excellent bond strength but also saves you precious time, as you do not need to etch, prime or bond.

The handy automix syringe, together with the endo tip, lets you apply the ready-mixed cement directly in the root canal from bottom to top.

With one application – and virtually no voids.

Adhesive

3M™ Scotchbond™ Universal Adhesive

Scotchbond Universal Adhesive provides a reliable bond of the core build-up material to the post and tooth structure – with no need for an additional primer.

One application – done!

Core build-up

3M™ Filtek™ One Bulk Fill Restorative

Excellent material and handling characteristics make Filtek One Bulk Fill Restorative a great choice of core build-up material. With one-step increments up to 5mm, core build-ups can be done faster and easier.

3M™ RelyX™ Fiber Post 3D Glass Fiber Posts are available in four different sizes. Color codes ensure an accurate match to the drills.

Five drill sizes (including one universal drill).

Ordering Information

Item No.	Product Information
3M™ RelyX™ Fiber Post 3D Glass Fiber Post	
56957	Introductory Kit 20 posts sizes 0, 1, 2, 3 (5 posts of each size), 5 drills sizes 0, 1, 2, 3, Universal (1 drill of each size)
56958	Trial Kit with 3M™ RelyX™ Unicem 2 Automix Cement 10 posts sizes 1, 2 (5 posts of each size), 3 drills sizes 1, 2, Universal (1 drill of each size), 1 – 3M™ RelyX™ Unicem 2 Automix Syringe A2 – 8.5g, 10 mixing tips, 10 endo tips
56960	Post and Core Build-up Kit with 3M™ RelyX™ Unicem 2 Automix Cement 1 Trial Kit 3M™ RelyX™ Fiber Post 3D / 3M™ RelyX™ Unicem 2 Automix Cement, 20 capsules 3M™ Filtek™ One Bulk Fill Restorative A3 – 0.2g each, 1 vial 3M™ Scotchbond™ Universal Adhesive – 5ml
Refills posts and drills
