

Prevena™
Incision Therapy

The 3M™ Prevena™ Therapy portfolio of closed incision management solutions

For optimal incision management

3M™ Prevena™ Peel and Place Incision Management System - designed for ease of use

Available with two dressing options:

- 3M™ Prevena™ Peel and Place Dressing – 13cm (for linear incisions up to 13cm in length).
- 3M™ Prevena™ Peel and Place Dressing – 20cm (for linear incisions up to 20cm in length).

Features and advantages

Easy-to-use therapy unit

- 1** Single button operation
Turn therapy unit on, off, and activate alert mute.
- 2** Audible and visual alerts
Notify patient and clinician of incidence of leaks, full canister, and low battery.
- 3** 3M™ Prevena™ 45ml Canister
Replaceable canister allows storage of exudate away from the incision site.

Integrated one-piece dressing

- 1** Foam bolster
Channels negative pressure to the incision area.
- 2** Skin-friendly interface layer
Wicks fluid away from the surface.
- 3** Stabilization layer
Prevents film from wrinkling during application.
- 4** Adhesive film
Creates a barrier to external contaminants.

3M™ Prevena™ Plus Incision Management System - designed for flexibility

Available with two dressing options:

- 3M™ Prevena™ Plus Customizable Dressing (for linear, non-linear and intersecting incisions up to 90cm in length).
- 3M™ Prevena™ Plus Peel and Place Dressing – 35cm (for linear incisions up to 35cm in length).

Features and advantages

Easy-to-use therapy unit

- 1 Single button operation
Turn therapy unit on/off.
- 2 Audible and visual alerts
Notify patient and clinician of leaks, full canister, and low battery.
- 3 3M™ Prevena™ Plus 150ml Canister
Replaceable canister allows storage of exudate away from the incision site.
- 4 Rechargeable battery
Eliminates the need to replace batteries.

3M™ Prevena™ Plus Customizable Dressing

- 1 Foam bolster
Conforms negative pressure to the incision area.
- 2 Skin-friendly interface layer
Wicks fluid away from the surface.
- 3 Hydrocolloid strips
Secures dressing to application site and helps with sealing.
- 4 SensaT.R.A.C.™ Pad
Technology to monitor and maintain pressure at the incision site.
- 5 3M™ V.A.C.® Drape
Covers and protects incision from external contamination.

3M™ Prevena™ Plus Peel and Place Dressing – 35cm Integrated one-piece dressing

- 1 Foam bolster
Channels negative pressure to the incision area.
- 2 Skin-friendly interface layer
Wicks fluid away from the surface.
- 3 Stabilization layer
Prevents film from wrinkling during application.
- 4 Adhesive film
Creates a barrier to external contaminants.

3M™ Prevena™ Duo Therapy Platform - two dressings, one solution

For use on two linear incisions in three dressing length combinations
(13cm/13cm, 13cm/20cm, 20cm/20cm)

Customize treatment with three system options:

3M™ Prevena™ Duo Incision Management System with Peel and Place Dressing — 13cm/13cm

- 1 3M™ Prevena™ 125 Therapy Unit
Features single button operation to turn therapy unit on, off, and activate alert mute.
- 2 3M™ Prevena™ 45ml Canister
- 3 3M™ Prevena™ Peel and Place Dressing – 13cm (qty. 2)
- 4 3M™ V.A.C.® Y-Connector

3M™ Prevena™ Plus Duo Incision Management System with Peel and Place Dressing — 13cm/20cm

- 1 3M™ Prevena™ Plus 125 Therapy Unit
Features rechargeable batteries and single button operation to turn therapy unit on and off.
- 2 3M™ Prevena™ Plus 150ml Canister
- 3 3M™ Prevena™ Peel and Place Dressing – 13cm (qty. 1)
- 4 3M™ Prevena™ Peel and Place Dressing – 20cm (qty. 1)
- 5 3M™ V.A.C.® Y-Connector

3M™ Prevena™ Plus Duo Incision Management System with Peel and Place Dressing — 20cm/20cm

- 1 3M™ Prevena™ Plus 125 Therapy Unit
Features rechargeable batteries and single button operation to turn therapy unit on and off.
- 2 3M™ Prevena™ Plus 150ml Canister
- 3 3M™ Prevena™ Peel and Place Dressing – 20cm (qty. 2)
- 4 3M™ V.A.C.® Y-Connector

The 3M™ Prevena™ Incision Management System manages surgical incisions by:

Helping to hold incision edges together

Removing fluids and infectious materials*

Acting as a barrier to external contamination

Delivering continuous negative pressure at continuous -125 mmHg up to 7 days

Reducing edema

Incisions can be complicated and costly

Post-surgical complications can lead to significant costs:

8 million

people are at risk for healthcare-associated infections (HAIs)¹

SSIs are 21.8%
of all HAIs²

Infections increase average length of hospital stay to an extra

9.58 days³

An additional 9.58 day hospital stay costs

\$38,656⁴

Beyond SSIs, other common complications include: dehiscence, hematoma, and seroma formation.⁵⁻⁷

A number of published clinical studies in a variety of surgical incisions and patient populations have demonstrated that the 3M™ Prevena™ Incision Management System is associated with positive clinical outcomes compared to standard post-operative dressings.

* In a canister

** Prevena Incision Management System bibliography available on request.

Summary

The 3M™ Prevena™ Incision Management System incorporates all of the functional elements of NPT necessary for the management of a variety of closed surgical incisions. Our portfolio of portable and flexible dressings and therapy units provide combined benefits of ease of use and flexibility to manage and protect surgical incisions following primary closure.

Optimized for patient safety:

- Visual and audible alarms.
- Interface layer contains 0.019% ionic silver that may help reduce bacterial colonization within the interface fabric. The silver is not intended to treat infection.
- Replaceable canister holds exudate away from the incision site.
