

Our mission: Enabling better, smarter, safer healthcare to improve lives.

Company overview:

Solventum health information solutions close the loop between clinical care and revenue integrity.

We partner with U.S. federal healthcare organizations including the Department of Defense (DoD), Defense Health Agency (DHA), Veterans Affairs (VA), Indian Health Service (IHS), Tribal Health and the Centers for Medicare & Medicaid Services (CMS) to deliver technology and analytics solutions built for the unique demands of the government space. Our tools are designed to align with each agency's specific requirements, regulations and operational goals — helping them improve care delivery, drive compliance and better use their data.

Core competencies:

FedRAMP® Authorized platform

- Solventum™ Revenue Cycle Health Services Platform (RHSP) integrates computer-assisted coding, grouping and patient classification, CDI, analytics and workflow support into one secure system.
- AI-driven tools help improve coding accuracy, strengthen compliance and reduce provider burden.

Integrated revenue cycle platform

- Solventum™ 360 Encompass™ System unifies documentation, coding, audit and analytics workflows within a single platform.
- The platform provides one source of truth to improve compliance, support accurate reimbursement and enable data-driven decisions.

Timely regulatory data, logic and quality metrics

- Solventum™ Grouper Plus Content Services (GPCS) delivers up-to-date grouping, reimbursement and editing capabilities through secure, web-based access to enable compliant decision-making and reduce maintenance needs.
- Solventum methodologies enhance severity and risk capture to support accurate federal quality reporting, performance benchmarking and audit defensibility.

Clinician workflow optimization

- AI-driven documentation and ambient speech tools are designed to enhance workflow efficiency.
- Capture accurate clinical records in real time to help reduce administrative burden, enhance care delivery and improve revenue outcomes.

What sets us apart:

- Proven performance across DoD, VA, IHS and CMS environments
- Scalable technology designed for high-security, high-complexity environments
- AI-powered tools that reduce manual burden and improve compliance
- Deep domain expertise in U.S. federal healthcare operations and workflows
- Interoperability with existing EHRs and federal data systems
- Customizable content design and training that ensures end user confidence
