

3M™ Clinpro™ Clear Fluoride Treatment

Fluoride. Simplified.

Introducing the next generation in fluoride treatment

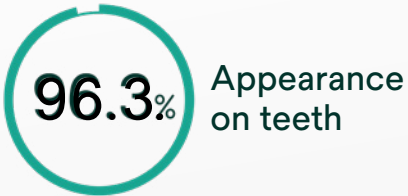

3M Clinpro Clear
Fluoride Treatment

Your patients deserve more

In a clinical study, patients and professionals preferred 3M™ Clinpro™ Clinpro Clear Fluoride Treatment over tray gel fluoride and rosin-based varnish treatment.

Patient ratings:

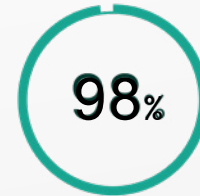

Patients rated 3M Clinpro Clear Fluoride Treatment **96.3** out of 100 in **appearance on their teeth**

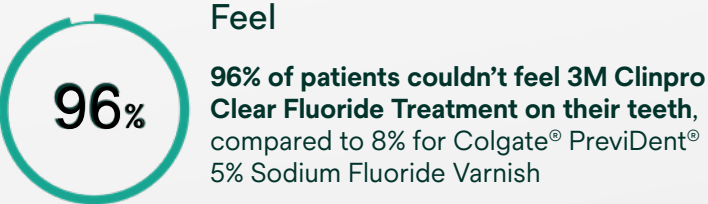

93.8% of patients judged 3M Clinpro Clear Fluoride Treatment to have a **smooth and slick mouthfeel**

Hygienist ratings:

Hygienists rated their patients' **perception of their experience** with 3M Clinpro Clear Fluoride Treatment **98 out of 100**

One hour after treatment:

Fast and easy application

The unique L-Pop delivery system provides an improved professional experience as well.

- Apply with swiping motion — no need to brush onto individual tooth surfaces
- The mean ease of application score for 3M Clinpro Clear Fluoride Treatment was 97.2 out of 100
- In a clinical study, 100% of hygienists said that most users would learn to use 3M Clinpro Clear Fluoride Treatment quickly

Just press...

A fluoride treatment that does more with less

Based on patient and professional feedback, we've reimagined the traditional fluoride treatment. 3M™ Clinpro™ Clear Fluoride Treatment has a new water-based formula that's ready to apply and enables effective fluoride uptake. With less time waiting to eat or drink after treatment, 3M Clinpro Clear Fluoride Treatment makes it easy for your patients to say "yes."

Clear, water-based formula in a fast and easy L-Pop unit dose

Formula is free of rosin and common allergens* with a neutral pH

Stabilized calcium phosphate

Minimum contact time of just 15 minutes

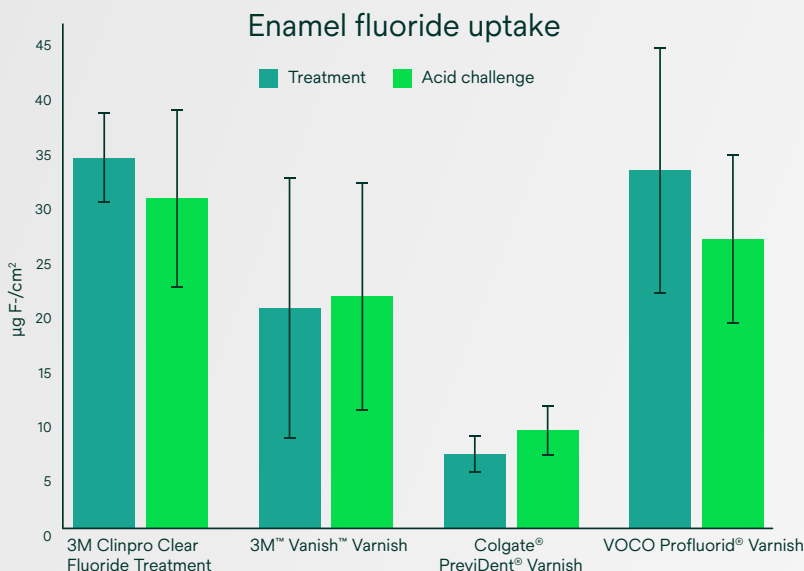

Improved taste, smell, and mouthfeel

Suction-line friendly formula

*See allergen disclosure at Solventum.com

Source: Solventum internal data

With soluble fluoride ions immediately available to deposit on the tooth, 3M Clinpro Clear Fluoride Treatment is a 2.1% sodium fluoride solution that provides similar fluoride uptake as a traditional 5% varnish.

After treatment and after acid challenge, the enamel fluoride uptake (EFU) of 3M Clinpro Clear Fluoride Treatment is statistically not different from products tested.
