

Solventum™ Fluency Direct™ compatibility with PyraMED Health Systems EHR

- Proactively engage clinicians with AI-powered insights within their EHR workflow to reduce rework and administrative burden
- Create time to care by enabling physicians of any medical specialty to dictate high quality clinical notes directly in the EHR
- Allow physicians to dictate from multiple locations as they move between exam rooms, office and home

Complete, compliant and real time documentation

Solventum Fluency Direct has been engineered to speech enable the PyraMED Health Systems (PyraMED) electronic health record (EHR) system to allow physicians of any medical specialty to dictate, review and edit clinical notes directly in the EHR. A single, cloud-hosted speech profile can be used from any PyraMED-enabled workstation for rapid adoption, greater productivity and improved physician satisfaction.

Solventum Fluency Direct enables clinicians to create complete, compliant and real time documentation directly in the PyraMED EHR, reducing the administrative burden on physicians and creating time to care. Physicians can also:

- Use Solventum's speech understanding to help quickly, efficiently and accurately document directly in the PyraMED EHR's free text fields and progress notes
- Speed up documentation availability with real time dictation that creates instant, high quality medical reports in the EHR
- Leverage artificial intelligence (AI)-powered computer-assisted physician documentation (CAPD) to deliver proactive nudges to clinicians within the EHR workflow
- Efficiently dictate from multiple locations as clinicians move between exam rooms, office and home without the need to sign off from individual workstations
- Define speech-enabled commands to automate frequent tasks and normal text
- Improve the adoption of front-end speech recognition technology while minimizing user-specific activity

PyraMED EHR is compatible with Solventum Fluency Direct to enable automatic support for text controls, allowing for free-form dictation as well as command and control. Solventum's technology can support all virtual deployments including those hosted by PyraMED.
