Protocols in practice: building an effective bonding procedure

Lunch and learn

Why do bond failures matter?

Patient
experience

Practice
profitability

Treatment
time

Dr. Christian Groth

TDR Orthodontics
Birmingham, MI

“[Clarity Digital Bonding] hits everything. Fewer visits to the office [for patients], less stress on the staff and doctor. I can get them finished with treatment faster. A shorter bonding appointment allows us more time to answer their questions and be thorough.”

You'll leave this educational lunch with a clear understanding of:

The variables that lead to contamination and how to control them

Tusted products and protocols for effective bonding, backed by science

The most efficient bonding steps for metal, ceramic, molars and aligner attachments

The latest technologies in digital bonding

Key steps that have been adopted by practices globally, with consistent results

With over 40 years of leadership in bonding, we can provide guidance and insights on successful techniques.
