solventum

Enabling better, smarter, safer healthcare to improve lives

From capture to code and beyond

solventum

Driving cumulative value - from capture to code and beyond

Disconnected workflows and siloed workforces cause inefficiencies and inaccuracies that lead to burnout and poor outcomes. With a deep understanding of the drivers of financial, quality and care outcomes, we deliver trusted insights at critical points across the workflows.

From making it easier for clinicians to capture the complete patient story to improving CDI and coding outcomes, our comprehensive capture to code portfolio is designed to create time to care, eliminate revenue cycle waste and drive quality.

Create time to care

Clinician-assistive solutions capture the patient visit, deliver proactive clinical insights and drive high-value action in EHR workflows.

Eliminate revenue cycle waste

Autonomous coding, CDI and revenue integrity software help you bill as quickly and compliantly as possible enhanced by consulting and outsourced services.

Drive quality

Software, services, and methodologies identify where to improve care quality and reduce preventable events.

Powered by

Conversational, generative, and ambient AI

Natural language understanding

Clinical intelligence and understanding

Globally adopted payment and quality methodologies

One partner you can rely on

"The team was willing to be contacted day or night because as a team, we ride together, we die together. They continue to reinforce why we made the right decision by organizationally keeping their standards, their integrity and honesty."

Dr. Damon Dietrich,
CMIO
LCMC

"The sell is the team that's behind the software. The sell is the process of innovation and iteration that we've seen over the course of the software. The people, it's the improvement of that over time, and it's the capability for their team to help us to keep building the future iterations."

Jason Hill,
Innovation Officer
Ochsner Health System

"When I was looking to move our entire digital health care ecosystem to the cloud, not only did the implementation time exceed our expectations, but our users are benefiting from the scalability, agility and security that the cloud solution provides."

Shafiq Rab, MD
CIO and CDO
Tufts Medicine

Focus on delivering care, not documenting it

Reduce administrative burden and cognitive overload on clinicians and create time to care for the well-being of patients and their doctors. Transform the patient-clinician relationship while improving clinical, operational and financial efficiencies.

Leverage a conversational AI powered portfolio that meets all your charting and documentation needs – from speech enabling your EHR to automating the generation of a high quality note.

Flexible and unified workflows

- Real time speech understanding
- Ambient documentation
- Radiology reporting
- Transcription

Automation and innovation

- Generative AI note creation in real time
- Virtual assistant technology
- Ambient and clinical intelligence

EHR compatibility and usability

- Compatible with more than 250 EHRs
- Speech-driven EHR workflows
- Automated EHR functionalities

Adoption and user experience

- 300,000 clinicians use our speech understanding
- High touch adoption services
- Cloud-based solutions leveraging a single user speech profile

30% increase
in clinician productivity with Solventum speech understanding

– OneOncology physician*

> My goal is to save time and get back sanity Everybody is so busy; even getting back five minutes is huge. The biggest thing is finding room to breathe – time to think gives you more time to care.

Dr. Damon Dietrich, CMIO, LCMC Health

Speech-enable the EHR ———————— Automate the note ————

Close the loop in clinical documentation integrity (CDI)

Reduce rework by proactively nudging clinicians in their EHR workflow to close gaps in documentation and care. Improve scale and coverage by empowering CDI teams to prioritize worklists, summarize clinical evidence and deliver queries.

Drive efficiencies while improving quality and financial outcomes with closed-loop inpatient and outpatient CDI solutions and services.

Clinician engagement

- Computer-assisted physician documentation (CAPD)
- In-workflow query delivery and response
- Pre-visit clinical insights

CDI team efficiencies

- AI-powered worklist and patient prioritization
- Auto-suggested working DRGs
- Real time automatic impact

Quality and risk adjustment

- Concurrent quality indicators
- Severity of illness (SOI) and risk of mortality (ROM)
- Accurate RAF scores

Performance insights and expert services

- Enterprise analytics and dashboards
- Built-in compliance, CDI and coding guidance
- CDI consulting and outsourcing

In 8 months, generated impact similar to the addition of
4.6 CDI RNs

– Intermountain Health*

> "We're seeing a big impact in finances as well as risk adjustment, and that's across the board."

Kory Anderson, MD FACP CHCQM
Senior medical director of Intermountain physician advisor services, CDI and acute care quality, Intermountain Health

Nudge for documentation improvement

Prioritize CDI reviews for impact

Code quickly and compliantly, stop revenue leakage

Address staffing challenges, regulatory changes, compliance and growing specificity in codes. Inaccurate coding adds up to costly denials.

Solventum autonomous coding, audit and revenue integrity software, and services can help you predict and address denials, bill quicker and optimize your revenue cycle program compliantly.

Automated and compliant coding

- Fully autonomous for qualified visits
- Semi-autonomous where needed
- Expert-guided clinical AI models
- Full control of automation and QA

Revenue integrity

- Actionable root cause denials analytics
- Real time denials guidance in workflow
- Prospective and retrospective review

Consulting and outsourcing

- Consulting and auditing across care settings
- Customized education
- Skilled, credentialed outsourced coding staff and management

Payment and quality methodologies

- Appropriate payment incentives
- Expected outcomes prediction and verification
- Organization comparisons

48% decrease
in A/R days from coding automation

– Multi-state health system in Midwestern U.S.*

> "We've been able to save many, many FTEs in that space. We've been able to improve our time to bill. We also have used the technology to look at the quality of our documentation as it relates to reimbursement and even into the quality scoring."

Thea Campbell, MBA, RHIA
Vice president of HIM, Cedars-Sinai

Automate coding   Minimize denials

The new healthcare company you already know

Enabling better, smarter, safer healthcare to improve lives from capture to code and beyond

40+ years
of clinical, CDI and coding expertise

75% of U.S. hospitals
use at least one of our solutions

300K clinicians
use our speech understanding solutions

400+ clinical and content experts
in-house, optimizing our solutions

250 EHRs
compatibility with our speech understanding solutions

495+ million
clinical documents processed every month**
