

# Solventum™ Fluency Go™

- Spend more time interacting with patients by streamlining clinical documentation
- Dictate a compliant patient note immediately with access to EHR chart data, macros and templates
- Increase efficiency by using speech to enter all clinically relevant information in one, easy-to-navigate application

**Simplify and streamline documentation**

## Solventum Fluency Go features:

**Anywhere dictation**

**Intuitive design  
for streamlined  
documentation**

**Bi-directional input  
with the EHR**

Physicians spend nearly half their time on administrative work<sup>1</sup> and 37 percent of them believe this contributes to burnout.<sup>2</sup> At the same time, physician practices struggle to contain costs, optimize the use of electronic health records (EHRs), reduce staff attrition and improve patient satisfaction and physician productivity.

To reduce the time clinicians spend trying to meet documentation requirements in a timely manner, Solventum offers a solution that helps improve patient-physician interactions while driving clinical documentation efficiencies and improving physician efficiency.

Solventum Fluency Go is a mobile application that integrates with your EHR and supports the natural workflows of physicians. Designed to simplify and streamline physician documentation in the EHR, Solventum Fluency Go empowers physicians with the flexibility and mobility to easily document patient visits. Busy physicians can use the mobile app on the go and choose the workflow that best meets their current needs, whether it's using front-end speech recognition with a simple interface or automating note creation using generative artificial intelligence (AI). This AI application automatically generates documentation and returns it directly to your EHR in seconds, with no need to copy and paste.

## Create time to care

By untethering physicians from their desktops, Solventum Fluency Go improves their ability to capture documentation quickly and efficiently from any location, at any time. This reduces the overall time physicians spend on capturing clinical notes—time that can instead be spent on seeing more patients.

Designed to meet the needs of physicians of many medical specialties in practices of various sizes, Solventum Fluency Go is cost effective, simple, easy to install and use.

## Drive outcomes:

Users of this mobile solution can:

### **Save time:**

Hours freed up from documentation

### **Increase capacity:**

By reducing administrative burden, you can do more of what you like

### **Improve performance:**

Being able to focus on patients can help improve outcomes

Solventum Fluency Go's mobile documentation functionality gives doctors the comfort, control and confidence that the patient encounter can be easily and efficiently captured in the EHR so that they can focus on patient care.
